F-35 Tom Burbage,Betsy Clark,Adrian Pitman,David Poyer,2023-07-18 The inside story of the most expensive and controversial military program in history, as told by those who lived it. The F-35 has changed allied combat warfare. But by the time it's completed, it will cost more than the Manhattan Project and the B-2 Stealth Bomber. It has been subject to the most aggressive cyberattacks in history from China, Russia, North Korea, and others. Its stealth technology required nearly 9 million lines of code; NASA's Curiosity Mars rover required 2.5 million. And it was this close to failure. F-35 is the only inside look at the most advanced aircraft in the world and the historic project that built it, as told by those who were intimately involved in its design, testing, and production. Based on the authors' personal experience and over 100+ interviews, F-35 pulls back the curtain on one of the most heavily criticized government programs in history from start to finish: the dramatic flights that won Lockheed Martin the contract over Boeing; the debates and decisions over capabilities; feats of software, hardware, and aeronautical engineering that made it possible; how the project survived the Nunn-McCurdy breach; the conflicts among all three branches of the U.S. military, between the eight other allied nation partners, and against spy elements from enemies. For readers of Skunk Works by Ben Rich and The Making of the Atomic Bomb by Richard Rhodes, F-35 will pique the interest of airplane enthusiasts, defense industry insiders, military history aficionados, political junkies, and general nonfiction readers.

F-35 Lightning II Erlend Larsen,2011-11-11 This book presents to you the history behind the F-35 Lightning II, not to mention revealing previous unknown secrets and some of the technology found in the air fighter that will replace the F-16 and several other fighters. This book is indeed a golden pearl for aircraft enthusiasts! Erlend Larsen was born in 1965, Norway. One of Larsen's first occupations was working as an freelance journalist, and in the period of 1993-1994, he worked as a media-and information officer for the Norwegian Battalions in Lebanon. Today, Larsen is working as a pilot at Widerøe Airlines. This is the fourth book to come from Erlend Larsen

Ultimate Fighter Bill Sweetman,2004 Ultimate Fighter tells how a series of little-known technology programs coalesced into a 3,000-airplane plan - the F-35 joint strike fighter (JSF). As one of the first major aircraft programs to start from scratch in the era of information technology, the JSF virtually flies itself, while the pilot manages the mission with the help of very acute high-resolution sensors and displays. The F-35 is one of the biggest single military projects in history - but it was born as a compromise between the needs of three U.S. services in the budget-strapped post-Cold War era. Author Bill Sweetman chronicles the high stakes competition between two aviation giants, Lockheed Martin and Boeing, to build the Joint Strike Fighter - the next generation fighter jet.

F-35 Lightning II Jon Schiller, Ph.d.,2014-06-30 Your author designed Guidance and Control Systems for advanced military aircraft for two decades in the 1970's and 80's. He was the designer of the first Fly-By-Wire Aircraft (e.g., F-111) which used a Dither Self-Adaptive Control System for adjusting the Flight Control Parameters during Terrain Following Missions or High Altitude Missions. I noted the success Fly-by-Wire Drones were having in destroying Al-Qaeda Terrorists in Pakistan and Yemen. This book is based on my knowledge of Fly-By-Wire Aircraft plus information obtained by sifting thru Internet data. There has been a true revolution using Fly by Wire and Dither Adaptive techniques in all new flying machines. The aircraft of today use Nanotechnology Computers and Sensors for the software in private aircraft, military fighters, and airliners. This book describes the new global fighter aircraft: the F-35 Lightning II

X-35 MR Hugh Harkins,2013-07 The Lockheed Martin X-35 Concept Demonstrator Aircraft was the winning contender in

the international Joint Strike Fighter program, which led to X-35 and rival Boeing X-32, both of which were demonstrated in 2000/2001, with the prize being nothing less than domination of the production of 5th generation combat aircraft for the United States and many other countries for the next few decades. The JSF program, which spawned the X-35, was borne out a number of different research programs conducted in the 1980's and 1990's. A number of programs were combined to form a core program to replace a number of different legacy aircraft types on both sides of the Atlantic. The X-35 would be further developed into the F-35 Lightning II 5th generation strike fighter, formerly known as the JSF (Joint Strike Fighter), entering service with air forces on both sides of the Atlantic. This volume details the genesis of the Joint Strike Fighter program and describes the development, manufacture and flight testing of all three variants of the X-35: the X-35A conventional take-off and landing; X-35B short take off and vertical landing and the X-35C aircraft carrier variant, along with an overview of the rival Boeing X-32 design. Chronologies detail the flight test program of the Lockheed Martin X-35 and the Boeing X-32 aircraft.

F-35 Lightning II John Hamilton,2012-01-01 This title explores the recent development of the new F35 Lighting II multirole fighter. Readers will follow the history of its origins as a descendant of the X-35 and product of the Joint Striker Fighter Program. Chapters also detail the aircraft's military and performance specifications as well as its features and advantages in the field, such as its three versions, its cockpit design and speech-recognition system, its stealth technology, its target sensors, and its powerful cannons, missiles, and other weapons. Aligned to Common Core Standards and correlated to state standards. A&D Xtreme is an imprint of Abdo Publishing, a division of ABD0.

Global Defense Procurement and the F-35 Joint Strike Fighter Bert Chapman,2018-12-27 This book analyzes the development and evolution of the F-35 Joint Strike Fighter, a multinational aircraft endeavor involving the U.S. and many of its allies. The author provides a historical overview of jet fighter aircraft, discussing the different generations of these planes and their technical characteristics, as well as an outline of emerging international geopolitical and security trends the F-35 may see combat in. By examining the role of defense industries, domestic politics, and governmental oversight of the Joint Strike Fighter in various countries, the author concludes that this aircraft will be deployed in most of these countries to replace their aging jet fighter fleets and combat potential military aggression from China, Russia, and other revisionist international powers.
