LaGG & Lavochkin Aces of World War 2 George Mellinger, 2012-10-20 This book examines the LaGG family of fighters, that were amongst the first modern piston-engined interceptors made available to the Red Air Forces in early 1941 and proved far better fighters than their radial-engined predecessors. Despite technical maladies and political interference from Moscow, the LaGG-3 matured into an effective fighter when flown to its strengths at low level. Many early Soviet aces were weaned on the LaGG-3, and if they survived the early massacres of 1941-42, they went on to fly the Lavochkin family of fighters. Indeed, the Lavochkin La-3, -5 and -7 were the fighters of choice for Heroes of the Soviet Union such as Ivan Kozhedub, who claimed 62 kills.

Slovakian and Bulgarian Aces of World War 2 Jiri Rajlich, 2012-12-20 In 1939, Slovakia signed a protection agreement with the German Reich and joined the attack on Poland, where its Avia B-534-equipped fighter squadrons claimed their first kills. In October 1942, having made do with obsolete aircraft, the Slovaks were equipped with Bf 109Es and eventually acquired 43 Messerschmitt fighters. The Slovaks would claim over 215 kills. Although it supported German efforts in Yugoslavia and Greece, Bulgaria did not declare war on Russia. First seeing action in August 1943, Bulgarian fighter pilots used their Bf 109Gs to good effect. From late 1943 through to mid-1944, the Bulgarian pilots attempted to defend the country from American bombers, and Stoyanov and Bochev made ace during this period.

The LaGG-3 Fighter In Profile & Scale Erik Pilawskii, 2022-01-19 Volume № 11 of the Profile & Scale series is a ground-breaking work seeking to understand and explain the extreme complexity of the LaGG-3 fighter programme. More than 50 LaGG-3 examples are faithfully documented in full-colour profile, many appearing for the first time. Sixty-three pages of original and not previously published 1:48 scale line drawings reveal the development and complexity of the LaGG family as never before, seeking to clarify much of what has been shrouded in confusion hitherto. These line drawings are the culmination of nearly 30 years' dedicated work on the type, and should present the most complete, accurate and illuminating scale work regarding the aircraft to date. The book contains an essential summary of the development of the LaGG-3 programme which should clarify many aspects of the fighter, its history and development during the war. Even seasoned students of VVS history will no doubt discover new information regarding this most complicated and convoluted project, and it is hoped that these discoveries will allow for a re-appraisal of the LaGG-3 and its place in the greater aeronautical story. Many of the colour profiles represent examples which will be familiar to students of the LaGG-3, albeit completed to the utmost standard of accuracy. Several profiles will doubtless be new even to experienced readers, and it is hoped these will delight both the casual reader and the serious student, equally.

Luftwaffe Victory Markings 1939-45 Philippe Saintes, 2022-01-14 A fully illustrated overview of the Nazi German Air Force's victory markings on their day & night fighter aircrafts in World War II. This book provides an overview of the victory markings painted on the fins and rudders of the planes of the German day fighter and night fighter aircraft between 1939 and 1945, and demonstrates how these were applied in reality through the profiles of nineteen pilots, including some of the most emblematic pilots of the Luftwaffe: Hans Troitzsch, Johannes Gentzen, Frank Liesendahl, Wilhelm Balthasar, Otto Bertram, Joachim Müncheberg, Karl-Heinz Koch, Kurt "Kuddel" Ubben, Felix-Maria Brandis, "Fiffi" Stahlschmidt, Franz-Josef Beerenbrock, Heinrich Setz, Walter "Gulle Oesau, Max-Hellmuth Ostermann, Heinrich Bartels, Fritz Dinger, Martin Drewes, Egmont zur Lippe-Weissenfeld and Ludwig Meister. Praise for Luftwaffe Victory Markings 1939-45 "For any and all who seek out photos of the German WWII victory markings adorning their aircraft, this book is simply a 'must have'." —Large Scale Planes "Will be of great interest to

modelers who want to put victory markings on a Luftwaffe fighter model.” —AMPS Indianapolis “Modelers seeking to put a finishing detail on their aircraft will find this book quite useful.” —Historical Miniatures Gaming Society

Soviet Fighters of the Second World War Jason Nicholas Moore, 2021-07-30 The Red Air Force had just started to re-equip with modern monoplane fighters when the Germans opened Operation Barbarossa, the invasion of the Soviet Union. Hundreds of fighters were destroyed in the first few days, but many of these were obsolete biplanes. Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin. Starting with outdated aircraft such as the Polikarpov Po-2 biplane and monoplane fighters, the Soviets then settled on two main lines of development: the inline-engine LaGG-3 and its radial-engine derivatives, the La-5 and La-7, and the inline-engine Yakovlev fighters, which were produced in greater numbers than any other series of fighters. Not only are these aircraft accurately described, but experimental fighters are also dealt with. In addition, colour profiles illustrate these aircraft in terms of design, camouflage and markings. From the I-15bis biplane of the late 1930s to the superb La-7 and Yak-3 fighters of the last year of the war, all Red Air Force fighters are covered in this comprehensive volume.

Lavochkin Fighters of the Second World War Jason Moore ,2017-03-13 The Lavochkin fighters remain little known in the West, although with the Yakovlev fighter series they were the backbone of the Red Air Force fighter force during the Second World War. The author rectifies that with this comprehensive history of these fighters. With this book he describes in great detail the three main variants of the Lavochkin fighter series during the Second World War: the only partially successful LaGG-3 inline-engined fighter, the successful radial-engined La-5 fighter, and the superb radial engined La-7 fighter, one of the best piston-engined fighter aircraft of the entire Second World War. Both the design and history of these fighters are featured, including how the mediocre inline engined LaGG-3 was turned into a top notch fighter by the replacement of the Klimov inline engine by the Shvetsov M-82 radial engine. Besides describing the wartime designs he includes a section on the postwar successors to the Second World War fighters, the completely new all metal La-9 and La-11, which saw extensive postwar service. Accurate color profiles illustrate all variants.

Military Aircraft, 1919-1945 Justin D. Murphy, Matthew A. McNiece, 2008-12-08 An in-depth history of the time when airpower became the great equalizer, changing military strategy forever and bringing once-safe targets in reach. Military Aircraft, 1919-1945: An Illustrated History of Their Impact covers a crucial era in modern warfare technology. Ranging from the development of airpower doctrines in the aftermath of World War I to the aircraft and missions that put those doctrines into action during World War II, it provides an expert summing-up of the decades when the use of aircraft in battle came of age. In chapters covering both the history of air power and specific types of aircraft (fighters, bombers, reconnaissance and auxiliary planes), Military Aircraft, 1919-1945 introduces key theorists and designers, describes important changes in technology and production, and recreates spectacular episodes from Pearl Harbor to the London Blitz to the Enola Gay. Readers will see the dramatic impact of the first generation of modern military aircraft on land and sea. They will also see how the expansion of war to the skies brought economic opportunity to some home fronts, and looming terror and devastation to others.

Soviet Aces of World War 2 Hugh Morgan, 2013-01-20 No single volume in English has ever appeared in the West dealing with this intriguing subject area, but now that restrictions have relaxed in the former Soviet Union, records of the deeds of the elite

pilots of the various Soviet Air Forces are coming to light. Although initially equipped with very poor aircraft, and robbed of effective leadership thanks as much to Stalin's purges in the late 1930s as to the efforts of the Luftwaffe, Soviet fighter pilots soon turned the tables through the use of both lend-lease aircraft like the Hurricane, Spitfire, P-39 and P-40, and home-grown machines like the MiG-3, LaGG-3/5, Lavochkin La-5/7/9 and the Yak-1/3.

Stalin's Falcons Dmitry Zubov,2024-06-13 In this stunning exposé, Dmitry Zubov reveals the dark truth of the terrible losses suffered by Soviet flyers, the inferiority of the Russian aircraft on World War II's Eastern Front, and the almost slave-like conditions in which those aircraft were made. The Soviet history of the Second World War, written under the conditions of a totalitarian regime, reflected all its features, with the result that it includes solid sets of patriotic fables that have no connection with reality. Many of the events of the war were distorted beyond recognition or even made up from beginning to end. Archives containing original documents were available only to selected, specially verified KGB 'historians' who presented only the version of the war that was acceptable to the Soviet regime. After the collapse of the Soviet Union, the process of declassifying archives and gaining wide access to information gradually began to reveal the terrible truth of the crimes of the Soviet regime. One of which, of course, was the incompetent leadership of the Red Army, which led to massive loss of life across the military and civilians alike. However, the consequences of decades of Soviet propaganda had a strong impact on both Russian and world historical science. Because of this, not only Russian, but, unfortunately, many European and American historians found themselves repeating the Soviet myths they had been fed. The history of Soviet fighter aircraft did not escape this fate. The tale of Stalin's so-called 'Falcons', who allegedly shot down dozens and even hundreds of Luftwaffe aircraft, was persistently drummed into the heads of many generations of Russian people. These heroes, supposedly, flew Soviet fighters whose technical characteristics were many times superior to their German counterparts, with the result that Luftwaffe aces were reportedly afraid of meeting them in the air. These primitive propaganda clichés became a model for describing the actions of Stalin's fighter aircraft. In this stunning exposé, Stalin's Falcons reveals the stark and dark truth of the terrible losses suffered by Soviet flyers, the inferiority of the Russian aircraft and the almost slave-like conditions in which those aircraft were made.

World War II Fighter Planes Spotter's Guide Tony Holmes,2021-02-04 World War II saw pilots from around the world battling in the skies over Europe, Asia and Africa, with victory resting upon their nerve, skill and the capabilities of some of history's most iconic aircraft. In the chaos of battle, it was vital that they could quickly identify friend from foe. But do you know your Hurricane from your Bf 109, or what the legendary P-51 Mustang looks like? Do you know the wingspan of the A6M Zero-sen, or how fast it could fly? THE WORLD WAR II FIGHTER PLANES SPOTTER'S GUIDE answers all of these questions and more, providing essential information on over 90 legendary aircraft, from the celebrated Spitfire to the jet-powered Me 262. Featuring full-colour artwork to aid recognition, as well as all the details you need to assess their performance, this is the perfect pocket guide to the Allied and Axis fighters of World War II.

LaGG Fighters in Action Hans-Heiri Stapfer,1996-01-01 Gennemgang af det sovjetiske jagerfly LaGG-3 fra 2. verdenskrig.

Russian Aviation and Air Power in the Twentieth Century John Greenwood,Von Hardesty,Robin Higham,2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century. Presenting a comprehensive view of Russian aviation, from its genesis in the late czarist period to the present era, the approach is essentially chronological with a major emphasis on the evolution of military aviation. The contributions are diverse, with appropriate attention to civilian and

institutional themes.

La-5/7 vs Fw 190 Dmitriy Khazanov,Aleksander Medved,2011-09-20 Soviet fighter aviation suffered terribly at the hands of the Jagdwaffe in the first year of the war in the east and, with the arrival of JG 51 and its Fw 190s on the Stalingrad Front in September 1942, things only got worse. However, help was on its way in the form of the La-5. Tougher, faster, and with a greater rate of climb than its predecessors, most were flown by a new generation of better-trained pilots led by combat veterans. These new fighters soon found themselves pitted into action on the Central Sector against the equally new Fw 190As of JG 51. From then on, these two fighters would battle it out in the skies over the Eastern Front. This book tells the complete story of the battles between these two important fighters.

Aces of Jagdgeschwader 3 'Udet' John Weal,2013-11-20 Jagdgeschwader 3 may not have the same immediate resonance as some of the more famous Luftwaffe fighter units, such as Jagdgeschwader 2 'Richthofen', but it is arguably the archetypal German fighter formation of World War 2. Not only did it participate in every campaign fought by the Luftwaffe (with the exceptions of Poland and Norway), it flew every major variant of the two legendary German wartime fighters, the Messerschmitt Bf 109 and the Focke-Wulf Fw 190 – starting with the Bf 109E in 1939 and ending with the Fw 190D-9 'Long-nose' in 1945. And, during the course of the hostilities, it numbered among its ranks more than 70 Knight's Cross winners (a total exceeded by only one other Jagdgeschwader). The wealth and variety of detail afforded by such a background – which includes the historic battles of Britain, Stalingrad, Kursk, Normandy, the Ardennes and Berlin – provides an ideal framework upon which to portray the multitude of stories, exploits and ultimate fates of the many aces themselves, from the now unknown trio who achieved their first five kills during the Blitzkrieg in France in the late spring/early summer of 1940 to the nearly two-dozen highly acclaimed and lauded 'centurions' who flew with JG 3.

JG 26 Luftwaffe Fighter Wing War Diary Donald Caldwell,2012-10-01 Day-by-day account of a German fighter squadron, one of only two Luftwaffe units to spend the entire war in the West. Covers D-Day and the Normandy campaign, Operation Market Garden, the Battle of the Bulge, and more. JG 26 was known as The Abbeville Boys and seen as an elite squadron. Unit flew Messerschmitt Bf 109s and Focke-Wulf Fw 190s.

LaGG & Lavochkin Aces of World War 2 George Mellinger,2012-10-20 This book examines the LaGG family of fighters, that were amongst the first modern piston-engined interceptors made available to the Red Air Forces in early 1941 and proved far better fighters than their radial-engined predecessors. Soviet Bombers of the Second World War Jason Nicholas Moore,2019-09-08 Soviet bombers were a varied lot during the Second World War, ranging from single-engined biplanes such as the 1920's era Polikarpov U-2 to the excellent and modern twin-engined Tu-2 medium bomber. Although the use of four-engined strategic bombers was mostly limited to use of the huge Pe-8 bomber, the Soviets used many other aircraft for both strategic and tactical bombing. As the bombers of the Red Air Force were mainly tasked with supporting the Red Army, most of the bombers were used for tactical bombing, attacking tanks, troop convoys, trains, and airfields. This book will deal with both strategic bombers and tactical bombers, but will concentrate on the smaller tactical bombers, as this is where the Red Air Force's emphasis lay. Such types as the Il-4, the Su-2, the aforementioned Tu-2, and the most important bomber of all, the Il-2 Shturmovik attack

bomber, will be described in great detail, including not only details on the aircraft themselves, but how they were deployed in combat. The one truly strategic bomber, the Pe-8, will not be forgotten, and neither will the comparatively tiny U-2 biplane, which was so effective in its use as a night-time nuisance raider that the Germans copied the tactic wholesale. Accurate colour profiles in some number will accompany the text in this comprehensive work on Soviet bombers.

Air Combat Dmitriy Khazanov,Aleksander Medved,Edward M. Young,Tony Holmes,2019-01-24 The battle for the skies in World War II fuelled a race between rival air forces to develop ever faster and more capable fighter aircraft – and the struggle for air superiority was never over until the war itself ended. This volume explores four clashes of some of the finest planes and pilots, in key theatres of the war: Spitfires duelling the formidable Bf 109 over the Channel, the Fw 190 battling the Soviet La 5 and 7 on the Eastern Front, the F4F Wildcat in a desperate clash with the legendary A6M Zero-sen, and the F4U Corsair in combat with the second-generation Japanese Ki-84 in the closing days of the war. Fully illustrated with contemporary photographs, maps and colour artwork, Air Combat conveys the full story behind these dramatic aviation duels.
