**Born of Lesser Dogs** Pia Vasio, Sixteen year old, Aryan Mehta lives an ordinary and monotonous life in the sleepy little town of Doon. Aryan is bored at school and has no friends, until he meets Alia, a mysterious girl with a yellow umbrella. Alia calls Aryan a BOLD and requests his help in completing a strange mission. Aryan is hesitant at first but a twisted turn of events prompts him to change his mind. What follows next is a larger-than-life adventure that comes with its share of excitement, danger and thrill. The Girl in White, ghost of the beautiful, long-dead Victoria Meyers, haunts the forests and lake next to the imposing Crystal Palace. Many children have disappeared over the years in Doon, including Aryan's cousin Neil. Does the Crystal Palace have anything to do with these disappearances? Does the powerful Rajah Sahib, with his love for chess games, know what is happening? Join Aryan Mehta on this enchanting and fantastic journey and witness his life change beyond his wildest dreams!

*Daniele Barbaro's Vitruvius of 1567* Kim Williams,2019-07-05 This is the first-ever English translation of Daniele Barbaro's 1567 Italian translation of and commentary on Vitruvius's Ten Books of Architecture, an encyclopaedic treatment of science and technology whose influence extended far beyond its day. Intended to both interpret and expand upon the Vitruvian text, Barbaro's erudite commentary reflects his Aristotelian approach, particularly his fascination with the relationship between science and the arts. This treatise offers a window onto the architectural ideals of the 1500s, as well as then-current notions of philosophy, mathematics, music, astronomy, mechanics, and more. The text is accompanied by illustrations by the Renaissance architect Andrea Palladio and his contemporaries. Palladio's own Four Books on Architecture, published in 1570, was just one of many treatises on architecture that was inspired by the ideas contained here. An overview of Daniele Barbaro's thinking is presented in a foreword by Branko Mitrovic : The collocation of Barbaro's treatise between those of Alberti and Palladio is addressed in a foreword by Robert Tavernor. Kim Williams provides a translator's note to orient the reader. The text of the translation is cross-referenced to both Barbaro's 1567 publication and standard divisions of Vitruvius. The volume includes a detailed index of subjects and an index of proper names.

*Of Stars and Gods* Frank Fojtik,2022-05-12 This book, aimed in particular at beginners, tries to familiarize the reader with the (especially northern) starry sky as quickly as possible. The latter shall not be achieved in a sterile way by using coordinates or scientific techniques, but rather by means of the Greek myths that underlie most of the constellations. However, in contrast to other publications in this field, only those stories are presented that can be integrated into the predefined 12 myths. This and the brief description of the underlying myths make it easy to acquire the new knowledge. Following Highway to God, Of Stars and Gods is Frank Fojtik's second popular scientific book, which shows, like the first one, points of contact between visible reality and metaphysical thinking. On the one hand, it represents a practicable astronomical orientation tool. On the other hand, it may be also a kind of key for the reader to touch something greater that goes beyond the purely scientific.
