Over four decades it has undergone numerous upgrades and modifications to ensure it remains one of the most powerful tanks operating today. It currently serves with the armies of seventeen nations, from Canada to Turkey and many European states. The Leopard 2 is also a popular subject for modelers, which is why David Grummitt's highly illustrated expert guide is so valuable. As well as describing in detail the Leopard 2's design, development, and combat history, he gives a full account of the wide range of modeling kits and accessories available in all the popular scales. Included is a modeling gallery, which features six builds covering a range of Leopard 2s serving with different nations and a section of large-scale color profiles which provide both reference and inspiration for modelers and military enthusiasts alike.

*Tanks at the Iron Curtain 1975–90* Steven J. Zaloga,2023-10-26 A comprehensive, illustrated account of the new generation of advanced tanks to emerge during the last 15 years of the Cold War, showcasing major improvements in armor protection, gunsights, and fire-control systems. Focusing on the technology of the period, author Steven J. Zaloga explains how the demands of a potential Cold War battlefield spurred the development of the 20th century's most advanced tanks. He considers the final versions of the Soviet T-72, T-64, and T-80 and assesses their strengths and weaknesses. He also explores how the failure of the US-German MBT-70 project led to America's development of the M1 Abrams tank, and to Germany's all-new Leopard II. The British development of the Challenger tank is also considered, as is the lesser-known Leclerc tank developed by France, the smallest and lightest of any of the western designs. Featuring superbly detailed new illustrations and many photos, this volume pinpoints the key technology of the era,

including turbine engines, APFSDS ammunition, advanced armor and high-tech fire-control systems, and describes how the rival tanks compared in the final stretch of the Cold War arms race.

**"Ironsides"** Harold A. Skaarup, 2011-08-12 Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as

tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada's military contribution to safety and security in the world has evolved.

*Canadian Leopard 2A4M CAN.* ,2015

Leopard 2 Main Battle Tank 1979–98 Michael Jerchel,2012-11-20 In 1963 West Germany and the United States signed an agreement to develop the best tank in the world the MBT/KPz-70. Though by 1970 this project was stopped, West Germany used the components created for the MBT/KPz-70 to develop

a new main battle tank the Leopard 2. Since 1979, when the first Leopard 2 rolled off the production line, the Leopard 2 has undergone various modifications, and has been exported to various European countries. Enhanced by Osprey's signature colour plates and cutaway artwork, this book examines the development of the Leopard 2 from the first batch to its evolution into the improved Leopard 2 A5, detailing its features and variants.

The entry into the RC tank modelling Gerhard O.W. Fischer, The author Gerhard O. W. Fischer shows you not only, how to build tank models from construction kits, but also, how to convert tank models to a completely different type of tank, because there is no construction kit of the desired tank type. Furthermore, it presents some large models and very special tank models, all built by experts in this field of model building. The reader will find many suggestions and hints for building your own model and a lot of information about the large on the large originals. This book is ideally suited as a beginner into a new league of tank modeling. From the content: • The role models of our RC models • RC-tank-finished models of the company robbe: Leopard 2A6, Tiger and T 72 • RC tank ready-made models of the company Revell: Leopard 2A5 and M1A1 • RC kit models: M 26 Pershing and T34-85 • Bundeswehr truck with four-wheel drive • Tracked vehicle according to own design • Kit model conversions: Pionierpanzer 3 Kodiak, • Tank fast bridge 2, Flakpanzer Gepard, Bergepanzer 3 Büffel, Leopard 1A2 main battle tank and a recovery tank • From kit model to large-scale model: Leopard 1A4 and King Tiger • The special model: tank fast bridge PSB 2, transport tank BV 206, amphibious 6-wheel tank AMX 10 and transport tank Fuchs • Figures of tank crews • Manufacturer's notes and list of sources

RC tank model making Gerhard O. W. Fischer, RC tank models are particularly popular with many model makers, which is probably due to the technology and the completely different control method of these models. Tracked vehicle models are mostly all-metal models, but a combined construction of metal and plastic has also become popular, especially for kits. Now, it is not everyone's cup of tea to handle metal. Not every model maker has the knowledge, the manual skills and the technical equipment to build a tank model and to install the necessary electronics. For this group of interested people, the author describes the do-it-yourself construction of tank models with the help of kits. From the content: • armoured fighting vehicle IV • armoured fighting vehicle TIGER I • KÖNIGSTIGER armoured fighting vehicle • LEOPARD armoured combat vehicle • armoured fighting vehicle PANTHER A • and armoured fighting vehicle PANTHER G from Tamiya • Battle tank LEOPARD 2A5 from GRAUPNER • Transport tank FUCHS from AFV-model • Kits from Sonderfahrzeug-Modellbau Peter Müller: • Bergepanzer 3 BÜFFEL • Battle tank LEOPARD • anti-aircraft tank GEPARD • MARDER infantry fighting vehicle • and Airborne Tank WIESEL

International Tank Development From 1970 Alexander Ludeke, 2018-01-30 A great upheaval in tank construction took place in the 1970s, as new combat techniques, helicopters, weaponry and new types of ammunition reduced the value of a conventional combat battalion. Nevertheless, complete new developments are rare and in this book, Alexander Ldeke looks at the most important developments that have taken place since 1970.

**Germany at War [4 volumes]** David T. Zabecki, 2014-10-28 Written by experts for use by nonexperts,

this monumental work probes Germany's Genius for War and the unmistakable pattern of tactical and operational innovation and excellence evident throughout the nation's military history. Despite having the best military forces in the world, some of the most advanced weapons available, and unparalleled tactical proficiency, Germany still lost both World Wars. This landmark, four-volume encyclopedia explores how and why that happened, at the same time examining Germany as a military power from the start of the Thirty Years' War in 1618 to the present day. Coverage includes the Federal Republic of Germany, its predecessor states, and the kingdoms and principalities that combined to form Imperial Germany in 1871. The Seven Years' War is discussed, as are the Napoleonic Wars, the Wars of German Unification (including the Franco-Prussian War), World War I, World War II, and the Cold War. In all, more than 1,000 entries illuminate battles, organizations, leaders, armies, weapons, and other aspects of war and military life. The most comprehensive overview of German military history ever to appear in English, this work will enable students and others interested in military history to better understand the sociopolitical history of Germany, the complex role conflict has played in the nation throughout its history, and why Germany continues to be an important player on the European continent.

Challenger 2 Robert Griffin, 2017-10-30 For much of the Cold War, the British Army's main battle tanks (MBT) were first the Centurion and then the Chieftain. The question of the latter's replacement became urgent when in 1980 MBT80 was canceled. While the Royal Ordnance Challenger (originally the Shir 2) was acquired as a stop gap its design and capability limitations quickly became apparent. Vickers then took over the Royal Ordnance tank building facility and against stiff foreign competition developed the Challenger 2. This superbly researched and illustrated book tells the story of the evolution and subsequent successful career of Challenger 2 which has seen distinguished service in war and peace since 1990 and has proved itself one of the worlds most formidable fighting vehicles. The authors do not shy away from technical detail and make comparisons with competitors. The result is an objective and authoritative work which will delight military equipment buffs, modelers and wargamers.

**Ukraine Between War and Peace** Jacques Baud, 2023-07-04 Has the US strategy in Ukraine reached an impasse? What is the Russian conduct of military operations? When will the Ukrainian counter-offensive take place? Does Western weaponry really make a difference in Ukraine? Who are the winners of this war? What changes in the world are we witnessing since February 24, 2022? What is the reality of the

losses on the Ukrainian and Russian sides? Can Western industry compete with Russian industry in Ukraine? Why is a negotiated solution not being sought? How is our perception of the conflict serving Ukraine? To answer these questions and many others, Jacques Baud relies on information from Western intelligence services and American documents that were leaked in April 2023. After the best-sellers *Putin, Game Master?* and *Operation Z*, both works praised world-wide, Baud returns to the war in Ukraine by analyzing the facts and nothing but the facts. Whether one is for or against the position of Ukraine, one must nevertheless deal with the field of operations and to analyze what is happening there. This is the only way to find a path to peace—because peace will not come by relying on illusions. Jacques Baud was a member of the Swiss strategic intelligence, a specialist in Eastern European countries and a former head of the United Nations peace operations doctrine. In NATO, he was involved in programs in Ukraine, including after the Mayan revolution in 2014 and 2017. In addition to his major works on the conflict in Ukraine, he is the author of several books on intelligence, war, and terrorism, including *Governing by Fake News*, *Defeating Jihadist Terrorism*, and *The Navalny Affair*, all published by Max Milo.

**Military Modernisation in Southeast Asia after the Cold War** Shang-Su Wu, 2024-04-01 Southeast Asian countries represent a wide range of approaches to military modernisation due to their great diversity in politics, economies, geography and other factors. Bounded by the Pacific and Indian Oceans and located between China and India is the setting for the geostrategic impacts of military modernisation in Southeast Asian countries. Differing from previous research focused on military acquisition, this book additionally covers retention of assets and carefully examines the ageing issues that affect readiness and capabilities. In

doing so, it provides a comprehensive view of military modernisation. This book also compares each country's situation in the region in terms of military strength and security challenges to elaborate on the geostrategic impacts of military modernisation. The ten cases of military modernisation in the post-Cold War context provide rich content for readers to explore the evolution of military modernisation in developing countries after 1991. This book sheds light on security studies of Southeast Asia and is a useful resource for academic researchers, policy-makers and defence practitioners.
