Gerald Andrew McDermott

**Embedded Politics** Gerald Andrew McDermott, 2010-11-22 Embedded Politics offers a unique framework for analyzing the impact of past industrial networks on the way postcommunist societies build new institutions to govern the restructuring of their economies. Drawing on a detailed analysis of communist Czechoslovakia and contemporary Czech industries and banks, Gerald A. McDermott argues that restructuring is best advanced through the creation of deliberative or participatory forms of governance that encourages public and private actors to share information and take risks. Further, he contends that institutional and organizational changes are intertwined and that experimental processes are shaped by how governments delegate power to local public and private actors and monitor them. Using comparative case analysis of several manufacturing sectors, Embedded Politics accounts for change and continuity in the formation of new economic governance institutions in the Czech Republic. It analytically links the macropolitics of state policy with the micropolitics of industrial restructuring. Thus the book advances an alternative approach for the comparative study of institutional change and industrial adjustment. As a historical and contemporary analysis of Czech firms and public institutions, this book will command the attention of students of postcommunist reforms, privatization, and political-economic transitions in general. But also given its interdisciplinary approach and detailed empirical analysis of policy-making and firm behavior, Embedded Politics is a must read for scholars of politics, economics, sociology, political economy, business organization, and public policy. Gerald A. McDermott is Assistant Professor of Management in The Wharton School of Management at The University of Pennsylvania. His research applies recent advances in comparative political economy and industrial organization, including theories of social networks, historical institutionalism, and incomplete markets to analyze issues of economic governance, firm creation, and industrial restructuring in advanced and newly industrialized countries. As evidenced by Embedded Politics, his current focus is on problems of institutional and organizational learning in the formation of meso-level governance institutions in emerging market and postsocialist economies. McDermott also works as Senior Research Fellow at the IAE Escuela de Direccion y Negocios at Universidad Austral in Buenos Aires, and he has served as Project Coordinator at the Inter-American Development Bank. He has consulted for the Finance, Private Sector, and Infrastructure Division at the World Bank and advised the Deputy Foreign Minister of the Czech Republic. In addition he has published many papers and book chapters on entrepreneurship, privatization, institutions, and networks in Central Europe and Latin America.

**Osteuropäische Lastwagen & Busse** Michael Dünnebier, 2024-03-28 Wer an tschechische Automobilhersteller denkt, denkt an Skoda, vielleicht noch Tatra. Und sonst? Schweigen. Dabei gehörte die tschechische Automobilindustrie vor 1945 zu den leistungsfähigsten und größten in Europa. Nach 1945 änderte sich vieles, aber nicht alles, und hinter dem Eisernen Vorhang bewahrten sich die Tschechen eine Nutzfahrzeug-Vielfalt, die innerhalb des Ostblocks ihresgleichen suchte, auch jenseits der schon erwähnten Marke Tatra. Weit über 20 Hersteller bedienten die Nutzfahrzeugmärkte des Ostblocks und der Entwicklungsländer, und viele sind dort auch heute noch im Einsatz. Michael Dünnebier stellt in diesem zweiten

Band über die tschechische Nutzfahrzeugindustrie in bewährter Art und Weise die wichtigsten Typen und Modelle vor.

The Defence Industry in East-Central Europe Judit Kiss, 1997 In 1989-90 the collapse of state socialism and the end of the Cold War brought dramatic changes for the defence industries of East-Central Europe. Initially it seemed that the resources devoted to the Cold War confrontation might become available for investment in non-military economic and social progress. However, by 1994 this optimism had given way to recognition that the transformation would involve significant costs and could not be accomplished quickly. The Defence Industry in East-Central Europe charts the development of the industries of the Visegrad countries - Czechoslovakia and its successor states, the Czech Republic and Slovakia; Poland; and Hungary. In the first part, national case studies underline the different approaches to reform adopted in the individual countries. The second part uses unique information derived from extensive interviews at enterprises in each of the four countries to examine the transformation of industry from a producer perspective.
