The Lightning Discharge Martin A. Uman,1987-06-17 From the Preface: In the 18 years since my technical monograph Lightning (McGraw-Hill, 1969; Dover, 1984) was first published, there have been significant advances in our understanding of lightning, but, until now, there has been no new monograph on the subject. A number of edited collections of papers and conference proceedings relating to lightning have been published during this period and are listed in Appendix D as well as being referenced, where appropriate, throughout the text... In the present book, the chapters are organized primarily by lightning process. Each chapter contains a reference list of essentially all literature on the subject discussed in that chapter, although all of these references may not be cited in the text.

Lightning People Christopher Bollen,2012-08-14 Capturing the atmosphere of anxiety and loss that exists in Manhattan, this is a story of the city itself, and the interconnected lives of those attempting to navigate both Manhattan and their own mortality. Joseph Guiteau is a working actor who moved to New York to escape a tragic family history in the Midwest. Wandering through a city transformed by the attacks of September 2001, he frequents gatherings of conspiracy groups, trying to make sense of world events and his own personal history. Looming over his life is a secret that threatens to undermine his new marriage to Del, a snake expert at a city park, whose work visa is the only thread keeping her from deportation back to her native Greece. The new marriage influences the lives of those around them: William, a dark and troubled actor whose sanity is fading as quickly as his career, leading him to perform increasingly desperate acts; Madi, a young entrepreneur who will have to face the moral complications of a business made successful by the outsourcing of American jobs to India; and her brother Raj, Del’s former lover, a promising photographer whose work details the empty rooms of an increasingly alienated city.

Ball Lightning Mark Stenhoff,1999-10-31 Down comes a deluge of sonorous hail, Or prone-descending rain. Wide-vent, the clouds Pour a whole flood, and yet, its flame unquenched, Th’unconquerable lightning struggles through. Ragged and fierce, or in red whirling balls, And fires the mountains with redoubled rage. Black from the stroke, above, the smould’ring pine Stands a sad shattered trunk; and, stretched below, A lifeless group the blasted cattle lie. James Thompson, “The Seasons” (1727) have been investigating ball lightning for more than two decades. I published a ball lightning report in Nature in 1976 that received worldwide publicity and I consequently many people wrote to me with accounts of their own experiences. Within a very short time, I had accumulated about 200 firsthand accounts, and the file has continued to grow steadily since then. Several things impressed me. Few of those who wrote to me had any detailed foreknowledge of ball lightning at the time of their observation. Nonetheless, once reports of other phenomena such as St. Elmo’s fire had been eliminated, the remaining descriptions were remarkably consistent. Furthermore, nearly all who contacted me were keen to have an explanation of what they had seen and seemed entirely sincere.
