

Little Spotted Kiwi

M Walker

Little Spotted Kiwi Jenny Jones,1997 Describes the physical characteristics, behaviour and habitat of the little spotted kiwi (kiwi pukupuku), and looks at the threats to its survival in the wild. Suggested level: primary.

Status of Little Spotted Kiwi (Apteryx Owenii) on Tiritiri Matangi Island in April 2017 Hugh Alexander Robertson,Natasha Coad,Rogan Colbourne,James R. Fraser (Wildlife conservationist),2019 The little spotted kiwi (*Apteryx owenii*) is the second rarest kiwi species in New Zealand, making the monitoring of its population essential. We caught 31 little spotted kiwi (28 adults, 2 subadults and 1 juvenile) on Tiritiri Matangi Island between 17 and 30 April 2017, including 3 of the 14 founders introduced from Kapiti Island in the mid-1990s and 9 island-bred birds that had been banded during 5-yearly monitoring visits between 1997 and 2012. Based on the locations of captures, radio-tagged birds, sightings and the projected origins of calls heard, we estimated that there were at least 25 pairs and a total population of 60-80 kiwi on Tiritiri Matangi Island. This represents a decline from the 2012 estimate of 80-100 birds, possibly due to the severe drought that was experienced in early 2013. However, the birds were generally in good to excellent condition and were heavier than their conspecifics on Kapiti Island at that time of year. At the end of our survey, 10 adult females were transferred to Shakespear Open Sanctuary at the tip of the adjacent Whangaparaoa Peninsula and 10 new adult females were introduced from Kapiti Island in an attempt to increase the genetic diversity of the Tiritiri Matangi Island population. However, the maximum of 24 founders is still below the 40 founders that is usually recommended. Therefore, we recommend that at least 10 additional kiwi are transferred to Tiritiri Matangi Island to improve the genetic resilience of the population to challenges such as diseases or environmental perturbations, and that 5-yearly monitoring and annual call counts are continued.
