And I Darken Kiersten White,2017-05-30 The New York Times Bestseller! “Absolutely riveting.” —Alexandra Bracken, #1 New York Times bestselling author of *The Darkest Minds* This vividly rendered novel reads like HBO’s *Game of Thrones* . . . if it were set in the Ottoman Empire. Ambitious in scope and intimate in execution, the story’s atmospheric setting is rife with political intrigue, with a deftly plotted narrative driven by fiercely passionate characters and a fearsome heroine. Fans of Victoria Aveyard’s *THE RED QUEEN* and Sabaa Tahir’s *AN EMBER IN THE ASHES* won’t want to miss this visceral, immersive, and mesmerizing novel, the first in the *And I Darken* series. *NO ONE EXPECTS A PRINCESS TO BE BRUTAL*. And Lada Dragwlya likes it that way. Ever since she and her gentle younger brother, Radu, were wrenched from their homeland of Wallachia and abandoned by their father to be raised in the Ottoman courts, Lada has known that being ruthless is the key to survival. She and Radu are doomed to act as pawns in a vicious game, an unseen sword hovering over their every move. For the lineage that makes them special also makes them targets. Lada despises the Ottomans and bides her time, planning her vengeance for the day when she can return to Wallachia and claim her birthright. Radu longs only for a place where he feels safe. And when they meet Mehmed, the defiant and lonely son of the sultan, who’s expected to rule a nation, Radu feels that he’s made a true friend—and Lada wonders if she’s finally found someone worthy of her passion. But Mehmed is heir to the very empire that Lada has sworn to fight against—and that Radu now considers home. Together, Lada, Radu, and Mehmed form a toxic triangle that strains the bonds of love and loyalty to the breaking point. From #1 New York Times bestselling author Kiersten White

The Physics of Star Formation and Early Stellar Evolution Charles J. Lada, N.D. Kylafis, 2012-12-06 The origin of stars is one of the principle mysteries of nature. During the last two decades advances in technology have enabled more progress to be made in the quest to understand stellar origins than at any other time in history. The study of star formation has developed into one of the most important branches of modern astrophysical research. A large body of observational data and a considerable literature now exist concerning this topic and a large community of international astronomers and physicists devote their efforts attempting to decipher the secrets of stellar birth. Yet, the young astronomer/physicist or more advanced

researcher desiring to obtain a basic background in this area of research must sift through a very diverse and sometimes bewildering literature. A literature which includes research in many disciplines and sub disciplines of classical astrophysics from stellar structure to the interstellar medium and encompasses the entire range of the electromagnetic spectrum from radio to gamma rays. Often, the reward of a successful foray through the current literature is the realization that the results can be obsolete and outdated as soon as the ink is dry in the journal or the conference proceeding in which they are published.

Comparative Environmental Regulation in the United States and Russia Lada V. Kochtcheeva,2008-12-18 As environmental problems continue to pose a threat to the well-being of people all over the world, achieving pollution control through innovative methods and at a lower cost becomes very attractive. However, cost-effectiveness and technical rationality are often at odds with political goals and policy traditions. Lada V. Kochtcheeva analyzes the introduction of flexible laws and regulations in both air and water quality policies in the United States and the Russian Federation from the 1960s to the present, and highlights the replacement of command and control systems with flexible instruments such as incentive programs, tradable permits, and pollution charges. With its rich comparative institutional analysis, the book contributes to the debate on institutional dynamism, policy innovation, and new modes of regulation, while simultaneously addressing the processes and attributes of good governance.

Geopolitical & Geo-Economic Quantum Calibrations Lada

Ray, 2019-02-25 New revolutionary tool for in-depth understanding of our world, from the creator of FuturisTrendcast, Earth Shift System and Quantum Calibrations! Included are nearly 1000 unique Calibrations, with peer group comparisons, unique analysis and acclaimed Lada Ray Predictions! Encompassing: 94 countries & territories; 10 global organizations; 7 leading business/corporate worlds; plus the countries' leaders, armies, economies, finances, solvency and sovereignty! Plus: one-of-a-kind index of the world's most powerful people, and created especially for this book new Power Scale: 4 superpowers, 11 great & regional powers! What makes this book stand out is Lada Ray's trademark fusion of geopolitical analysis, economics, predictions and higher-consciousness knowledge. Some may believe these things separate and non-combine-able. However, as proven by Lada's work, the compartmentalized mentality practiced by mankind today is the result of fractured 3D consciousness, when one side of our nature fights with another, when yin and yang are in conflict. As a result of compartmentalization those who feel comfortable in 'real' world don't understand or deny the unseen and higher-dimensional, while those who consider themselves spiritual shy away from the everyday world. In reality, both practical and spiritual us are ONE. In our era it becomes paramount to understand our world in its totality, to heal past karma and to move forward. Helping humanity accomplish both is the reason for this book. A seamless blend of practical knowledge, cool reason, compassionate heart and higher-consciousness spirituality is THE FUTURE! This book will help you get there. Lada Ray's New Quantum and Geo Calibration System is based on the ground-breaking Calibrations of Human Consciousness

introduced by David Hawkins, M.D., Ph.D. in his book, *Power vs. Force*. Between 2002-2018 Lada developed her own advanced system of Quantum and Geo Calibrations. This breakthrough system goes well beyond the original, introducing a more targeted, refined and high-consciousness result. Lada Ray's system has for years been successfully applied in her writings, Webinars and Private Consultations, with vast majority of Lada's clients remaining her return clients for life. After years of development and application, it can be confidently said that Quantum and Geo Calibration System is the most efficient, all-encompassing and profound tool for revealing the fundamental structural, energetic and spiritual truth about any event, subject or object in our world, currently in existence. The truths that have been hidden will come to light. Where there previously was confusion and chaos, the realization, clarity and structure will emerge. A new, deeper and higher understanding will take place, allowing us to see forward and to act in the best and most beneficial way. The smart politicians, economists, companies and governments can apply Quantum Calibrations productively on global, regional and local levels to analyze and troubleshoot problems in their respective subjects. Individuals can use this book to compare countries, leaders, economies, armies, etc., and to make decisions on relocation. The book has promising practical and academic applications for researchers, scholars and ordinary citizens alike. Use this book to project into the future and plan your next steps on the journey through our fast-shifting world. The GREAT EARTH SHIFT is manifesting in all areas of our life, from nature and environment to social, geopolitical, financial and economic changes. Our mentality and our consciousness are shifting rapidly. Through the new technological revolution we are transitioning to a new society and new dimension of being, in Lada's

classification: the lower-4D.If you have been confused, scared or curious of all the changes, Lada Ray theories and practices will help you acquire the much needed clarity, understanding and peace of mind.

Subterranean Fire Nataalka Bilotserkivets,2022-01-19 A passionate intensity moves through the subjective, intimate voice of the poems of Nataalka Bilotserkivets. Through translation, *Subterranean Fire* continues their mysterious pilgrimage to their second lives. From one of the true inheritors – touchstones like Anna Akhmatova, Gabriela Mistral, and Louise Bogan – the poems of Bilotserkivets inhabit us as they include us in their transcendent borderland. – American poet James Brasfield With great depths of feeling, Nataalka Bilotserkivets's poetry guides us into that uncharted territory where word meets heart. The poems, spare and often questioning, redeem that land between what is most difficult to grasp and most difficult to forget. – Dzvina Orlosky, American poet and translator Nataalka Bilotserkivets's poetry ...is characterized by tight form and elegiac feelings ... this reader was impressed by the liquid cascade of alliterations in her ... poems. – Professor Andrew Wachtel ...contemporary Ukrainian literature has been enriched by the unique pearl of [Nataalka Bilotserkivets's] intellectual and lyrical poetry. – Ukrainian prose writer, poet, and essayist Kost Moskalets I am certain that this first-rate modern Ukrainian poet could become a star of world lyric poetry... – Ukrainian poet and prose writer Ludmyla Taran
