Powered by Porsche - the alternative race cars Roy P Smith,2021-10-13 Powered by Porsche

- the Alternative Race Cars is a thorough and fascinating account of the racing cars that were powered by Porsche engines, but where the chassis and development of the car was carried out by others. The Porsche company in Zuffenhausen, Germany, can probably be said to be the most successful marque ever for victories in the motor racing scene. Likewise many firsts in innovation have come with the name Porsche attached. Many major racing car producers such as Elva, Lotus, Lola, or March, as well as many smaller independents, at some time featured a Porsche engine in their chassis. Demand for the services and supply of cars, chassis, and parts from Porsche, often outstripped their ability to deliver during the late '70s to early '80s. With many new projects in the rapidly expanding Porsche organisation, race car projects had to be prioritised. This would lead to the creation of the replicas, as opposed to the factory-built works race cars, and even Porsche was building 'replica' 935s to supply to clients, continuing into the 962 era. In turn, a whole new, highly specialised, high quality industry grew up to meet the demand for Porsche-powered racers. In this fascinating book we meet the racing cars, the teams and the people who turned to Porsche to utilise the power from, perhaps, the greatest of all engine makers. This is thought to be first book on the subject, covering the entire history of Porsche engines, detailed engine specifications, non-Porsche chassis, and race details, as well as team histories with anecdotes from drivers. It is illustrated with many previously unpublished photos, and provides fascinating reading for all racing fans, as well as Porsche enthusiasts.

Automobily Lada Jan Tuček, 2012-01-01 Sovětské automobily Lada, u nás dodnes známé pod přezdívkou žigulíky, si v sedmdesátých a osmdesátých letech minulého století získaly značnou oblibu nejen v zemích východního bloku, ale i na Západě. Kniha nabízí technický popis jednotlivých modelů, od prvních vozů klasické koncepce Lada 1200, přes kompaktní terénní automobil Lada Niva s pohonem čtyř kol a modernizované modely Lada 2105, až po novou generaci z poloviny 80. let s motorem vpředu napříč a pohonem předních kol, jejíž první představitelkou byla Lada 2108 Samara. Kniha nezapomíná ani na prototypy, sportovní aktivity i africká dobrodružství dnes už legendárních automobilů. Poprvé také přináší podrobný přehled jejich produkce a dovozu do Československa.

Cars of the Soviet Union Andy Thompson, 2008 The story of the Soviet Union's cars has to be seen in the context of a planned society in which everything was planned well in advance, and consumer items were not a priority until well after the Second World War. This extraordinarily detailed study charts the history of Soviet cars from the birth of the Soviet Union in 1917 until its demise in 1990, with a conclusion about the post-Soviet era. It is the story of an insular, state-run car industry in which the carefully thought-out ideas of ministerial planners, rather than fickle customers in a free market, determined what cars were made in a country where the open road was often a 300-mile track across a windswept steppe.

East European Cars Julian Nowill,2000 East European cars are generally derided in the West as cheap, low-quality rustbuckets. This title aims to dig deeper, covering almost all the vehicles produced from the end of the Second World War to the end of the 20th century from the most basic

three-wheeler from Czechoslovakia to the big V8 limousines of Russian and China. Many Soviet bloc cars were never exported to the West so there are many unfamiliar marques such as the Zil, Chaika, Syrena and Tatra. These are covered along with the better known Skoda, Lada and Trabant, including Soviet land-speed records and prototypes.
