Alberta Northern Leopard Frog Recovery Plan, 2005-2010 Alberta. Fish and Wildlife Division, Prescott, David R. C. (David Robert Charles), Alberta. Alberta Northern Leopard Frog Recovery Team, 2005-01-01 The northern leopard frog (*Rana pipiens*) is a medium-sized frog with powerful hind legs and extensively webbed hind feet that are well adapted for jumping and swimming. In February 2004, the Minister of Alberta Sustainable Resource Development maintained the listing of the northern leopard frog as threatened under Alberta's Wildlife Act. The Alberta Northern Leopard Frog Recovery team prepared this plan to guide the management of this threatened species over a 5 year period. The ultimate goal of this initiative is to achieve well-distributed, self-sustaining populations of leopard frogs throughout their historical range in Alberta. A long-term objective (>25 years) is to ensure that there are at least 2 self-sustaining populations of northern leopard frogs in each subdrainage of all major river drainages in southern Alberta. During the life of this plan, the Team aims to protect known sites from anthropogenic threats, improve knowledge of northern leopard frog populations in the province, reintroduce frogs to southern Alberta, increase awareness of the species and its conservation, and monitor the success of reintroduction efforts.
