Marine Navigation and Safety of Sea Transportation Adam Weintrit,Tomasz Neumann,2013-06-04 The TransNav 2013 Symposium held at the Gdynia Maritime University, Poland in June 2013 has brought together a wide range of participants from all over the world. The program has offered a variety of contributions, allowing to look at many aspects of the navigational safety from various different points of view. Topics presented and discussed at the Symposium were: navigation, safety at sea, sea transportation, education of navigators and simulator-based training, sea traffic engineering, ship's manoeuvrability, integrated systems, electronic charts systems, satellite, radio-navigation and anti-collision systems and many others. This book is part of a series of four volumes and provides an overview of Education and Training, Human Resources and Crew Resource Management, Policy and Economics and is addressed to scientists and professionals involved in research and development of navigation, safety of navigation and sea transportation.

The Complete Yachtmaster Tom Cunliffe,2017-09-07 The Complete Yachtmaster has been a bestseller since first publication and has established itself as the standard reference for Yachtmaster students as well as skippers of all levels of experience. In this fully revised and up-to-date 9th edition, Tom Cunliffe brings together all the essentials of modern cruising in one volume. He presents an analysis of a good skipper, the theory and practice of sailing and sail trim, the art of seamanship, accurate navigation including chart plotters and PCs, understanding meteorology, heavy weather preparation, understanding yacht stability and coping with emergencies. The Complete Yachtmaster builds knowledge as it builds sailing confidence, guiding examination candidates as authoritatively and reassuringly through the RYA syllabus as a sea pilot bringing a ship safely to harbour. Required reading for all skippers and budding skippers, both on board or in the classroom. 'A gem, distilled from decades of experience' Yachting Monthly 'Cunliffe's competence and authority radiate from the pages... thoroughly recommended' Little Ship Club 'There are all too few authors who not only know their subject but can write well about it. Tom Cunliffe is one' Cruising

Elsevier's Dictionary of Technical Abbreviations S. Bobryakov,M. Rosenberg,2005-03-23 The English-Russian dictionary of technical abbreviations contains nearly 65,000 entries covering various fields and subfields of engineering and technology. Abbreviations are widely used in technical literature and, as a rule, they create difficulties for the reader. Numerous abbreviations are used in technical literature dealing with space, agriculture, electronics, computer science, chemistry, thermodynamics, nuclear engineering, refrigeration, cryogenics, machinery, aviation, business, accounting, optics, radio electronics, and military fields, including abbreviations used on a wide scale by the Navy, Airforce and the Army. In many instances the same abbreviation is used in most different fields of engineering and technology though depicting different notions. There are cases when the same abbreviation may have dozen of meanings, depending on the specific field of engineering. The entries are arranged in alphabetical order. A wide range of literature has been explored for the selection and translation of the abbreviations. The dictionary has been compiled by comparing parallel texts in both languages, and by consultation with experts. This publication will be invaluable to the personnel of designing bureaus and research institutions, and also to translators, scientists, researchers, designers and university personnel dealing with various fields of engineering and technology. approx. 125,000 terms

East Anglian Shores David Fairhall,2013-09-26 From Leigh to Lynn – the Thames to the Wash – the coastlines of East Anglia are the most diverse in Great Britain. Norfolk, Suffolk and Essex are communities shaped by their close relationship with the sea and seafaring, from Viking raiders to modern container ships, and hard-working trawlers to elegant racing yachts. In this book, long-time resident David Fairhall explores a landscape that has inspired some of the greatest English painters. He follows gentle rivers that reach far inland from a coastline of marsh, sand and shingle, through fenland and farmland, to rural villages where the past is always present. Rediscovering the East Anglian coastline everyone knows, and uncovering the East Anglian shores only the locals see, this book is written for newcomers and visitors interested in the waterside. It is a treasure trove of local history, endearing wildlife, fascinating architecture and friendly pubs. For anyone whose first impulse on arriving in an unfamiliar town on the coast is to head for the water, this book brings the landscape to life.
