Lavochkin-Gorbunov-Gudkov LaGG-1 Aaron Philippe Toll, 2012-03-12 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. The Lavochkin-Gorbunov-Gudkov LaGG-1 was a Soviet fighter aircraft of World War II. Although not very successful, it formed the basis for a series of aircraft that would eventually become some of the most formidable Soviet fighters of the war. The LaGG-1 was designed in 1938 as a light-weight aircraft designed around the Klimov M-105 engine and built out of laminated wood to save on strategic materials. The first prototype flew on March 30, 1940, and once some initial difficulties had been worked out of the design, proved to be promising, if somewhat short of what its designers had hoped for. By this stage, however, the need to modernise the Soviet Air Force had been made plain by recent losses in the Winter War with Finland, and the aircraft, initially designated I-22 was ordered into production.

*LaGG & Lavochkin Aces of World War 2* George Mellinger, 2012-10-20 This book examines the LaGG family of fighters, that were amongst the first modern piston-engined interceptors made available to the Red Air Forces in early 1941 and proved far better fighters than their radial-engined predecessors. Despite technical maladies and political interference from Moscow, the LaGG-3 matured into an effective fighter when flown to its strengths at low level. Many early Soviet aces were weaned on the LaGG-3, and if they survived the early massacres of 1941-42, they went on to fly the Lavochkin family of fighters. Indeed, the Lavochkin La-3, -5 and -7 were the fighters of choice for Heroes of the Soviet Union such as Ivan Kozhedub, who claimed 62 kills.

**Soviet Fighters of the Second World War** Jason Nicholas Moore, 2021-07-30 The Red Air Force had just started to re-equip with modern monoplane fighters when the Germans opened Operation Barbarossa, the invasion of the Soviet Union. Hundreds of fighters were destroyed in the first few days, but many of these were obsolete biplanes. *Soviet Fighters of the Second World War* details fighter development from the dark days of Barbarossa to eventual triumph over Berlin. Starting with outdated aircraft such as the Polikarpov Po-2 biplane and monoplane fighters, the Soviets then settled on two main lines of development: the inline-engine LaGG-3 and its radial-engine derivatives, the La-5 and La-7, and the inline-engine Yakovlev fighters, which were produced in greater numbers than any other series of fighters. Not only are these aircraft accurately described, but experimental fighters are also dealt with. In addition, colour profiles illustrate these aircraft in terms of design, camouflage and markings. From the I-15bis biplane of the late 1930s to the superb La-7 and Yak-3 fighters of the last year of the war, all Red Air Force fighters are covered in this comprehensive volume.

Military Aircraft, 1919-1945 Justin D. Murphy, Matthew A. McNiece, 2008-12-08 An in-depth history of the time when airpower became the great equalizer, changing military strategy forever and bringing once-safe targets in reach. *Military Aircraft, 1919-1945: An Illustrated History of Their Impact* covers a crucial era in modern warfare technology. Ranging from the development of airpower doctrines in the aftermath of World War I to the aircraft and missions that put those doctrines into action during World War II, it provides an expert summing-up of the decades when the use of aircraft in battle came of age. In chapters covering both the history of air power and specific types of aircraft (fighters, bombers, reconnaissance and auxiliary planes), *Military Aircraft, 1919-1945* introduces key theorists and designers, describes important changes in technology and production, and recreates spectacular episodes from Pearl Harbor to the London Blitz to the Enola Gay. Readers will see the dramatic impact of the first generation of modern military aircraft on land and sea. They will also see how the expansion of war to the skies brought economic opportunity to some home fronts, and looming terror and devastation to others.

**Causes and Consequences of Forest Growth Trends in Europe** Hans-Peter

Kahle,2008-05-31 Forest growth in Europe has been increasing during the last decades. Several possible causes have been suggested. In this book complementary approaches are used to discriminate between factors. Increased nitrogen availability is indicated as the major cause of the observed growth increase. In the future, direct temperature effects and increasing atmospheric carbon dioxide concentration are likely to become more important.

**Russian Aviation and Air Power in the Twentieth Century** John Greenwood,Von Hardesty,Robin Higham,2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century. Presenting a comprehensive view of Russian aviation, from its genesis in the late czarist period to the present era, the approach is essentially chronological with a major emphasis on the evolution of military aviation. The contributions are diverse, with appropriate attention to civilian and institutional themes.

*La-5/7 vs Fw 190* Dmitriy Khazanov,Aleksander Medved,2011-09-20 Soviet fighter aviation suffered terribly at the hands of the Jagdwaffe in the first year of the war in the east and, with the arrival of JG 51 and its Fw 190s on the Stalingrad Front in September 1942, things only got worse. However, help was on its way in the form of the La-5. Tougher, faster, and with a greater rate of climb than its predecessors, most were flow by a new generation of better-trained pilots led by combat veterans. These new fighters soon found themselves pitted into action on the Central Sector against the equally new Fw 190As of JG 51. From then on, these two fighters would battle it out in the skies over the Eastern Front. This book tells the complete story of the battles between these two important fighters.

The Lavochkin Mantelli - Brown - Kittel - Graf,2015-03-30 Lavochkin, Semyon Alekseyevich (1900-1960) Russian chief designer. Chief Designer of OKB-301 1937-1960. Lavochkin was appointed Chief Designer of OKB-301 in 1937. His office has designed and built thousands of fighter planes during World War II, from Lavochkin LaGG-1 until the Lavochkin La-9. The first fighter Lavochkin was designated I-22 and was also the first of the triad of new Soviet interceptors to take flight, exactly March 30, 1939. As happens from there in 2-3 years with the fighters '5 Series' Italian, and Indeed, as already happened with 'Series 0', the three competitors will all have some success and everyone will be rewarded by production contracts, but without resemble very much less be subject to the same development and operational success. Lavochkin - or Lavochin, depends transilitterazione - together with Gorbunov and Gudkov, had given rise to a hunting simple and robust, relatively good-looking, but he had the problem of the choice of strategic materials, or rather, the choice not to use them . It was in fact the only one of the three that was built entirely of wood, except of course for the basic elements such as the shopping cart, the weapons, the engine, the ailerons (metal and coated canvas). The retractable landing gear and the engine M-105P were signs of a relative modernity, and certainly worthy of note was its top speed of 605 km / h. The weapons were high rates of fire,

two and one ShKAS ShVAK. Again designated as I-301, then took the name of LaGG-1. But for the production became LaGG-3.

**Soviet Aircraft Industry** Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West; until the collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, *Soviet Aircraft Industry* examines the unique characteristics of Soviet-designed aircraft—particularly military types, which were the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.

**Soviet Air Power** Kenneth Whiting, 2020-01-29 This comprehensive examination of Soviet air power analyzes the three branches of the USSR Military Air Forces & Frontal Aviation, Long-Range Aviation, and Military Air Transport and Naval Aviation and the National Air Defense, emphasizing World War II and postwar developments.

*Multiscale Modelling and Simulation* Sabine Attinger, Petros Koumoutsakos, 2004-07-12 In August 2003, ETHZ Computational Laboratory (CoLab), together with the Swiss Center for Scientific Computing in Manno and the Università della Svizzera Italiana (USI), organized the Summer School in Multiscale Modelling and Simulation in Lugano, Switzerland. This summer school brought together experts in different disciplines to exchange ideas on how to link methodologies on different scales. Relevant examples of practical interest include: structural analysis of materials, flow through porous media, turbulent transport in high Reynolds number flows, large-scale molecular dynamic simulations, ab-initio physics and chemistry, and a multitude of others. Though multiple scale models are not new, the topic has recently taken on a new sense of urgency. A number of hybrid approaches are now created in which ideas coming from distinct disciplines or modelling approaches are unified to produce new and computationally efficient techniques.

*World War II Fighter Planes Spotter's Guide* Tony Holmes, 2021-02-04 World War II saw pilots from around the world battling in the skies over Europe, Asia and Africa, with victory resting upon their nerve, skill and the

capabilities of some of history's most iconic aircraft. In the chaos of battle, it was vital that they could quickly identify friend from foe. But do you know your Hurricane from your Bf 109, or what the legendary P-51 Mustang looks like? Do you know the wingspan of the A6M Zero-sen, or how fast it could fly? THE WORLD WAR II FIGHTER PLANES SPOTTER'S GUIDE answers all of these questions and more, providing essential information on over 90 legendary aircraft, from the celebrated Spitfire to the jet-powered Me 262. Featuring full-colour artwork to aid recognition, as well as all the details you need to assess their performance, this is the perfect pocket guide to the Allied and Axis fighters of World War II.

**Soviet Aviation And Air Power** Robin Higham, Jacob W Kipp, 2019-08-20 This book is the story of Russian aviation and Soviet Russia's progress in preparing its strength as an air power. It discusses the Russia-Germany connect post 1919, how Russians gained expertise from German know-how, and post World War II progress from Stalin to Strategic Arms Limitation Talks.

**Soviet Aces of World War 2** Hugh Morgan, 2013-01-20 No single volume in English has ever appeared in the West dealing with this intriguing subject area, but now that restrictions have relaxed in the former Soviet Union, records of the deeds of the elite pilots of the various Soviet Air Forces are coming to light. Although initially equipped with very poor aircraft, and robbed of effective leadership thanks as much to Stalin's purges in the late 1930s as to the efforts of the Luftwaffe, Soviet fighter pilots soon turned the tables through the use of both lend-lease aircraft like the Hurricane, Spitfire, P-39 and P-40, and home-grown machines like the MiG-3, LaGG-3/5, Lavochkin La-5/7/9 and the Yak-1/3.
