Road Hogs Eric Peters,2011-06-13 Climb into one of America's classic luxury cars from the 1960s and 1970s, swaddle yourself in yards and yards of fine Corinthian leather, scan the gigantic dashboard filled with esoteric dials and gauges that you can never hope to understand, twist the oversized ignition key, and listen to those coffee-can-sized pistons crank over in that enormous V-8 lurking under that vast expanse of hood. Feel that throbbing power burbling beneath an accelerator pedal the size of a Japanese hotel room, and you'll know what once made the American auto industry great. Road Hogs celebrates this greatness, as expressed through the magnificent performance luxury cars that rolled out of Detroit during the classic era, like the Cadillac Eldorado, Chrysler 300, Buick Electra, Chevy Monte Carlo, Buick Riviera, and many more.

American Cars, 1973-1980 J. "Kelly" Flory, Jr.,2012-11-02 The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

History of Electric Cars Nigel Burton,2013-06-30 One hundred years ago electric cars were the most popular automobiles in the world. In the late nineteenth century and at the start of the twentieth century, they outsold every other type of car. And yet, within a couple of decades of the start of the twentieth century, the electric car had vanished. Thousands of battery-powered cars disappeared from the streets, replaced by the internal combustion engine, and their place in the history of the automobile was quietly erased. A century later, electric cars are making a comeback. Fears over pollution and global warming have forced manufacturers to reconsider the electric concept. A History of Electric Cars presents for the first time the full story of electric cars and their hybrid cousins. It examines how and why electric cars failed the first time - and why today's car manufacturers must learn the lessons of the past if they are to avoid repeating previous mistakes all over again. The book examines in detail: Early vehicles such as the Lohner-Porsche petrol-electric hybrid of 1901; Key figures in the history of the electric car development such as Henry Ford; Sir Clive Sinclair's plans to build a number of electric vehicles, designed to sit alongside the Sinclair C5; The return of the electric technology to vehicles as diverse as the NASA Lunar Rover, commuting vehicles and supercars; Future developments in electric cars. For the first time the full story of electric cars and their hybrids are examined. The hidden past of the electric automobile is uncovered and its future developments are discussed. Superbly illustrated with 300 colour photographs, many of which are rare and original sketch designs. Nigel Burton has written and lectured on cars and automotive history for more than twenty years.

Standard Catalog of Chevelle 1964-1987 John Gunnell,2003-03-01 The history of the fabulous Chevelle is almost as much of a secret as its mystery V-8 was back in the mid '60s. This book unveils the secrecy by providing total coverage of this fast-flying factory hot rod as well as extensive coverage of El Camino, Laguna, plus the modern-day Malibu and the GMC Sprint. From the lowly 300 four-door-sedan to the Concours Estate wagon to the Malibu, Super Sport, SS-396, LS-5, LS-6, Heavy Chevy, and El Camino, the whole Chevelle family is listed with standard equipment, original prices, weights, VIN breakouts, production data, engine specs, technical details, historical facts, and collector prices.
