📖 **RANDOM FINITE SETS FOR ROBOT MAPPING & SLAM** JOHN STEPHEN MULLANE,BA-NGU VO,MARTIN DAVID ADAMS,BA-TUONG VO,2011-05-19 The monograph written by John Mullane, Ba-Ngu Vo, Martin Adams and Ba-Tuong Vo is devoted to the field of autonomous robot systems, which have been receiving a great deal of attention by the research community in the latest few years. The contents are focused on the problem of representing the environment and its uncertainty in terms of feature based maps. Random finite sets are adopted as the fundamental tool to represent a map, and a general framework is proposed for feature management, data association and state estimation. The approaches are tested in a number of experiments on both ground based and marine based facilities.

📖 **ROBOTIC NAVIGATION AND MAPPING WITH RADAR** MARTIN ADAMS,Ebi Jose,2012 Focusing on autonomous robotic applications, this cutting-edge resource offer you a practical treatment of short-range radar processing for reliable object detection at the ground level. This unique book demonstrates probabilistic radar models and detection algorithms specifically for robotic land vehicles. It examines grid based robotic mapping with radar based on measurement likelihood estimation. You find detailed coverage of simultaneous localization and map building (SLAM) - an area referred to as the Holy Grail of autonomous robotic research. The book derives an extended Kalman filter SLAM algorithm which exploits the penetrating ability of radar. This algorithm allows for the observation of visually occluded objects, as well as the usual directly observed objects, which contributes to a robot’s position and the map state update. Moreover, you discover how the Random Finite Set (RFS) provides a more appropriate approach for representing radar based maps than conventional frameworks.

📖 **CHANGING PERSPECTIVES ON THE SOCIAL SCIENCES IN GHANA** SAMUEL AGYEI-MENSAH,JOSEPH ATSU AYEE,ABENA D. 📖 **ARMING THE FLEET: PROVIDING OUR WARFIGHTERS THE DECISIVE ADVANTAGE** WALLACE T. MARTIN,2013-10-01 Tells a compelling story of the secret weapons city of China Lake, California, a secluded Navy base in the middle of the vast Mojave Desert that has been quietly delivering weapons that work since 1943. The book also provides an inside look at Point Mugu, California, a DoD (Department of Defense) premiere electronic warfare site and home of the world’s largest instrumented over-water range where most Navy targets are tested. Combined, these two internationally recognized historic sites comprise the Naval Air Warfare Center Weapons Division (also known as NAWCWD, the Division or WD), an organization with a strong legacy in direct warfighter support. Arming the Fleet: 1943-2011, Providing Our Warfighters the Decisive Advantage (Third Edition) describes WD’s significant influence on more than 25 major weapons systems. China Lake developed 75% of the air-launched weapons used during Vietnam and jointly developed 80% of those used during Iraqi Freedom and the Center continues to arm the fleet into the future. In addition, the Division has been awarded 1,600+ patents, and the book documents 50+ world “firsts” including nonnuclear work on the first atomic bomb, Sidewinder missile, plastic bonded explosives, biofuels, light sticks, air-bag sensors, stop action video as well as developing early technology that directly evolved into today’s GPS, digital computer searches, and MRI. Arming the Fleet (ATF) describes the Division’s role and quick response achievements in every major U.S. crisis from WWII to Iraqi Freedom - from Iwo Jima and Midway to Fallujah and Baghdad. ATF documents the Division as a world leader in guided missiles, advanced weapons and systems, and complex software integration on tactical aircraft, energetic materials and subsystems. In addition, the Division is conducting RDT&E (Research Development Test & Evaluation) on 25+ varied unmanned aerial systems (UAV) which is a top-four strategic thrust area. ATF tells the story about how many of today’s major weapons “in the news” got their start including Trident, Tomahawk, HARM, Standard Missile, and Sidewinder. Remarkably, most of the major technologies ever developed are still in fleet use today in one version or another. Arming the Fleet III includes 208 pages, 216 photos/graphics, and 1,000+ indexed items. Anyone wanting to learn more about major milestones in U.S. naval weaponry and technology “then and now” will find this book of great interest - not just “history” as this Third Edition is updated through 2011. The legacy continues...

📖 **THE END OF MEANING** MATTHEW GUMPERT,2012-04-25 The specter of the apocalypse has always been a semiotic fantasy: only at the end of all things will their true meaning be revealed. Our long romance with catastrophe is inseparable from the Western hermeneutical tradition: our search for an elusive truth, one that can only be uncovered through the interminable work of interpretation. Catastrophe terrifies and tantalizes to the extent it promises an end to this task. 9/11 is this book’s beginning, but not its end. Here, it seemed, was the apocalypse America had long been waiting for; until it became just another event. And, indeed, the real lesson of 9/11 may be that catastrophe is the purest form of the event. From the poetry of classical Greece to the popular culture of contemporary America, The End of Meaning seeks to demonstrate that catastrophe, precisely as the notion of the sui generis, has always been generic. This is not a book on the great catastrophes of the West; it offers no canon of catastrophe, no history of the catastrophic. The End of Meaning asks, instead, what if meaning itself is a catastrophe?

(U.S.),2013-10-01 Arming the Fleet (ATF) HIGHLIGHTS includes very current and basic information on the Naval Air Warfare Center Weapons Division (NAWCWD) and is 159 pages in ePub file format (76 pages in print) versus the larger comprehensive book which contains 402 pages in ePub file format (208 pages in print) and covers historical accomplishments from 1943 to today. 📖 **SUSTAINABLE LAND MANAGEMENT (SLM) IN PRACTICE IN THE KAGERA BASIN** Food and Agriculture Organization of the United Nations,2018-05-24 This book compiles a set of 26 papers that present the direct, practical experiences and results of a large number of local practitioners and experts that supported the Transboundary Agro-ecosystem Management Project of the Kagera River Basin (Kagera TAMP) during the period 2010-2015. The book has been compiled by the Land and Water Division of the Food and Agriculture Organization of the United Nations (FAO) to reflect the wide range of experiences, approaches and tools that were used for promoting participatory diagnostics, adaptive management and adoption of sustainable land and agro-ecosystem management (SLAM) practices from farm to watershed / landscape scale. The project was supported by the Global Environment Facility (GEF), the Governments of the four countries that share the Transboundary Basin - Burundi, Rwanda, the United Republic of Tanzania and Uganda and project partners. It is hoped that the lessons learned are considered and taken up by the governments and the Terrafrica Partnership for scaling up and mainstreaming SLAM as part of the wider set of lessons learned from the 36 projects in 26 countries under the Terrafrica Strategic Investment Programme, including Kagera TAMP.
