**The RECORD Experimental Map** Elzbieta Adamowicz, Peter Stanovnik, Hedvika Usenik, 2005 This Experimental Map is the first application of the RECORD Benchmarking Manual\*, which was designed for benchmarking the activities in scientific research organisations, the institutions that play a central role

in a country's innovation system. The book contains empirical information (survey results and case studies) on research institutions of Central and Eastern Europe, showing how the fashionable term of the 'centres of excellence' can be treated in practice in this region of the European Research Area. The main message of the experimental map is that the internationally competitive and innovative research organisations are few in number in these countries and with the help of the Benchmarking Manual the most important gaps in the management of these organisations can be identified in order to learn and improve performance.\*The RECORD Manual - Benchmarking Innovative Research Organisations in European Accession Countries. **A Handbook for Action Research in Health and Social Care** Carol Munn-

Giddings, Richard Winter, 2013-04-15 Action research is a form of research closely linked to practice which can readily be undertaken by practitioners and service users. This handbook offers a comprehensive guide to action research as a strategy for inquiry and development in health and social care. It can be used by individuals or groups working independently on their own projects or as a basis for a tutor-led course. It features \* an introduction to the theories behind action research and other forms of research related to it \* lively case studies from social work, nursing, mental health care and community work \* a step-by-step study guide. The theoretical section of the book provides a general definition of action research, compares action research with other forms of social research, outlines the nature of a 'culture of inquiry' in the workplace, and describes the links between action research and service-user research, management, community development, evaluation, reflective practice, feminist research and anti-racist research. This practical study guide covers issues such as preparing a proposal, ethics and principles of procedure, gathering and analysing data, writing a report, the links between action research and critical reflection. It will be particularly useful for groups wishing to undertake action research on an independent basis
