Spectre Gunner David M. Burns,2013-01-31 This is the true story of Master Sergeant David M. Burns, an aerial gunner assigned to the deadliest squadron in air force history. Aboard the AC-130 Spectre gunship, he flew a total of 287 combat missions over Laos, South Vietnam, and Cambodia, in pursuit of the truck traffic coming down the Ho Chi Minh Trail. His squadron destroyed more than fifteen thousand trucks loaded with war munitions destined for South Vietnam and Cambodia. Despite heavy and constant anti-aircraft and missile fire, the loss of six aircraft and the lives of fifty-two men, the crew never wavered in its dedication to the mission. Master Sergeant Burns has a distinguished military career that began in 1951 at the age of fifteen. He served one tour of duty in Phan Rang, South Vietnam, in 1967, and four tours of duty in the 16th Special Operations Squadron in Southeast Asia as an aerial gunner, lead gunner, and instructor gunner. He served in both the United States Navy and Air Force, earning three Distinguished Flying Crosses for heroism, twenty-seven Air Medals, as well as a Bronze Star, Purple Heart, Presidential Unit Citation, Armed Forces Expeditionary Medal, Vietnam Cross of Gallantry with Palm, Vietnam Service Medal with nine battle stars, and other decorations from the Korean War. He was wounded twice and is credited with saving the lives of fourteen crewmembers. This is his story.

Gunships Wayne Mutza,2009 Gunships: The Story of Spooky, Shadow, Stinger, and Spectre tells the dramatic story of transforming military cargo transports into deadly ground-attack aircraft used by the U.S. and other countries in worldwide conflicts from the Vietnam War to the Middle East today. This comprehensive and detailed accounting of gunships begins with piston-powered, WWII-era C-47s and progresses to the four-engine turboprop C-130 Hercules, showing how gunships evolved from using 20mm miniguns to 105mm Howitzers with digital-age Battle Management Centers housed onboard. These highly effective airplanes made history by removing the safe haven of night operations from the enemy, and allowing strategic victory that might not have otherwise been possible. Author Wayne Mutza not only carefully researched all of these aircraft and their paths to reality, but also tells the tale of the brave and persevering men who believed in this unique weapon system and who saw its development through to the end. This book features a wealth of outstanding color photographs, many of which have never before been published, and also contains detailed appendices documenting gunship production data, combat units, and aircraft losses.

Callsign: Spectre Jeff Noecker,2011-04-29 Callsign: Spectre is the true story of a young man from a small town in Pennsylvania who grows up and enlists in the United States Air Force at nineteen. Nearly forty years after the fact, Jeff Noecker recounts his combat flight experiences from the Vietnam War flying in an AC-130 Spectre gunship. The story follows him from his initial air force training to being accepted into an unusual Special Operations unit. What sets this story apart from the others that have been written about Vietnam is the Spectre gunship that Noecker flew in on his missions. While the US Air Force was flying hundreds of F-4s, F-105s, B-52s, OV-10s, O-2s, A-7s in Vietnam and Southeast Asia, there were only fourteen AC-130A Spectre gunships in theater and only one squadron that flew them—Noecker's squadron. There were even fewer than fourteen when the program began in 1968; the first few flew out of a base in Vietnam. The stories contained here resemble a diary, presenting both personal anecdotes of Noecker's and of stories he heard over the course of his time in service. Some of these may seem a bit farfetched, but Noecker sticks to the facts as much as possible. Unbelievable as some of the stories sound, his tales of his time in the air are unmistakably true. After being live for a year, I find that one piece of data was incorrect in the original printing. This has been corrected and a small amount of other data has been added. The corrections appear in the second printing of both hard and soft covers which are available now and will be available in ebook format very soon.

C-130 Hercules Martin W. Bowman,2017-07-30 "An engaging retrospective on the long-lived and ubiquitous C-130 Hercules tactical airlifter . . . Sweeping in its scope . . . an invaluable reference." —Aviation History Designed in response to a 1951 requirement, the C-130 Hercules is the most successful military airlifter ever built. Since it first flew in prototype form on August 23, 1954, more than 2,100 have been produced in over eighty different versions. Across its variants, the Hercules serves more than sixty air forces, as well as many civilian cargo operators, in a multiplicity of roles, including air-to-air refueller, gunship, airborne command post, flying hospital, and firefighter. This rugged and easily maintained aircraft entered service in 1956 with the USAF Tactical Air Command. Ten years later, the "Charlie 130" was providing essential logistical support in Vietnam. This period in Southeast Asia was the Hercules' finest hour. Paradrops, airlift, and evacuation operations were completed around the clock, often at low level, usually under fire and nearly always in bad weather. A generation later, this "Mr. Dependable" was serving with equal distinction in the Gulf War in the role of airlifter, radio-countermeasures, and "psy-ops" platform, gunship and, once again, "block-buster bomber." The "Herky Bird" or "Fat Albert," as the C-130 is fondly known, has proved a key component in humanitarian relief operations, as well, in all parts of the world. "Martin's technical and informative look at their creation and use is absolutely fascinating. An iconic aircraft gets Martin's VIP treatment in this wonderful book." —Books Monthly "A history of an aviation great, from the pen of a popular and well-established author of aviation history." —Firetrench

Afghan Air Wars Michael Napier,2023-09-28 Michael Napier details the critical role of air power in the skies over Afghanistan, from the ten-year occupation by the USSR in the 1980s through to the US and NATO campaign from 2001 to 2021. US and British forces, strongly supported by air power, invaded Afghanistan in late 2001 in response to the Al Qaida attacks on 9/11. What began as a small-scale operation of 2,500 troops with the limited objective of destroying Al Qaida became ever larger, growing to over 100,000 troops ten years later. This experience matched that of the Soviets after their invasion in late 1979, when they saw a massive increase in resistance by Mujahidin. Afghan Air Wars details how Soviet aircraft including the MiG-21, MiG-23, Su-17 and Su-25, as well as Mi-8 and Mi-24 helicopters supported Soviet offensives in the Panjshir Valley and other regions. Despite these high-octane operations and overwhelming air superiority, Soviet forces eventually withdrew. Some 20 years later, US and NATO air forces were deployed in similar roles. F-15E, F-16, F/A-18, A-10, Mirage, Harrier and Tornado aircraft all saw action in the skies over Afghanistan as did the CH-47 Chinook and AH-64 Apache helicopters. Mike Napier fully details their series of operations in a hostile environment as well as the advent of high-resolution targeting pods and Precision Guided Munitions (PGM) which enabled aircraft to stand off from threat areas and also to deploy their weapons with deadly accuracy. The conflict also saw the groundbreaking introduction of Remotely Piloted Vehicles (RPV) into routine air operations. Afghan Air Wars is richly illustrated with over 240 images – both official photos and privately taken, in-theatre images which have not been previously published. It also includes first-hand accounts by aircrews involved to create a unique and comprehensive picture of the part played by air power over Afghanistan in the last 40 years.

The Lockheed Martin C-130 Hercules Peter Smith,2010 The most versatile military transport aircraft ever built, the C-130 Hercules has been in continuous production for more than half a century and has seen service with more than 50 different air forces around the world. No other aircraft has shown such continuous durability and her adaptability has ensured that the Hercules in all her many manifestations is the ultimate success story of aviation and military design. Originating in the 1950's when the USAF needed an aircraft with heavy cargo lifting ability, troop-carrying capacity, and the ability to operate safely from the most primitive of runways, the Hercules has appeared wherever there has been a crisis, war, or emergency. In combat, no matter whether in tropical jungle, desert landing strips, or almost-impassable terrain, the C-130's homely and familiar profile has arterialized where she was most needed. From the icy wastes of Antarctica to the earthquake-stricken island of Haiti in January 2010, the aircraft has arrived on the scene laden with medical and emergency supplies, aid teams, and heavy lifting gear. This is the full story of the Hercules and a faithful record of all her exploits over half-a-century, in her many guises, from gunship in Vietnam, to flying hospital in Arabia, and is fully illustrated with many original color and black-and-white photographs. All Hercules types and many foreign air forces and civilian operators are covered, including their varied uses and multiple roles. This complete aircraft history also contains a type listing, details of sub-contractors, exhibits and museums, together with color aircraft profiles which combine to make The Lockheed Martin Hercules essential reading for the aviation enthusiast or historian.

Night Hunters William Pace Head,2014-03-18 In Night Hunters, air power historian William P. Head provides the first detailed study of the development and deployment of the AC-130 gunship. While other airframes and other types of close air support (CAS) and interdiction weapon systems preceded or flew with the AC-130s, this four-engine cargo airframe proved to be not only the longest serving fixed-wing gunship but also the most effective by far. During the Vietnam War, the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features, the difficult climate, and the shifting diplomatic context. One of the most important was the development of the AC-130. Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam-era fixed-wing gunship and the only one that continues to fly missions in the twenty-first century. In addition, it employed many of the most advanced weapons, sensors, targeting devices, and fire control systems of the 1970s or of any era. By recounting both the technical development and the combat operations of the plane, and by looking at the proposed alternatives for its use in the War on Terror, Night Hunters offers a clear view of the role of gunships and of close air support in US wars. In today's never-ending brushfire wars, the AC-130s continue to uphold their reputation for excellence.

Beyond the Wild Blue (2nd edition) Walter J. Boyne,2007-06-26 The second edition of *Beyond the Wild Blue*, an update of the popular history originally released in 1997, is a fascinating look at sixty turbulent years of Air Force history. From the prop-driven armada of World War II to the most advanced Stealth weaponry, from pioneers like General Henry Hap Arnold to glorious conquests in the Gulf War, *Beyond the Wild Blue* is a high-flying study of the triumphs (and failures) of leadership and technology. In three new chapters, Walter Boyne covers an eventful ten years, including 9/11, the invasion of Afghanistan, and the second Gulf War, describing in detail the technological advancements that led to highly efficient airstrikes in Iraq. He also takes stock of the Air Force's doctrine and mission statements as this unique sector of the military grapples with an ever-changing world.

The Praetorian STARShip : the untold story of the Combat Talon ,2001 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Anti-personnel Weapons Sipri,2021-01-27 This book, first published in 1978, analyses the development, uses and effects of conventional anti-personnel weapons such as rifles and machine guns, grenades, bombs, shells and mines. It provides the historical, military, technical and clinical background to the international legal discussions as part of the ongoing efforts to prohibit or restrict the uses of some of the more inhumane and indiscriminate of these weapons, the most successful being the 1997 Ottawa Treaty that banned the use of anti-personnel mines.
