Champulons: Legions of Doom James R. Girtmon,2010-05-18 The novel takes place in the nearby future, where the robotic era is coming in effect, a dream will predict the outcome of the war between two interstellar groups, the DEMAR's and the Starrgons. Also further into the story the father of the Starrgons will appear to bring forth a new nemesis the XyRobatrons, this threat will bring the universe to its knees, but the only ones to stop this is a prophecy foretold of the Guardiacs returning to save us all.

A Survey on 3D Cameras: Metrological Comparison of Time-of-Flight, Structured-Light and Active Stereoscopy Technologies Silvio Giancola,Matteo Valenti,Remo Sala,2018-06-19 This book is a valuable resource to deeply understand the technology used in 3D cameras. In this book, the authors summarize and compare the specifications of the main 3D cameras available in the mass market. The authors present a deep metrological analysis of the main camera based on the three main technologies: Time-of-Flight, Structured-Light and Active Stereoscopy, and provide qualitative results for any user to understand the underlying technology within 3D camera, as well as practical guidance on how to get the most of them for a given application.

What Would It Take to Make an Energy Blade? Roberta Baxter,2020 In science fiction, energy blades are weapons or tools that look like glowing swords. How could one of these powerful devices work? Scientists have some ideas, which include using plasma. Discover the science and technology behind what it would take to make a real-life energy blade!

Blade Gunner Austin Dragon,2017-03-31 The Cyberpunk Detective Thriller Blade Gunner Keeps You on the Edge of Your Seat! Liquid Cool is the action-packed (and funny), debut cyberpunk detective series. Who is Blade Gunner? In the next installment of the sci-fi/cyberpunk detective series, author Austin Dragon shows you when two forces of evil want to kill each other—get the hell out of the way! The Liquid Cool Series is the sci-fi classic, Blade Runner meets the Old Hollywood classic, Maltese Falcon. There is plenty of gritty action, suspense, thrills, and even a few laughs. It’s the cyberpunk novel reimaged—an ever-rainy world of colossal skyscrapers, hover-cars, flashy neon streets, and futuristic mechanization. Metropolis isn’t a bad place, but it isn’t a good one either. Uber-governments and mega-corporations fight for control of the fifty-million-plus super-city, but so does crime. Sinister secret megacorporations. Savage Cyborg cults. And the Blade Gunner. How does Cruz, our private eye (and unlikely hero), solve this case—let alone survive? Off-worlders will do anything to stop the unknown man called Blade Gunner—even to blow up a supercity from space! The seedy spousal surveillance case doesn’t look so bad after all, but it’s too late to go back. You haven’t read a cyberpunk novel like this. Welcome to the high-tech, low-life world of Liquid Cool.

New Directions in Guided Wave and Coherent Optics D.B. Ostrowsky,E. Spitz,2013-11-27 As optical fiber communication systems have moved out of the laboratory and into commercial use over the past several years, the general field of guided wave and coherent optics has undergone a radical transformation. Research in optical communication has turned heavily towards single-mode technology and, totally new phenomena and applications of the existing technology, outside the communication field, have begun to proliferate. It was for this reason that we decided to organize a NATO Advanced Study Institute assembling the leading workers in this new domain, in order to define the state of the art, and, develop an idea of the new directions the field might take. The lectures and seminars presented at this Advanced Study Institute form the basis for this book. The subjects treated can be roughly grouped as : - New phenomena in optical fibers such as non-linear effects, soliton propagation and polarization conservation. - New applications of fibers, to measurements of rotation pressure, temperature etc ... and medical uses. - Advanced and exploratory work on single-mode fiber communication systems including the use of coherent transmission schemes and optical amplification. - Recent developments of optical information treatment based on four-wave mixing. - Integrated optical devices and technologies including bistable devices, parametric oscillators, and optical logic. In addition to these major topics, a number of national reviews and specialized seminars treating new guided wave structures and materials are included. The co-editors admit being rather pleased with the result.

Applied Computational Intelligence in Engineering and Information Technology Radu-Emil Precup,Szilveszter Kovács,Stefan Preitl,Emil M. Petriu,2012-03-22 This book highlights the potential of getting benefits from various applications of computational intelligence techniques. The present book is structured such that to include a set of selected and extended papers from the 6th IEEE International Symposium on Applied Computational Intelligence and Informatics SACI 2011, held in Timisoara, Romania, from 19 to 21 May 2011. After a serious paper review performed by the Technical Program Committee only 116 submissions were accepted, leading to a paper acceptance ratio of 65 %. A further refinement was made after the symposium, based also on the assessment of the presentation quality. Concluding, this book includes the extended and revised versions of the very best papers of SACI 2011 and few invited papers authored by prominent specialists. The readers will benefit from gaining knowledge of the computational intelligence and on what problems can be solved in several areas; they will learn what kind of approaches is advised to use in order to solve these problems. A very important benefit for the readers is an understanding of what the major difficulties are and the cost-effective solutions to deal with them. This book will offer a convenient entry for researchers and engineers who intend to work in the important fields of computational intelligence.

When You Sing It Now, Just Like New Robin Ridington,Jillian Ridington,2021-12-10 When You Sing It Now, Just Like New is a collection of essays about stories: about hearing, sharing, and recording them, and sometimes even becoming characters in them. These essays, which contextualize stories within anthropology, flow from Robin Ridington and Jillian Ridington's decades of work with the Athapaskan-speaking Dane-zaa people, who live in Canada's Peace River area. The essays in part 1 feature the Ridingtons' audio work as well as Jillian's reflections on her relationships with Dane-zaa women. The authors use a narrative style to lead the reader to an understanding of First Nations' oral and written traditions. The essays in parts 2 and 3 are more scholarly and comparative and draw on ethnographic experience. They speak to one or more theoretical issues and discuss First Nations traditions beyond the Dane-zaa, but always from within the context of shared ethnographic authority. Students of anthropology, folklore, and Native studies can hear samples of audio compositions from the Dane-zaa archive by downloading audio files from the University of Nebraska Press Web site.
