F1 Mavericks Pete Biro,George Levy,2019-08-06 F1 Mavericks is the story of the grandest, most influential, and most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro. The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of the modern Formula 1 car. This is also the time when legendary names who defined F1 were out in full force: Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda, James Hunt, Bruce McLaren, Jody Scheckter. We'll see and meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rochhi, Gordon Murray, and many others. We'll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebars featuring key designers and technologies, like wings, ground effects, slick tires, turbochargers, and the Brabham “fan” suction car. F1 Mavericks is an international story, and includes loads of information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (Matra, Ligier, Renault), Germany (Porsche, BMW) and the United States (Eagle, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1 racing—it's all here in F1 Mavericks.

Delving back into the past, readers can delight in the now lost worlds of non-championship F1 racing, Formula 2, F5000, CanAm and the Tasman Series, which boasted many of the leading drivers of the day among their competitors. One of the greatest strengths of AUTOCOURSE through the years has been its superb photographic coverage. Many of the world’s leading motor sport photographers have been regular contributors, their images providing the ultimate pictorial record of each racing season. In a fast changing world, AUTOCOURSE retains its position as the definitive record of each season’s motor sport. Now, sought-after and long-out-of-print editions, which command high prices from collectors, will shortly be available to download at a very modest cost for enthusiasts to enjoy on their Apple and Android tablets in eBook form.

Disability and Mobile Citizenship in Postsocialist Ukraine Sarah D. Phillips,2010-11-26 Sarah D. Phillips examines the struggles of disabled persons in Ukraine and the other former Soviet states to secure their rights during the tumultuous political, economic, and social reforms of the last two decades. Through participant observation and interviews with disabled Ukrainians across the social spectrum -- rights activists, politicians, students, workers, entrepreneurs, athletes, and others -- Phillips documents the creative strategies used by people on the margins of postsocialist societies to assert claims to mobile citizenship. She draws on this rich ethnographic material to argue that public storytelling is a powerful means to expand notions of relatedness, kinship, and social responsibility, and which help shape a more tolerant and inclusive society.

History and Politics in French-Language Comics and Graphic Novels Mark McKinney,2011-02-03 With essays by Baru, Bart Beaty, Cécile Vernier Danehy, Hugo Frey, Pascal Lefèvre, Fabrice Leroy, Amanda Macdonald, Mark McKinney, Ann Miller, and Clare Tufts In Belgium, France, Switzerland, and other French-speaking countries, many well-known comics artists have focused their attention on historical and political events. In works ranging from comic books and graphic novels to newspaper strips, cartoonists have addressed such controversial topics as French and Belgian collaboration and resistance during World War II, European colonialism and US imperialism, anti-Semitism in France, the integration of African immigrant groups in Europe, and the green and feminist movements. History and Politics in French-Language Comics and Graphic Novels collects new essays that address comics from a variety of viewpoints, including a piece from practicing artist Baru. The explorations range from discussion of such canonical works as Hergé's Tintin series to such contemporary expressions as Baru's Road to America (2002), about the Algerian War. Included are close readings of specific comics series and graphic novels, such as Cécile Vernier Danehy's examination of Cosey's Saigon Hanoi, about remembering the Vietnam War. Other writers use theoretical lenses as a means of critiquing a broad range of comics, such as Bart Beaty's Bourdieu-inspired reading of today's comics field, and Amanda Macdonald's analysis of bandes dessinées (French comic books) in New Caledonia during the

1990s. The anthology establishes the French-language comics tradition as one rich with representations of history and politics and is one of the first English-language collections to explore the subject.

God, Science, and Religious Diversity Robert T. Lehe,2018-07-24 Two major obstacles to belief in God in the twenty-first century are the idea that science is incompatible with religious faith, and the idea that the diversity of religions undermines the credibility of belief that any one religion could be truer than the others. This book addresses both of these challenges to belief in God and explores a connection between them. It argues that science and religion are not only compatible, but that some recent scientific discoveries actually support belief in the existence of the Creator God. The diversity of religions is widely believed to undermine the credibility of religious truth claims because of the assumed lack of any way to settle disagreements between different religions. This book argues that one rational way to adjudicate disagreements between the claims of diverse religions is to assess their consistency with contemporary science. The book considers how Christian theism and Buddhism fare in harmonizing their metaphysical frameworks with contemporary scientific cosmology. Although both theistic and Buddhist worldviews resonate with many recent scientific discoveries, the Big Bang theory and cosmic fine-tuning favor the Christian doctrine of creation.

The Magical and Ritual Use of Perfumes Richard Alan Miller,Iona Miller,1990-08 Because of their power to elicit specific responses in the body and psyche, perfumes have, through the ages, occupied an important part in ritual. The Magical and Ritual Use of Perfumes shows how scents can become the very “essence of magic,” providing direct access to the emotional centers of the brain and memory.

Leland Hans Ledwinka Marc Birkigt Ferdinand Porsche Harry Miller Vittorio Jano Gabriel Voisin Alec Issigonis Dante Giacosa, et. al.
