Land Rover Ben Skipper, 2021-01-13 A richly illustrated guide to modeling the military Land Rover, filled with previously unseen inspirational photographs and drawings. The Land Rover was originally designed to fill a gap in the Rover Car Company's post-war product portfolio. Initially based on Willy's-Overlands Jeep, the now-legendary Land Rover was adopted by armed forces across the globe almost immediately. By its sixtieth anniversary in 2008 the Land Rover was serving as a combat vehicle and as a first responder platform. This unique LandCraft title looks into the Land Rover's development during the immediate post-war years, to its development and growth as a military vehicle synonymous with versatility. The book charts how the Land Rover evolved into unique military-only variants. The book also examines how this modest 4x4 grew from an innocuous Cold War cargo vehicle into a weapons platform supporting

troops in the deserts of South West Asia. The military Land Rover truly offers the modeler an exciting range of subject, era and theatre choices. "A welcome addition to the very popular Land Craft Series. Aimed at model makers, this series has become popular with a much wider readership, due to the excellent text describing the subject vehicle and its deployment, including unit structures—Very Highly Recommended."

—Firetrench "All in all this is a great, compact reference work for modelers heading off on a Land Rover safari. It's not overwhelming, provides good recommendations and fair assessments of products while presenting fantastic reference material to help the modeler get motivated and also providing enough up close detail to be helpful." —AMPS

Support to High Intensity Operations Great Britain. National Audit Office, 2009 The provision of support for troops in Iraq and Afghanistan is made more difficult because they operate in remote locations and harsh conditions. Despite the challenging operational environments, the Ministry of Defence (MOD) has successfully delivered around 300,000 personnel and 90,000 tonnes of freight to Iraq and Afghanistan over the last two years. However, it has not consistently met its targets for delivering supplies in a timely fashion. The MOD is taking measures to improve the effectiveness of its supply chain; and the amount of time a unit waits for items to be delivered has reduced by half in Afghanistan and a third in Iraq. £4.2 billion has been approved to upgrade or buy new equipment to meet urgent requirements in the two theatres. The NAO found that the

availability of this equipment has generally met or exceeded targets, though there have been spares shortages with some fleets particularly when the vehicle is used for a different purpose than intended. The availability and serviceability of helicopters has exceeded MOD targets, although prioritisation of spare parts for operations has led to reduced availability in the UK. There are also shortages of equipment for Service personnel in the UK to train with, prior to deployment overseas. Accommodation, medical and welfare services to Service personnel on operations are generally satisfactory although provision at the smaller patrol bases is more basic. The helicopter borne Medical Emergency Response Teams provide quick, life-saving medical support to casualties and evacuate them speedily to hospital.

Warsaw Pact Ground Forces Gordon L.

Rottman, 2012-09-20 While much has been published on the armed forces of the USSR during the 1980s, surprisingly little is available on the forces supplied by the other member nations of the Warsaw Pact. Rivalling the size of the United States Army, the combined ground forces of the six non-Soviet Warsaw Pact countries totalled over 775,000 active troops, with almost two million ground forces reserves. This book examines the history, organization and uniforms of the often overlooked DDR, Czechoslovak, Polish, Bulgarian, Hungarian and Romanian forces at the end of the Cold War.

War in European History Michael

Howard, 2009-02-26 First published over thirty years ago, *War in European History* is a brilliantly written survey of the changing ways that war has been waged in Europe, from the Norse invasions to the present day. Far more than a simple military history, the book serves as a succinct and enlightening overview of the development of European society as a whole over the last millennium. From the Norsemen and the world of the medieval knights, through to the industrialized mass warfare of the twentieth century, Michael Howard illuminates the way in which warfare has shaped the history of the Continent, its effect on social and political institutions, and the ways in which technological and social change have in turn shaped the way in which wars are fought. This new edition includes a fully updated further reading and a new final chapter bringing the story into the twenty-first century, including the invasion of Iraq and the so-called 'War against Terror'.

Modern Israeli Tanks and Infantry Carriers

1985–2004 Marsh Gelbart, 2012-05-20 Over the last two decades, the Israel Defence Force (IDF) has introduced a variety of new AFVs. Old models such as the M48 and M60 have been improved beyond recognition, in the form of the Magach 7. The performance of Israel's indigenous Merkava tank has been similarly enhanced with new variants and the new Merkava 4 MBT has recently entered service. Israeli infantry have also received machines such as the Achzarit assault carrier, the Puma combat engineer vehicle and the Nagmachon and

Nakpadon (tank-based carriers intended for low intensity conflicts). This book examines the design, modification and combat history of these formidable fighting machines.

Orthodox Churches and Politics in Southeastern Europe Sabrina P. Ramet, 2019-09-18 Orthodox Churches, like most religious bodies, are inherently political: they seek to defend their core values and must engage in politics to do so, whether by promoting certain legislation or seeking to block other legislation. This volume examines the politics of Orthodox Churches in Southeastern Europe, emphasizing three key modes of resistance to the influence of (Western) liberal values: Nationalism (presenting themselves as protectors of the national being), Conservatism (defending traditional values such as the "traditional family"), and Intolerance (of both non-Orthodox faiths and sexual minorities). The chapters in this volume present case studies of all the Orthodox Churches of the region.

Operations Forces is the ultimate guide to the secretive world of modern special operations forces. Entries also detail units ranging from the New Zealand SAS Group to the Polish GROM, and key individuals from Iraq counter-terrorism strategist General Stanley McChrystal to Victoria Cross recipient SASR Corporal Mark Donaldson. Answering questions such as how much the latest four-tube night vision goggles worn by the SEALs in Zero Dark Thirty cost, which pistol is most widely employed by special operators around the world and why, and if SOF still use HALO jumps, this book is the definitive single-source guide to the world's elite special forces.
