Ferrari 308, 328 and 348 Robert Foskett,2015-01-26 Ferrari 308, 328 and 348 traces the complete story of the four models of Ferrari's V8-powered sports cars between 1973 and 1995 – the cars that broke Ferrari out of the V6 and V12 moulds, with the V8 becoming Ferrari's most popular engine choice in the final decade of the twentieth century. The book covers the history and development of Ferrari's new V8 engine, and the 308's daunting role as successor to the popular Dino. There are specification tables and production figures for the model variants, along with details of concept cars and other related models, and a review of competition exploits. The book also considers the cars' current position in the classic car market and offers insight into the rewarding ownership experience each of the models now represents. The book covers: design processes and styling by Bertone and Pininfarina; concept cars and rivals; the cars in competition; owning and running the cars today. With a guide through the entire lifespan of these exciting V8-powered sports cars and superbly illustrated with 295 colour photographs, this is essential reading for the Ferrari aficionado.

Powered by Porsche – the alternative race cars Roy P Smith,2021-10-13 Powered by Porsche – the Alternative Race Cars is a thorough and fascinating account of the racing cars that were powered by Porsche engines, but where the chassis and development of the car was carried out by others. The Porsche company in Zuffenhausen, Germany, can probably be said to be the most successful marque ever for victories in the motor racing scene. Likewise many firsts in innovation have come with the name Porsche attached. Many major racing car producers such as Elva, Lotus, Lola, or March, as well as many smaller independents, at some time featured a Porsche engine in their chassis. Demand for the services and supply of cars, chassis, and parts from Porsche, often outstripped their ability to deliver during the late '70s to early '80s. With many new projects in the rapidly expanding Porsche organisation, race car projects had to be prioritised. This would lead to the creation of the replicas, as opposed to the factory-built works race cars, and even Porsche was building 'replica' 935s to supply to clients, continuing into the 962 era. In turn, a whole new, highly specialised, high quality industry grew up to meet the demand for Porsche-powered racers. In this fascinating book we meet the racing cars, the teams and the people who turned to Porsche to utilise the power from, perhaps, the greatest of all engine makers. This is thought to be first book on the subject, covering the entire history of Porsche engines, detailed engine specifications, non-Porsche chassis, and race details, as well as team histories with anecdotes from drivers. It is illustrated with many previously unpublished photos, and provides fascinating reading for all racing fans, as well as Porsche enthusiasts.

SuperVan & I Sarel Van der Merwe,2012-04-01 THE CARS, THE RACES, THE RIVALRIES, THE WOMEN ... WELCOME TO THE WORLD OF SAREL VAN DER MERWE, SOUTH AFRICA'S GREATEST RACING DRIVER. IT'S TIME TO FASTEN YOUR SEATBELT FOR THE RIDE OF YOUR LIFE ... Sarel van der Merwe is a certified, card-carrying legend – the Clint Eastwood of South African motor sport. Not only is Sarel the most gifted driver ever to come out of this country, winning both off-road and on the track, but he's been utterly uncompromising in his approach. Since he and his alter ego, SuperVan, have been racing, Sarel has been super-competitive, scratching paint off racing cars from Kyalami to Le Mans. And he's certainly pissed some people off. In this no-holds-barred story of his life, Sarel reveals the skinny behind all his big rivalries, his run-ins with team owners and his frequent disagreements with motor-sport authorities. Along with a behind-the-scenes look at the world's legendary motor races, he rates the greatest – and worst – cars he ever drove, remembers some of the colourful characters that featured in his long career, and explains exactly why motor sport in South Africa is no longer what it used to be. And then, of course, there were the women?... 'Sex is like motor sport,' Sarel says. Though you'll have to read the book to find out why.

Lancia 037 Peter Collins,2008-03-15 The world of rallying was changed forever on January 1st 1982 with the introduction of the new Group B rules. These virtually gave manufacturers carte blanche to design the fastest car they could for world rally special stages, so long as they built at least 200 identical examples. This is the story of Lancia's mid-engined and supercharged rally. The reader is taken from initial thinking about the car and conception, through development to the full history of its rallying lifetime with the help of the car designer and chief engineer, Ing Sergio Limone. Ferrari Hypercars Winston Goodfellow,2014-11-14 The only full history behind all of Ferrari's most outrageous performance cars. For over 60 years, Ferrari has produced cars that fire the imaginations of car lovers worldwide. Embodying the perfect combination of beauty, performance, exclusivity, and Italian flair, its vehicles have made it the world's most iconic carmaker. Though Ferrari has always produced road cars, the company has first and foremost focused on competition models, such as the handful of cars built in low-number serial production that campaigned on race courses the world over in the 1950s and 60s. In Ferrari Hypercars: The Story of Maranello's Fastest, Rarest Road Cars, author Winston Goodfellow profiles some of Ferrari's top creations--vehicles so startling in their performance capabilities that they surpass modern terms and attain the status of hypercar. This book begins by reaching back to the 1950s to establish the lineage of hypercars and goes on to showcase the best known examples since the 288 GTO, including the F40, F50, Enzo, and all-new la Ferrari. These cars were collector vehicles from the moment they rolled off the production line, though that was never the reason for their creation; they were made to be driven. A necessary read for any racing fan, Ferrari Hypercars exhaustively traces the history of the company's competition vehicles and establishes its status as a symbol for speed, luxury, and wealth.

Mini-RC-Cars Hans-Peter Sollik, In 1987, the first Mini-Z models came onto the market, small remote-controlled car models for racing fun (not only) in your own living room. Since then, the mini-RC cars in 1:24 scale and smaller, especially as ready-to-run models, have offered an inexpensive entry into sophisticated car modelling. In this book, Hans-Peter Sollik presents five selected models, from monster trucks to Formula 1 racers, showing the construction and possible uses of these smart RC cars. What is included in the usual scope of delivery, which motor, and chassis equipment can be considered, which battery technology and which remote control components, are described by the author as well as the wide range of optical and technical improvements: tuning. Anyone who wants to get to know RC car modelling and gain initial experience with miniature models, perhaps in order to switch to larger scales later, will find the right instructions in this book.
