Latitude Zero Diana Renn,2014-07-03 When a bicycle racing champion dies suddenly, a teen sleuth travels to Ecuador to solve the mystery. “I have to run,” said Juan Carlos. “You will call? Please? It is very important.” “Yes. I will call. Definitely. At two.” That’s what Tessa promises. But by two o’clock, young Ecuadorian cycling superstar Juan Carlos is dead, and Tessa, one of the last people ever to speak to him, is left with nothing but questions. The media deems Juan Carlos’s death a tragic accident at a charity bike ride, but Tessa, an aspiring investigative journalist herself, knows that something more is going on. While she grapples with her own grief and guilt, she is being stalked by spies with an insidious connection to the dead cycling champion. Tessa’s pursuit of an explanation for Juan Carlos’s untimely death leads her from the quiet New England backwoods to bustling bike shops and ultimately to Ecuador itself, Juan Carlos’s homeland. As the ride grows bumpy, Tessa no longer knows who’s a suspect and who is an ally. The only thing she knows for sure is that she must uncover the truth of why Juan Carlos has died and race to find the real villain—before the trail goes cold.

Latitude Zero Windsor Chorlton,1998 A group of mismatched adults sets out on an ecological survey. Their airship is brought down, marooning them on an offshore island near Sumatra. The group splits into two with the ecowarriors on one side and those who would survive by any means on the other. Internecine war and the predations of a rogue tiger whittle their number down until only two remain alive. Only one will escape to tell the tale ...

Latitude Zero Gianni Guadalupi,Antony Shugaar,2002 The Equator has no tangible existence beyond maps, but yet it lives, a hugely significant symbol in the minds and hearts of navigators, travellers, poets, madmen and dreamers of all eras. It is the world's girdle, its 24,000 miles or 38,640 kilometres passing through the Ecuadorian Andes and the mist-shrouded Ruwenzori Mountains, running along the courses of both the Amazon and the Congo rivers, and cutting through Africa's vast Lake Victoria, and the coral atolls and volcanic hulk of Krakatoa, in the Indian Ocean. The eminent Italian historian Gianni Guadalupi, and writer Antony Shugaar, have put together this inspirational collection of amazing equatorial adventures. Many have responded to the challenge of the Line, setting out to discover the mysterious source of the Nile, the perils of the Doldrums ('the living death in life' Coleridge called it') or the powerful force of El Niño, the quest for a lost Eden and for El Dorado. Others have sought a new life, like Elisa the 'nude Baroness' of the Galapagos, or Robert Louis Stevenson, for whom the fearsome King Tembinok built at Latitude Zero in the Gilbert Islands, an enclave named Equator City. So many grand expeditions and projects, so many great explorers and eccentrics, make this anthology a joyous voyage of discovery.

Latitude Zero Gianni Guadalupi,2001-11-15 It extends 24,000 miles, farther and longer than any other measure on earth. Yet the equator is a wholly imaginary construct, a human idea that has fascinated and challenged explorers for three thousand years—from the ancient Egyptian spice traders in search of the legendary land of Punt, to the fifteenth-century Portuguese who sought a route to the Indies, to the expeditions of Victorian naturalist Charles Darwin in the Galapagos Islands, off the Pacific coast of South America, at latitude zero. The equator—its location not only on the globe but also in the minds and exploits of navigators, travelers, poets, and dreamers since the dawn of civilization—is the magical thread on which the eminent Italian historian Gianni Guadalupi strings some of humankind's most intriguing lore and most amazing adventures in this original and riveting intellectual history. The mysterious source of the Nile and the enigma of the Congo's swell, the perils of the Doldrums (the living death in life in Coleridge's phrase) and the vicissitudes of El Nino, the quest for the lost Eden and the search for Eldorado, all fall within the compass of Guadalupi's extraordinary volume. So do the names of Columbus, Magellan, Don Lope de Aguirre, Sinbad the Sailor, Henry Stanley, Charles-Marie de la Condamine, and Dante Alighieri, who placed Purgatory on an island athwart the equator.

Latitude Zero Monique Stauder,Paul Theroux,2010 The purpose of Latitude Zerowas to be visually playful and uninhibited as possible, to simply be authentic and document life with a capital L.

Latitude Zero Gianni Guadalupi,Antony Shugaar,2002-11-26 Now in paperback, an illustrated history of the wholly imaginary place on the globe: the equator, an entirely human construct that has fascinated and challenged explorers for 3,000 years. The equator—its location not only on the globe but also in the minds and exploits of navigators, travelers, poets, and dreamers since the dawn of civilization—is the magical thread on which the eminent Italian historian Gianni Guadalupi strings some of humankind’s most intriguing lore and most amazing adventures in this original and riveting intellectual history. The mysterious source of the Nile and the enigma of the Congo’s swell, the perils of the Doldrums, and the vicissitudes of El Nino, the quest for the lost Eden and the search for El Dorado, all fall within the compass of Guadalupi’s extraordinary volume. So do the names of Columbus, Magellan, Don Lope de Aguirre, Sinbad the Sailor, Henry Stanley, Charles-Marie de la Condamine, and Dante Alighieri, who placed Purgatory on an island athwart the equator. “A series of historical vignettes ... for the armchair traveler: history rendered as a libretto to the planet’s grand opera.”—Kirkus Reviews “These engagingly written stories are perfect jumping-off points for armchair adventurers or perhaps journey enough for commuting conquistadors.”—Booklist “Filled with stories that are well written and captivating”—Library Journal

Conquering the Impossible Mike Horn,2014-09-02 In August 2002, Mike Horn set out on a mission that bordered on the impossible: to travel 12,000 miles around the globe at the Arctic Circle - alone, against all prevailing winds and currents, and without motorized transportation. Conquering the Impossible is the gripping account of Horn's grueling 27-month expedition by sail and by foot through extreme Arctic conditions that nearly cost him his life on numerous occasions. Enduring temperatures that ranged to as low as -95 degrees Fahrenheit, Horn battled hazards including shifting and unstable ice that gave way and plunged him into frigid waters, encounters with polar bears so close that he felt their breath on his face, severe frostbite in his fingers, and a fire that destroyed all of his equipment and nearly burned him alive. Complementing the sheer adrenaline of Horn's narrative are the isolated but touching human encounters the adventurer has with the hardy individuals who inhabit one of the remotest corners of the earth. From an Inuit who teaches him how to build an igloo to an elderly Russian left behind when the Soviets evacuated his remote Arctic town, Horn finds camaraderie, kindness, and assistance to help him survive the most unforgiving conditions. This awe-inspiring account is a page-turner and an Arctic survival tale in one. Most of all, it's a testament to one man's unrelenting desire to push the boundaries of human endurance.

Code Zero Jonathan Maberry,2014-03-25 For years the Department of Military Sciences has fought to stop terrorists from using radical bioweapons—designer plagues, weaponized pathogens, genetically modified viruses, and even the zombie plague that first brought Ledger into the DMS. These terrible weapons have been locked away in the world's most secure facility. Until now. Joe Ledger and Echo Team are scrambled when a highly elite team of killers breaks the unbreakable security and steals the world's most dangerous weapons. Within days there are outbreaks of mass slaughter and murderous insanity across the American heartland. Can Joe Ledger stop a brilliant and devious

master criminal from turning the Land of the Free into a land of the dead? Code Zero, a Joe Ledger novel from Jonathan Maberry, is the exciting direct sequel to Patient Zero.

Longitude Dava Sobel,2010-07-05 The dramatic human story of an epic scientific quest and of one man's forty-year obsession to find a solution to the thorniest scientific dilemma of the day--the longitude problem. Anyone alive in the eighteenth century would have known that the longitude problem was the thorniest scientific dilemma of the day-and had been for centuries. Lacking the ability to measure their longitude, sailors throughout the great ages of exploration had been literally lost at sea as soon as they lost sight of land. Thousands of lives and the increasing fortunes of nations hung on a resolution. One man, John Harrison, in complete opposition to the scientific community, dared to imagine a mechanical solution-a clock that would keep precise time at sea, something no clock had ever been able to do on land. Longitude is the dramatic human story of an epic scientific quest and of Harrison's forty-year obsession with building his perfect timekeeper, known today as the chronometer. Full of heroism and chicanery, it is also a fascinating brief history of astronomy, navigation, and clockmaking, and opens a new window on our world.

Tokyo Heist Diana Renn,2012-06-14 The perfect mystery for fans of Ally Carter's Heist Society When sixteen-year-old Violet agrees to spend the summer with her father, an up-and-coming artist in Seattle, she has no idea what she's walking into. Her father's newest clients, the Yamada family, are the victims of a high-profile art robbery: van Gogh sketches have been stolen from their home, and, until they can produce the corresponding painting, everyone's lives are in danger--including Violet's and her father's. Violet's search for the missing van Gogh takes her from the Seattle Art Museum, to the yakuza-infested streets of Tokyo, to a secluded inn in Kyoto. As the mystery thickens, Violet's not sure whom she can trust. But she knows one thing: she has to solve the mystery--before it's too late.

Blue Voyage Diana Renn,2015 Adrenaline junkie Zan finds herself in the crosshairs of an antiquities smuggling ring while on vacation with her mother. She must help them find the ancient treasure they seek in order to keep her family safe!--

Zero to One Peter Thiel,Blake Masters,2014-09-16 #1 NEW YORK TIMES BESTSELLER • “This book delivers completely new and refreshing ideas on how to create value in the world.”—Mark Zuckerberg, CEO of Meta “Peter Thiel has built multiple breakthrough companies, and Zero to One shows how.”—Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In Zero to One, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we’re too distracted by shiny mobile devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won’t make a search engine. Tomorrow’s champions will not win by competing ruthlessly in today’s marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.

Earth's Magnetosphere Wayne Keith,Walter Heikkila,2020-11-24 Earth's Magnetosphere: Formed by the Low Latitude Boundary Layer, Second Edition, provides a fully updated overview of both historical and current data related to the magnetosphere and how it is formed. With a focus on experimental data and space missions, the book goes in depth relating space physics to the Earth’s magnetosphere and its interaction with the solar wind. Starting with Newton’s law, this book also examines Maxwell’s equations and subsidiary equations such as continuity, constitutive relations and the Lorentz transformation, Helmholtz’ theorem, and Poynting’s theorem, among other methods for understanding this interaction. This new edition of Earth’s Magnetosphere is updated with information on such topics as 3D reconnection, space weather implications, recent missions such as MMS, ionosphere outflow and coupling, and the inner magnetosphere. With the addition of end-of-chapter problems as well, this book is an excellent foundational reference for geophysicists, space physicists, plasma physicists, and graduate students alike. Offers an historical perspective of early magnetospheric research, combined with progress up to the present Describes observations from various spacecraft in a variety of regions, with explanations and discussions of each Includes chapters on prompt particle acceleration to high energies, plasma transfer event, and the low latitude boundary layer

Dream of a Lifetime Mike Horn,2020-02-01 'Before long I was nothing but a block of petrified flesh in an upright position. The wind was blowing into my mask and my cheeks started to freeze. My nose and lips were cracked with scabs. My hands and arms, which were constantly raised to the sky to control my sail, no longer received any blood. My circulation had stopped functioning properly. As I made my way over the ice, a layer of fine powdery snow rose into the air, only to settle in my boots in an icy drizzle.' Explorer Mike Horn has had one dream since childhood: to cross Antarctica. Growing up in South Africa during the 1960s and 70s, he relocated to Switzerland almost 30 years ago. Today, he is a world-renowned adventurer, tour guide and coach, having made a name for himself as one of the world's leading explorers, traveling to some of the most isolated destinations on the planet. In December 2016, Mike finally made his childhood dream come true. He crossed the South Pole unassisted, journeying across this immense, white desert by kite-ski and sled alone. He was determined to follow an unexplored path, the longest and most challenging route imaginable: 5 100 kilometres straight ahead. In order to make it to the other side, he not only had to scale Dome Charlie – one of the highest summits on the Antarctic Ice Sheet – but also had to break all existing speed records to stave off being consumed by a terrible Antarctic winter. It would turn out to be a hellish race against death. His story is one of many shocking setbacks – but also of overcoming adversity through sheer willpower. A daredevil's first-hand account of realising a crazy dream, this book shows what is possible when one is fuelled by the love and support of family and friends.
