**Poor White Trash No More** Don Neese, 2016-08-31 No one would have guessed that Donald Neese who grew up poor in Alabama in the 1940s and 1950s would become an Air Force pilot, a CIA agent, and a senior executive with Lockheed Martin. But Neese always had a way of surprising folks. No one ever saw him coming, which may be why he made a great spy. He looks back at his adventure-filled life, from growing up with an abusive father and an overly religious mother to trying to live up to his valedictorian brother and then flying missions over the battlegrounds of Vietnam and beyond. Not everything turned out as planned, for instance, there was a painful divorce, but his love of country and family got him through the toughest of times. He also discovered love again. In *Poor White Trash No More*, Neese looks back at an incredible life filled with surprising turns. His story will inspire you to keep chasing your dreams even during the darkest of times.

**On Frank Lloyd Wright's Concrete Adobe** Donald Leslie Johnson, 2016-12-05 During the years 1919 into 1925 Frank Lloyd Wright worked on four houses and a kindergarten located in metropolitan Los Angeles using concrete blocks as the main building material. The construction system has been described by Wright and others as 'uniquely molded', 'woven like a textile fabric' and perceived as ground breaking, truly modern, unprecedented. Many have attempted to uphold these claims while some thought the house-designs borrowed from old exotic buildings. For the first time this book brings together Wright's declarations, the support of upholders and inferences in order to determine their accuracy and correctness, or the possibility of feigned or fictional stories. It examines technical developments of concrete blocks by Wright and others before his experiences in Los Angeles began in 1919. It also studies the manner of Wright's design process by an examination of relevant pictorial and textual documents. A unique, in-depth and critical

analysis of the houses is set within historical, biographical and theoretical contexts. Consequently, the book explains the impact upon Wright of California contemporaries, architects Irving Gill and Rudolph Schindler, and their instrumentally profound role upon the course of modernism 1907-1923. In doing so, it allows a full appreciation of Wright's, Gill's and Schindler's buildings beyond their experiential qualities.
