The Politics of the European Union Herman Lelieveldt,Sebastiaan Princen,2023-04-20 The European Union is a key player in determining policies and politics in Europe, and yet understanding how it works remains a challenge. The Politics of the European Union introduces students to its functioning by showing the similarities and differences between the EU and national political systems. Fully revised and updated in its third edition, this introductory textbook uses the tools of comparative politics to explore the history, theories, institutions, key actors, politics and policy-making of the EU. This comparative approach enables students to apply their knowledge of domestic politics and broader debates in political science to better understand the EU. Numerous real-world examples guide students through the textbook, and chapter briefings, fact files and controversy boxes highlight the important and controversial issues in EU politics. A companion website features free 'Navigating the EU' exercises to guide students in their analysis of EU policy-making.

Elements of Yacht Design Norman L. Skene,2023-09-08 This book is intended to be a practical and concise presentation of some of the operations involved in designing yachts of all types. Cumbersome and impractical methods which are so often found in more pretentious works on naval architecture have been avoided. Those presented have been in everyday use by the author. Thus wrote Norman L. Skene in the preface to the fifth edition of Elements of Yacht Design. Skene's is one of the most famous books on yacht design ever written. First published in 1904, Skene did several revisions, the last of which was published in 1938 and is reprinted here in its original form. In 1962, the book was completely revised by Francis S. Kinney and republished as Skene's Elements of Yacht Design. Kinney's last version was published in 1973 and it is long out of print. While the experts are divided on the relative merits of the different editions, it appears that there is strong demand for Skene's original work. At last the book is again available to the many boatbuilders, aspiring naval architects, and sailors who need it for frequent reference. The index has been completely revised and expanded to make it more useful for today's readers.

Dans le vent Bruno Robert,2010-04-08 Le cap des cent ans d'aventures du scoutisme marin est franchi en 2010. Cet anniversaire est l'occasion de découvrir l'odyssée souvent méconnue des scouts

marins. Combinant les richesses d'une formation de scout et de marin, cette pédagogie propose une réponse originale aux besoins de la jeunesse actuelle. D'un style très vivant, ce livre offre un tour d'horizon de l'histoire du scoutisme marin, de ses périodes de gloire et de ses heures sombres. L'auteur nous présente les personnalités qui ont marqué son développement et les événements majeurs de ces cent premières années. Cet ouvrage offre, en outre, le meilleur inventaire des connaissances nécessaires à tout scout marin qui se respecte. Bon vent aux jeunes acteurs de l'aventure qui la prolongeront et la développeront ! Bruno Robert, historien, est spécialiste du scoutisme.

What Is Dying?, 2003-11-06 The beauty of the words and the striking simplicity of its sentiment has made this one of the most inspired messages of comfort and hope for those who have suffered loss. This is the first publication as a book for a poem that has been recited at memorial services for over a century. What is Dying? is a moving meditation on death, with a reassuring power that speaks directly to those who have been recently bereaved, and millions of people have been comforted by its serenity and acceptance. The poem speaks movingly and directly with the voice of faith that sustains us during a time of grief. Ben Ecclestone's sensitive illustrations perfectly complement the words of Bishop Brent's poem.
