Moa Quinn Berentson,2012-01-01 The moa were the most unusual and unique family of birds that ever lived, a clan of feathered monsters that developed in isolation for many, many millions of years. They became extinct reasonably quickly after the arrival of the Maori, and were a distant memory by the time European explorers arrived. So the discovery and identification of their bones in the 1840s was a worldwide sensation, claimed by many to be the zoological find of the century. This book begins by recounting the story of discovery, which was characterised by an unbelievable amount of controversy and intrigue. Since then there has been an unbroken chain of new discoveries, culminating with intriguing revelations in recent years about the moa's biology, that have come to light through DNA testing and radio-dating. This is a fascinating and important book that richly recounts the life and death of our strangest bird. Packed with a fantastic range of illustrations, Moa fills an important gap in our natural history literature, a popular but serious book on this national icon.

The Race to Save the Lord God Bird Phillip Hoose,2014-08-26 The tragedy of extinction is explained through the dramatic story of a legendary bird, the Ivory-billed Woodpecker, and of those who tried to possess it, paint it, shoot it, sell it, and, in a last-ditch effort, save it. A powerful saga that sweeps through two hundred years of history, it introduces artists like John James Audubon, bird collectors like William Brewster, and finally a new breed of scientist in Cornell's Arthur A. Doc Allen and his young ornithology student, James Tanner, whose quest to save the Ivory-bill culminates in one of the first great conservation showdowns in U.S. history, an early round in what is now a worldwide effort to save species. As hope for the Ivory-bill fades in the United States, the bird is last spotted in Cuba in 1987, and Cuban scientists join in the race to save it. All this, plus Mr. Hoose's wonderful story-telling skills, comes together to give us what David Allen Sibley, author of The Sibley Guide to Birds calls the most thorough and readable account to date of the personalities, fashions, economics, and politics that combined to bring about the demise of the Ivory-billed

Woodpecker. The Race to Save the Lord God Bird is the winner of the 2005 Boston Globe - Horn Book Award for Nonfiction and the 2005 Bank Street - Flora Stieglitz Award.

Birds: Myth, Lore and Legend Rachel Warren Chadd, Marianne Taylor, 2016-08-25 The stories, myths and legends associated with more than 80 kinds of birds from around the world. Why are owls regarded either as wise or as harbingers of doom? What gave rise to the fanciful belief that storks bring babies? Why is the eagle associated with victory or the hummingbird with paradise? The answers are here in this engaging book. By re-telling the many legends, beliefs, proverbs and predictions associated with more than 80 birds from many nations, it brings into focus the close - and often ancient - links between humans and these remarkable feathered descendants of dinosaurs. Discover, for instance: - Why the cockerel features on many church spires - The one sacred bird that symbolises life and peace in most cultures - How to dispel bad luck if you see a certain black-and-white bird - The South American 'devil bird' once thought to be a dragon Birds: Myth, Lore and Legend draws on historical accounts and scientific literature to reveal how colourful tales or superstitions were shaped by human imagination based on each bird's behaviour or appearance. It offers a fresh and enchanting perspective on birds across the world.

Fabulous Creatures, Mythical Monsters, and Animal Power Symbols Cassandra Eason, 2007-12-30 Eason provides an extensive overview of the mythology, legends, and folklore surrounding fabulous and strange fantasy creatures from different lands and ages, from Chinese dragons and the Native North American thunderbird to the demon hounds of Celtic and Norse legend. She describes how in various ages and cultures people have identified with the idealized qualities of wise creatures as a source of power and better understanding of their own personalities and used the behavior of birds and other sacred creatures to gain oracular information in Ancient Egypt and the Classical and Celtic worlds. This book offers both traditional and little known folklore and legend about familiar real life creatures such as the horse, the cat, and the raven and delves into the weird and wonderful world of saints who claimed to change into deer and modern cryptozoological monsters such as Bigfoot, Mothman, and lake and sea monsters, as well as the rationale behind animal or headed deities of the Aztecs, Egyptians, and Celts in whose name people went to war.

The Conjuror's Bird Martin Davies,2006-08-22 The Conjuror's Bird is a beautiful story in the spirit of Possession that is as exciting as The Club Dumas, inspired by one of the great puzzles of natural history: that of the Mysterious Bird of Ulieta. Seen only once, in 1774, by Captain Cook's second expedition to the South Seas, a single specimen was captured, preserved, and brought back to England. The bird was given to famed naturalist Joseph Banks, who displayed it proudly in his collection until its sudden, unexplained disappearance. Two hundred years later, naturalists continue to wonder if the world will ever get another glimpse of the elusive bird. Were it not for a colored drawing done by the ship's artist, there would be nothing to say that the bird had ever existed. The Conjuror's Bird is a gripping literary mystery and passionate love story that tackles the intrigue surrounding the celebrated Banks, his secret affair with an enigmatic woman known only as "Miss B," and the legendary bird that becomes a touchstone for their love. Seamlessly spanning two time periods, The Conjuror's Bird is at once the story of this romance and of a present-day conservationist named Fitz, who is drawn into a thrilling and near-impossible race to find the elusive bird's only known remains. Stalking the Ghost Bird Michael K. Steinberg,2008-03 Unseen for more than sixty years and thought to be extinct, interest in the Ivory-Billed Woodpecker exploded in 2004 when two birders reported capturing the bird on film while searching a bottomland forest in Arkansas. STAKING THE GHOST BIRD examines the lengthy debate over the ivory-bill's status by examining the reported sightings and extensive efforts to find the rare bird in Louisiana. In this absorbing study, author Steinberg turns his lifelong interest in the majestic ivory-billed woodpecker into a tale that encapsulates both the mystery and intrigue surrounding the legendary bird.

The Art and Archaeology of Human Engagements with Birds of Prey Robert J. Wallis,2023-10-05 Of all avian groups, birds of prey in particular have long been a prominent subject of fascination in many human societies. This book demonstrates that the art and materiality of human engagements with raptors has been significant through deep time and across the world, from earliest prehistory to Indigenous thinking in the present day. Drawing on a wide range of global case studies and a plurality of complementary perspectives, it explores the varied and fluid dynamics between humans and birds of prey as evidenced in this diverse art-historical and archaeological record. From their depictions as powerful beings in visual art and their important roles in Indigenous mythologies, to the significance of their body parts as active agents in religious rituals, the intentional deposition of their faunal remains and the display of their preserved bodies in museums, there is no doubt that birds of prey have been figures of great import for the shaping of human society and culture. However, several of the chapters in this volume are particularly concerned with looking beyond the culture-nature dichotomy and human-centred accounts to explore perspectival and other post-humanist thinking on human-raptor ontologies and epistemologies. The contributors recognize that human-raptor relationships are not driven exclusively by human intentionality, and that when these species meet they relate-to and become-with one another. This 'raptor-with-human'-focused approach allows for a productive re-framing of questions about human-raptor interstices, enables fresh thinking about established evidence and offers signposts for

present and future intra-actions with birds of prey.

Birds of Amber Ibrahim Abdel Meguid, 2005-04-01 During the 1956 Suez War or the Tripartite Aggression, as it is known in Egypt life in Alexandria goes on. The railroad workers and their families live in the low-income housing of el- Masakin, along the Mahmudiya Canal, but some of them take us on forays into the other, cosmopolitan Alexandria, whose European denizens, mainly Greeks, Italians, and Jews are departing in droves. This spellbinding novel teems with memorable characters, not a few of whom are themselves storytellers: a budding novelist writing about el-Masakin and its eccentric denizens and about his own improbable love affair with a 12-year-old girl; a spice merchant dreaming of the bygone glory of his ancestors and their trade along the spice road, beginning on the Malabar Coast; a train guard who is a teller of very tall tales; and a would-be filmmaker trying to make a film showing what happened in Port Said during the war. As in his earlier novel, *No One Sleeps in Alexandria*, Ibrahim Abdel Meguid here combines historical fact with fiction, and the mundane with the fantastical, to weave an engrossing, multilayered story of stories.

Birds and Cages Ida Tomshinsky, 2019-03-16 We are not afraid to say that we are fascinated by birds. Flying birds always provoke human admiration. There is this unexplained mysterious feeling that surrounds us when watching birds on the forest trees, in our backyard, at the ocean, sea, or lake. Birds are an infinite treasure of inspiration for humans, waking us up in the morning with beautiful birdsongs. Their little brain is of a size of an unshelled walnut and is associated with intelligent behavior and the same capabilities of humans and apes' mental tasks. When you think about all the animals in the world, you quickly realize that birds are, in fact, among some of the most intelligent creatures we have on earth. Although there are more than ten thousand bird species worldwide, only a handful of them have made the list for the extremely talented and incredibly intelligent. So who are these super intelligent feathered friends? It is difficult to pick one. Perhaps kea, ravens, and crows are equally smart; while macaws, cockatoo, and jays are on the top of any list too. Who knew that an African gray is capable of working out the location of hidden food by using the kind of deduction and elimination skills previously seen only in humans and apes? And as you probably have heard, they are exceptional talkers! Today, we all know that it is bad to imprison birds in cages, but it was not always the case throughout the history. According to Stephen King, "Some birds are not meant to be caged, that's all. Their feathers are too bright, their songs too sweet and wild." Due to beautiful poetry and cultural expressions, the flying bird became a symbol of freedom and independence. There are cases of historic acknowledgment of birdcages, especially in the Victorian era. People were listening to birdsongs in cages as it was their radio entertainment outlet. During wartimes, birds demonstrated their unique abilities in courageous heroic efforts to help humans in transferring information through the battlefields. The birds and birdcages both have a longtime history. Our love for the amazing earth creatures makes us stand out for their protection and safety to enjoy our shared inhabitants on the planet, and as for the birdcages, people find them pretty appealing in various ways of the aesthetic repurposing.
