Lockstep Robert P. French, 2018-09-24 A mysterious kidnapping. A political ransom. A missing teen. To save a child, an ex-cop with a dark past must risk his future... Recovering addict Cal Rogan would do anything to preserve his relationship with his daughter. So when one of her friends disappears, Cal splits his efforts between three separate cases. But after he digs deeper into a candidate's political blackmail and an ex-cop's missing teenager, he has a sneaking suspicion that both crimes are connected to the kidnapping... As Cal and his partner Nick connect the dots, there's only one problem: the evidence they find keeps evaporating. Cal's only chance to save an innocent child may require committing an unthinkable crime... Lockstep is a dramatic standalone book in the Cal Rogan crime thriller series. If you like heroes who struggle with their demons, gritty urban police detectives, and clues you won't see coming, then you'll love Robert P. French's compelling crime novel. Lockstep and Dance Linda G. Tucker, 2009-09-18 *Lockstep and Dance: Images of Black Men in Popular Culture* examines popular culture's reliance on long-standing stereotypes of black men as animalistic, hypersexual, dangerous criminals, whose bodies, dress, actions, attitudes, and language both repel and attract white audiences. Author Linda G. Tucker studies this trope in the images of well-known African American men in four cultural venues: contemporary literature, black-focused films, sports commentary, and rap music. Through rigorous analysis, the book argues that American popular culture's representations of black men preserve racial hierarchies that imprison blacks both intellectually and physically. Of equal importance are the ways in which black men battle against, respond to, and become implicated in the production and circulation of these images. Tucker cites examples ranging from Michael Jordan's underwear commercials and the popular Barbershop movies to the career of rapper Tupac Shakur and John Edgar Wideman's memoir *Brothers and Keepers*. *Lockstep and Dance* tracks the continuity between historical images of African American men, the peculiar constitution of whites' anxieties about black men, and black men's tolerance of and resistance to the reproduction of such images. The legacy of these stereotypes is still apparent in contemporary advertising, film, music, and professional basketball. *Lockstep and Dance* argues persuasively that these cultural images reinforce the idea of black men as prisoners of American justice and of their own minds but also shows how black men struggle against this imprisonment.

Neural Networks for Pattern Recognition Albert

Nigrin,1993 In a simple and accessible way it extends embedding field theory into areas of machine intelligence that have not been clearly dealt with before. Neural Networks for Pattern Recognition takes the pioneering work in artificial neural networks by Stephen Grossberg and his colleagues to a new level. In a simple and accessible way it extends embedding field theory into areas of machine intelligence that have not been clearly dealt with before. Following a tutorial of existing neural networks for pattern classification, Nigrin expands on these networks to present fundamentally new architectures that perform realtime pattern classification of embedded and synonymous patterns and that will aid in tasks such as vision, speech recognition, sensor fusion, and constraint satisfaction. Nigrin presents the new architectures in two stages. First he presents a network called Sonnet 1 that already achieves important properties such as the ability to learn and segment continuously varied input patterns in real time, to process patterns in a context sensitive fashion, and to learn new patterns without degrading existing categories. He then removes simplifications inherent in Sonnet 1 and introduces radically new architectures. These architectures have the power to classify patterns that may have similar meanings but that have different external appearances (synonyms). They also have been designed to represent patterns in a distributed fashion, both in short-term and long-term memory.
