Leica M Compendium Jonathan Eastland, 1994 The Leica M system has been with us since 1954. It rapidly became, and has remained the favorite instrument of photographers, especially photojournalists, who, like Henri Cartier-Bresson, seek to catch life in the act, to record the decisive moment. In this Leica M Compendium Jonathan Eastland describes the whole Leica M system from his experience as a professional photographer. He explains how to use, enjoy and get the best out of the cameras and lenses, regardless of age. The latest lenses can be used on the earliest cameras, and vice-versa, and the Visoflex, although no longer made, is now much easier to use with the M6 and its TTL metering. Advice on planning and shooting a story with the Leica and extensive tables of technical data complete this ideal companion for the practical Leica M photographer, as well as for the Leica collector and enthusiast.

Tokyo Camera Style John Sypal, 2015-02-10 Unique portraits of Japanese photography fanatics and their gear from the trendsetting Tokyo Camera Style blog Founded in 2008, John Sypal's blog, Tokyo Camera Style, has a devoted and passionate international following and has inspired a network of similar blogs worldwide. In street portraits taken on the fly, we see Tokyo's film-camera enthusiasts posing with their favorite photographic equipment. The images not only catalog the amazing range of cameras used by the most obsessive photography geeks but also offer a glimpse into a street culture where the photograph means everything and the camera takes center stage. Now, 300 of Sypal's colorful photographs of weird and wonderful cameras and their creative owners have been gathered together in a one-of-a-kind book. Often taken from above, with the camera owners' faces out of view, the images show telling details that might otherwise have been missed: the clothes, the jewelry, hands and feet, shoes and socks,

customized camera straps, and other photography-related paraphernalia. Beyond the wonderful selection of rare, customized, and vintage analog camera makes, models, and lenses are portraits of the individual personalities who make up the avid street photography scene in Japan.

Leica Lens Compendium Erwin Puts, 2003-11-24 8 1/2 x 10 Since publication this title has proved to be very popular for both the serious lens user wishing to understand more about his lenses, as well as the Leica enthusiast considering which lens would be suitable to add to his outfit. Do you know your Coma from your Aberrations? If Yes, then part 2 of Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.
