**Francois Verlinden**

*S-3 Viking* Brad A. Elward, 2012 The Lockheed S-3 Viking was developed in the late 1960s to serve as a dedicated carrier-based anti-submarine aircraft. Over the years, it evolved into an outstanding surveillance and anti-surface platform, effective not only against submarines but also large and small surface ships. As its nearly 35-year career came to an end in 2009, the Viking also took on the carrier air wing organic tanking requirements, retiring with more than half of its service life remaining. A total of 187 aircraft were built and served in 16 US Navy squadrons. The Viking and its main variant, the highly classified ES-3A Shadow electronic surveillance aircraft, played a key role in the Cold War and in the conflicts of the 1990s. This book is one of the few publications to tell the Viking story and is packed with photos and detailed line drawings, all depicting the aircraft's weapons, paint schemes, sensors and interior. It also provides an overview of some of the more significant variants that were studied, but never fully pursued, such as the Carrier On-Board Delivery (COD) and dedicated (KS) refueling variants. It also discusses the aircraft's role in Operation Desert Storm and how the lessons learned from that conflict impacted the Viking' mission during the latter part of the 1990s and early 2000s.

**US Navy F-4 Phantom II MiG Killers 1972-73** Brad Elward, Peter E. Davies, 2012-11-20 The second of two books on the Navy's Phantom II MiG killers of the Vietnam War, this book covers the numerous actions fought out over North Vietnam during the Linebacker I and II operations of 1972-73. No fewer than 17 MiGs were downed during this period, five of them by the Navy's sole aces of the conflict, Lts Randy Cunningham and Willie Driscoll of VF-96. Drawing on primary sources such as surviving Phantom II aircrew and official navy documentation, the author has assembled the

most precise appraisal of fighter operations involving US Navy Phantom II units and those elusive MiGs ever seen in print.

Partners in Freedom Joseph R. Chambers, 2000 Established in 1917 as the nation's first civil aeronautics research laboratory under the National Advisory Committee for Aeronautics (NACA), Langley was a small laboratory that solved the problems of flight for military and civil aviation. Throughout history, Langley has maintained a working partnership with the Department of Defense, U.S. industry, universities, and other government agencies to support the defense of the nation with research. During World War II, Langley directed virtually all of its workforce and facilities to research for military aircraft. Following the war, a balanced program of military and civil projects was undertaken. In some instances Langley research from one aircraft program helped solve a problem in another. At the conclusion of some programs, Langley obtained the research models for additional tests to learn more about previously unknown phenomena. The data also proved useful in later developmental programs. Many of the military aircraft in the U.S. inventory as of late 1999 were over 20 years old. Langley activities that contributed to the development of some of these aircraft began over 50 years prior. This publication documents the role, from early concept stages to problem solving for fleet aircraft, that Langley played in the military aircraft fleet of the United States for the 1990's.

**Nimitz-Class Aircraft Carriers** Brad Elward, 2011-07-20 The Nimitz class aircraft carrier is the ultimate symbol of the United States superpower status. A true behemoth, this is an unsurpassed weapons platform that overshadows all of its nearest rivals. A history of the world's largest aircraft

carriers, with runways over 300 meters long, this book looks at the development and deployment of the nuclear-powered Nimitz class aircraft carriers from 1975 when the USS Nimitz, the lead ship of the class, was commissioned, to the present day. All of the class are still operational and the tenth and last of the class, the USS George H. W. Bush, was commissioned in 2009. Here, Brad Elward provides a detailed overview of their design and development, highlighting their unique features, from jet blast deflectors to cutting edge radar systems, and a history of the Nimitz class in service, from deployment in the Gulf during Operation Desert Storm, through to the enforcement of the no fly zone over Bosnia.

**California Warplanes** Harold Skaarup, 2012 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of California. The aircraft include those flown by members of the US Air Force, the US Navy, the US Army, the US Marine Corps, the US Coast Guard, the Air and Army National Guard units, and by various NATO and allied nations as well as a number of aircraft previously operated by opposition forces in peace and war. The interested reader will find useful information and a few technical details on most of the military aircraft that have been in service with active flying squadrons both at home and overseas. 150 selected photographs have been included to illustrate a few of the major examples in addition to the serial numbers assigned to American military aircraft. For those who would like to actually see the aircraft concerned, aviation museum locations, addresses and contact phone numbers, websites and email addresses have been included, along with a list of aircraft held in each museum's current inventory or that on display as gate guardians throughout the state of California. The aircraft presented in this edition are listed alphabetically by manufacturer, number

and type. Although many of California's heritage warplanes have completely disappeared, a few have been carefully collected, restored and preserved, and a good number have been restored to flying condition. This guide-book should help you to find and view California's Warplane survivors.

**Boeing F/A-18 Hornet** Brad Elward,2001 This top-flight series provides a review of the world's most exciting combat aircraft.

Reconnaissance Planes Since 1945 Frank Schwede,2018-01-30 Reconnaissance aircraft have always been the spearhead of the various air forces, helping to provide the basis for any further military operations. At the time of the Cold War and before the satellite era, the use of reconnaissance aircraft reached its zenith, as the warring nations were determined to know what was happening on the other side. Consequently, powerful aircraft emerged during this time, especially in terms of deployment altitude, speed and flight time; achievements which have been largely unrecognised until now.

**A Field Guide to Airplanes of North America** M. R. Montgomery,Gerald L. Foster,2006 Describes and illustrates over four hundred different airplanes likely to be seen in North America, grouped in the categories of biplanes, agricultural planes, low-wing singles, amphibians, low-wing twins, high-wing twins, twin-boom and canard twins, four-engine props, business jets, jet airliners, military aircraft, recently retired military aircraft, and helicopters.

Skaarup,2010-04-02 This aviation handbook is designed to be used as a quick reference to the classic military heritage aircraft that have been restored and preserved in the state of Arizona. The aircraft include those fl own by members of the United States Air Force, the United States Navy, the United States Army, the United States Marine Corps, the

**California Warbird Survivors 2002** Harold A. Skaarup, 2002-07-18 During the twentieth century, civil and military aviation has played a prominent role in the history and development of California. Commercial operators have exploited the advantages offered by aircraft to overcome its unique challenges of geography and climate. By virtue of California's comparative size and strategic importance on the West Coast of the continental USA, a wide variety of military aircraft have been based there through the years. The list of military aircraft types that made up the tapestry of California aviation is as extensive as the list of legendary figures who have contributed to its amazing history. While most of the military aircraft types no longer grace the airspace over California, many can be viewed in their former splendor as they stand as gate guards or museum

exhibits. This booklet provides a comprehensive guide to where these restored aircraft can be found. Complementing the details concerning aircraft specifications and roles, the author has included many facts. Finally, the descriptions of the recovery, restoration and preservation efforts stand as a tribute to the many volunteers who have devoted time, energy and financial support to ensure this rich heritage is preserved.

*The Supercarriers* Andrew Faltum, 2014-10-15 The Supercarriers is a comprehensive historical overview with extensive photos, maps, drawings, and operational detail, including all air-wing deployments. It covers all of the Forrestal class supercarriers and the follow-on ships, which are basically of the same design. The book is heavily illustrated with over one hundred illustrations and maps covering the Western Pacific, Vietnam, Mediterranean, Middle East, Indian Ocean, and Caribbean. The front end paper illustration shows the Saratoga as representative of the Forrestal class with port and starboard profiles and an overhead view. The rear end paper displays similar views of the Constellation as part of the Kitty Hawk class.

**Taiwan's Security and Air Power** Martin Edmonds, Michael Tsai, 2003-10-23 Recent concern about mainland China's intentions towards Taiwan, and more general concern about the risk of instability in the region, has led to growing interest in Taiwan's military strategy. This book brings together a range of experts from the West and from Taiwan itself who examine the key issues connected with Taiwan's air power, which is a key aspect of the China-Taiwan military balance. During the 1990s, Taiwan invested considerable resources in thoroughly re-equipping its air force with modern air defence and strike aircraft equipped with modern missiles, thereby denying China command of the air in any conflict in the short- to medium-term. In the longer-term, air power will remain a crucial influence on the overall balance, as China's efforts to upgrade its own air force's

capabilities begin to undermine Taiwan's current advantages.
