

Lavochkin La 11

Peter G Dancey

Lavochkin Fighters of the Second World War Jason Moore ,2017-03-13 The Lavochkin fighters remain little known in the West, although with the Yakovlev fighter series they were the backbone of the Red Air Force fighter force during the Second World War. The author rectifies that with this comprehensive history of these fighters. With this book he describes in great detail the three main variants of the Lavochkin fighter series during the Second World War: the only partially successful LaGG-3 inline-engined fighter, the successful radial-engined La-5 fighter, and the superb radial engined La-7 fighter, one of the best piston-engined fighter aircraft of the entire Second World War. Both the design and history of these fighters are featured, including how the mediocre inline engined LaGG-3 was turned into a top notch fighter by the replacement of the Klimov inline engine by the Shvetsov M-82 radial engine. Besides describing the wartime designs he includes a section on the postwar successors to the Second World War fighters, the completely new all metal La-9 and La-11, which saw extensive postwar service. Accurate color profiles illustrate all variants.

The Encyclopedia of the Korean War [3 volumes] Spencer C. Tucker, Paul G. Pierpaoli Jr., 2010-04-09 A multidimensional, multidisciplinary work on one of the least understood but most important conflicts in modern history. A cornerstone work in ABC-CLIO's distinguished list of reference works on military history, *The Encyclopedia of the Korean War: A Political, Social, and Military History* is a comprehensive resource on the confrontation that became the first shooting war of the Cold War, the first limited conflict of the Atomic Age, and the war that led to a dramatic escalation of the national security state while foreshadowing U.S. involvement in Vietnam. Encyclopedia

of the Korean War offers complete coverage of strategies, weapon systems, and clashes that marked the course of events on the battlefield. But this authoritative, multidisciplinary work expands beyond the military perspective to portray the overall culture of the era, addressing a variety of political, economic, social, and popular culture topics as well. Incorporating a wealth of recent research, the new edition adds more than 130 entries and updated coverage throughout, plus more bibliographic listings, an expanded historiographical essay, and a documents volume.

La-5/7 vs Fw 190 Dmitriy Khazanov, Aleksander Medved, 2011-09-20 Soviet fighter aviation suffered terribly at the hands of the Jagdwaffe in the first year of the war in the east and, with the arrival of JG 51 and its Fw 190s on the Stalingrad Front in September 1942, things only got worse. However, help was on its way in the form of the La-5. Tougher, faster, and with a greater rate of climb than its predecessors, most were flown by a new generation of better-trained pilots led by combat veterans. These new fighters soon found themselves pitted into action on the Central Sector against the equally new Fw 190As of JG 51. From then on, these two fighters would battle it out in the skies over the Eastern Front. This book tells the complete story of the battles between these two important fighters.

Lavochkin's Piston-Engined Fighters (Red Star Series) Yefim Gordon, 2003 The latest addition to the Red Star series addresses the formation and early years of OKB-301, the design bureau created by Semyon shortly before the outbreak of the Great Pacific War. This book describes in detail all the piston-engined fighters developed by OKB-301 starting with the LaGG-3, an aircraft that first saw service in the Winter War against Finland. The story

continues with the legendary La-5 and La-7 which rendered sterling service during the war. For Soviet airmen these aircraft were what the Spitfire was to the RAF and the P-51 Mustang was to the Americans. They were a match for the Messerschmitt Bf109 and the Focke Wulf Fw190, and several pilots were awarded the decoration Hero of the Soviet Union for their exploits in these aircraft. The concluding chapters deal with the last of the line, the La-9 and the La-11, which saw combat in China and Korea in the late 1940s and early 1950s. Illustrated with numerous rare and previously unpublished photos drawn from Russian military archives, the book's color content will delight the aviation modeler and anyone interested in Soviet aviation in the World War II era. The colorful nose art, which many aircraft sported, is recorded as are Lavochkin fighters in the liveries of allies of the Soviet Union and captured aircraft in the colors of the enemies of the Soviets.

Aces At War Eric Hammel, 2020-12-05 ACES AT WAR The American Aces Speak Eric Hammel Adding to the first three volumes of his acclaimed series, *The American Aces Speak*, leading combat historian Eric Hammel comes through with yet another engrossing collection of thirty-eight first-person accounts by American fighter aces serving in World War II, the Israeli War of Independence, the Korean War, and the Vietnam War As are the three earlier volumes, *Aces At War* is a highly charged excursion into life and death in the air, told by men who excelled at piston-engine and jet-engine aerial combat and lived to tell about it. It is an emotional rendering of what brave airmen felt and how they fought in the now-dim days of America's living national history. Ride with Flying Tigers ace Charlie Bond as he is shot down in flames over the Chinese city he alone has been able to defend against Japanese bombers. Share the loneliness of command as Lieutenant Commander Tom

Blackburn decides the fate of the fellow Navy pilot whose F4U Corsair malfunctions in a desperate battle over Rabaul. Feel 2d Lieutenant Deacon Priest's overwhelming sense of duty to a friend as he lands his P-51 Mustang behind German lines to rescue his downed squadron commander. Share Lieutenant Colonel Ed Heller's desperation as he fights his way out of his uncontrollable F-86 Sabre jet over the wrong side of the Yalu River. And join Major Jim Kasler as he leads what might be the most important air strike of the Vietnam War. These are America's eagles, and the stories they tell are their own, in their very own words.

Bombs Away Harry Turtledove, 2015-07-14 In his acclaimed novels of alternate history, Harry Turtledove has scrutinized the twisted soul of the twentieth century, from the forces that set World War I in motion to the rise of fascism in the decades that followed. Now, this masterly storyteller turns his eyes to the aftermath of World War II and asks: In an era of nuclear posturing, what if the Cold War had suddenly turned hot? *Bombs Away* begins with President Harry Truman in desperate consultation with General Douglas MacArthur, whose control of the ground war in Korea has slipped disastrously away. MacArthur recognizes a stark reality: The U.S. military has been cut to the bone after victory over the Nazis—while China and the USSR have built up their forces. The only way to stop the Communist surge into the Korean Peninsula and save thousands of American lives is through a nuclear attack. MacArthur advocates a strike on Chinese targets in Manchuria. In actual history, Truman rejected his general's advice; here, he does not. The miscalculation turns into a disaster when Truman fails to foresee Russia's reaction. Almost instantly, Stalin strikes U.S. allies in Europe and Great Britain. As the shock waves settle, the two superpowers are caught in a

horrifying face-off. Will they attack each other directly with nuclear weapons? What countries will be caught in between? The fateful global drama plays out through the experiences of ordinary people—from a British barmaid to a Ukrainian war veteran to a desperate American soldier alone behind enemy lines in Korea. For them, as well as Truman, Mao, and Stalin, the whole world has become a battleground. Strategic strikes lead to massive movements of ground troops. Cities are destroyed, economies ravaged. And on a planet under siege, the sounds and sights of nuclear bombs become a grim harbinger of a new reality: the struggle to survive man's greatest madness. Praise for Bombs Away "A fascinating and compelling story of real people caught in forces beyond their control . . . [Harry Turtledove is] the unrivaled monarch of alternate history."—Analog "Turtledove is an undisputed centerpiece of the alternate-history genre, and now, to his already grand display, he's adding the ambitious tale of a WWII that could have happened."—Booklist "This is Turtledove at his best."—SFRevu "Alternate-world warrior extraordinaire Turtledove delivers the opening barrage of a new speculative conflict."—Kirkus Reviews

Korean War - Chinese Invasion Gerry van Tonder, 2020-04-30 In his first four volumes on the Korean War, the author traces the war's progress from the North Korean invasion of June 1950, the desperate American defence of the Pusan Perimeter, General Douglas MacArthur's daring and highly successful amphibious offensive at Inchon, and his subsequent advance across the 38th Parallel to the Yalu River on the Chinese Manchurian border Communist Chinese forces, that have been secretly infiltrating North Korean territory by slipping across the Yalu from mid-October 1950, ambush a South Korean regiment in the mountains of central North Korea. This is the first of

several Chinese victories over unsuspecting and overstretched South Korean and American units in the winter of 1950/1. On 27 November 1950, Chinese leader Mao Zedong, ostensibly fearful of the consequences of hostile American forces on his country's border along the Yalu River, orders 250,000 troops into Korea, with express orders to annihilate the UN forces. In the western half of the theatre, US General Walton H. Walker's Eighth Army front along the Ch'ngch'n axis is breached, while to the east, the US X Corps suffers a series of crushing defeats, including at the Chosin Reservoir, precipitating a massive evacuation from the North Korean port of Hungnam.

Soviet Aircraft Industry Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War, it has long inspired the fascination of analysts and enthusiasts in the West; until the collapse of the USSR in 1991, details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR, *Soviet Aircraft Industry* examines the unique characteristics of Soviet-designed aircraft—particularly military types, which were the cause of great concern to the West. Further, by virtue of the industry's central role throughout Soviet history, this book provides a rare and important perspective into the broader theme of Russia's great communist experiment.

Korean Air War Michael Napier, 2021-03-18 From acclaimed aviation historian Michael Napier, this is a highly illustrated survey of the air war over Korea. The Korean War holds a unique place in aviation history. It saw the

first large-scale jet-versus-jet combat and it was the first military action of the Cold War, fought by both the newly independent United States Air Force and the recently formed Chinese People's Liberation Army Air Force. In a meticulously researched volume, former RAF Tornado pilot Michael Napier unravels the complex narrative of events, describing the course of operations in the air and the major campaigns of the land war. He examines in detail the air power of the major combatants, which included North and South Korea, the UK, Australia, Canada and South Africa as well as China, the USA and the USSR. Packed with stunning contemporary images and including first-hand combat reports, Korean Air War is a groundbreaking exploration of a much forgotten conflict, which nevertheless provided lessons about the organization and prosecution of modern aerial warfare that remain relevant through to the present day.

Korea 1950-53 Michael Napier, 2023-09-28 A spectacularly illustrated new history and analysis of the strategic bombing campaign in the Korean War, which saw the last combat of America's legendary B-29s. Just five years after they defeated Japan, at the dawn of the jet age, the most advanced bomber of World War II was already obsolescent. But the legendary war-winning Superfortresses had one more war to fight, in the strategic air campaign against North Korea. The bombers' task was to destroy North Korea's facilities for waging war, from industry and hydroelectric dams to airfields and bridges. However, it was a challenging campaign, in which the strategy was not merely military but political. In this fascinating book, airpower scholar and former RAF pilot Michael Napier explains how the campaign was fought, and how the technique of 'bombing to negotiate' that would become notorious in Vietnam was already being used in Korea. He analyses in detail

the relationship between battlefield progress, armistice negotiations and the bombing strategy developed over the complex campaign. In the skies over Korea, the B-29s operated in a new world dominated by jet fighters and jet age technology, and tactics were developing rapidly. Packed with original illustrations, this book includes dramatic air scenes featuring B-29s, MiG-15s, AD Skyraiders and Skyknight jet nightfighters in action. It also includes maps, 3D recreations of missions and explanatory 3D diagrams to bring the conflict to life. This is a fascinating, dramatic account of the last battles of the piston-engined aircraft era as the superpowers vied for victory in the first clash of the Cold War.

Florida Warplanes Harold A. Skaarup, 2010-11-01 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of Florida. The aircraft include those fl own by members of the United States Air Force, the United States Navy, the United States Army, the United States Marine Corps, the United States Coast Guard, the Air and Army National Guard, and by various NATO and allied nations as well as a number previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 160 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers have been included, along with a list of aircraft held in each museums current inventory or on display as gate guardians throughout the State of Florida. The aircraft

presented in this edition are listed alphabetically by manufacturer, number and type. Although many of Floridas heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and some have even been restored to flying condition. This guide-book should help you to find and view Floridas Warplane survivors.

Military Aircraft, 1919-1945 Justin D. Murphy, Matthew A. McNiece, 2008-12-08
An in-depth history of the time when airpower became the great equalizer, changing military strategy forever and bringing once-safe targets in reach. *Military Aircraft, 1919-1945: An Illustrated History of Their Impact* covers a crucial era in modern warfare technology. Ranging from the development of airpower doctrines in the aftermath of World War I to the aircraft and missions that put those doctrines into action during World War II, it provides an expert summing-up of the decades when the use of aircraft in battle came of age. In chapters covering both the history of air power and specific types of aircraft (fighters, bombers, reconnaissance and auxiliary planes), *Military Aircraft, 1919-1945* introduces key theorists and designers, describes important changes in technology and production, and recreates spectacular episodes from Pearl Harbor to the London Blitz to the Enola Gay. Readers will see the dramatic impact of the first generation of modern military aircraft on land and sea. They will also see how the expansion of war to the skies brought economic opportunity to some home fronts, and looming terror and devastation to others.

In Cold War Skies Michael Napier, 2020-08-20 Throughout the second half of the 20th century, international relations across the globe were dominated by

the Cold War. From 1949 until the fall of the Berlin Wall in 1989, US and Soviet strategic forces were deployed across the Arctic Ocean in North America and Northern Russia, while the best-equipped armed forces that the world had ever seen faced each other directly across the 'Iron Curtain' in Europe. In *Cold War Skies* examines the air power of the major powers both at a strategic and at a tactical level throughout the 40 years of the Cold War. In this fascinating book, acclaimed historian Michael Napier looks at each decade of the war in turn, examining the deployment of strategic offensive and defensive forces in North America and Northern Russia as well as the situation in Europe. He details the strategic forces and land-based tactical aircraft used by the air forces of the USA, USSR, NATO, Warsaw Pact countries and the European non-aligned nations. He also describes the aircraft types in the context of the units that operated them and the roles in which they were used. The text is supported by a wide range of first-hand accounts of operational flying during the Cold War, as well as numerous high-quality images.

U.S. Navy, U.S. Marine Corps and MATS Aircraft Lost During the Korean War: 2017 Edition Douglas E. Campbell,2016-10-19 The Korean War was the first war in which jet aircraft played a central role. For the initial months of the war, the F9F Panther and other jets dominated North Korea's prop-driven air force and later held their own against the MiGs. Within these pages are listed more than 1,140 U.S. Navy, U.S. Marine Corps and Military Air Transport Service (MATS) aircraft lost during the Korean War. These aircraft were spread across 19 different ships, 126 different squadrons, by 12 aircraft manufacturers building nearly 60 different types and variants to fly into war. The information on dates lost, aircraft type and manufacturer, Bureau Numbers, ship or base assigned, squadron attached, and fate of the pilot and crew, are here. In this 2017 Edition, an alphabetized index of nearly 1,300 names of pilots and crewmembers listed in the book has been added.
