Benoit Peeters

**Team Lotus** Peter Warr, 2014-11-24 This long-awaited memoir by a key figure in Formula 1 includes trenchant observations on the 12 World Champions with whom he worked at Team Lotus. Peter Warr was best known for his management of the Lotus Formula 1 team, where he was one of Colin Chapman's closest allies as well as the man who nurtured the early Formula 1 careers of Ayrton Senna and Nigel Mansell. Frank, informative and beautifully written, his memoir remained unfinished at the time of his death in 2010, but the bulk of his work was done and was published in 2012, complete with an introduction and epilogue by Simon Taylor. This long-awaited inside story, which is of particular interest for its author's thoughts on Chapman and all the drivers he worked with, is a 'must read' for any Formula 1 enthusiast.

**The City and Its Sciences** Cristoforo S. Bertuglia, Giuliano. Bianchi, Alfredo Mela, 2012-12-06 Recent developments in the field of urban analysis and management are investigated in this book. It is a wide-ranging collection of essays on the subject drawn from a long-term project and seminar, held in Italy, to review the state of the art and speculate on the future influence on the sciences of the city of the complexity concept. Of particular interest is the variety of points of view, often contrasting, and the attempt to go beyond the conventional approaches to the analysis, and the planning of the city. While focussing mainly on the European (and in particular Italian) context, the discussion is of general relevance and valuable to anyone concerned with the prospects for the city in the new millenium.

**Lotus 72** Pete Lyons, 2019-03-26 This book, the first in Evro's new Formula 1 Greats series, covers one of the most revered Formula 1 cars ever made. Introduced in 1970, the wedge-shaped Lotus 72 competed for six seasons, winning 20 World Championship Grands Prix, two Drivers' titles (for Jochen Rindt in 1970 and Emerson Fittipaldi in 1972) and three Constructors' titles (in 1970, 1972 and 1973), racing first in Lotus's evocative red, white and gold livery, then the equally eye-catching black and gold of the John Player Special period. Pete Lyons, Autosport's renowned Formula 1 reporter for part of the Lotus 72 era, explores the car's entire race-by-race career in his insightful commentary accompanying a magnificent array of more than 300 photos. The 1970 season: after troubled early development, the 72 finally took over from the long-serving 49, its four consecutive race wins enough to secure the World Championship for Jochen Rindt, posthumously after his death during practice for the Italian Grand Prix. The 1971 season: with promising youngster Emerson Fittipaldi elevated to team leader after Rindt's death, great things were expected of the 72's second season but it proved to be winless. The 1972 season: now in black and gold John Player livery, the 72 became far more competitive and Fittipaldi's four Grand Prix victories made him World Champion. The 1973 season: Ronnie 'SuperSwede' Peterson joined Fittipaldi to form a dream team and together they won seven races, but because Lotus's spoils were divided between the two drivers Jackie Stewart was able to come through to become World Champion. The 1974 season: still the 72 soldiered on, now as the fall-back car after its successor, the 76, failed to deliver; partnered by Jacky Ickx, Peterson won three Grands Prix. The 1975 season: well beyond its sell-by date, the 72 did a final season but by now it was far from effective, with Ickx's second place in the tragic Spanish Grand Prix its best result.

Hergé, Son of Tintin Benoit Peeters, 2012 Author of the critically acclaimed Tintin and the World of Hergé and

the last person to interview Remi, Benoit Peeters tells the complete story behind Hergé's origins and shows how and why the nom de plume grew into a larger-than-Remi personality as Tintin's popularity exploded. Drawing on interviews and using recently uncovered primary sources for the first time, Peeters reveals Remi as a neurotic man who sought to escape the troubles of his past by allowing Hergé's identity to subsume his own. As Tintin adventured, Hergé lived out a romanticized version of life for Remi.--Jacket.

The Art of Blade Runner: Black Lotus Roland Kelts, 2022-11-29 The Art of Blade Runner: Black Lotus is a study and celebration of the artwork that went into making the first ever Blade Runner animated series. The Art of Blade Runner: Black Lotus is a study and celebration of the artwork that went into making the first ever Blade Runner animated series. Concept art, sketchwork, pre-viz, animation tests, final frames and more, are paired alongside interviews with the masterminds behind the show to give fans the full story of Black Lotus. Respected co-directors Shinji Aramaki and Kenji Kamiyama provide an exclusive, in-depth interview that explores their relationship with the Blade Runner universe, and their intimate analyses of and inspiration behind the characters. Alcon producers describe the creative journey, that spans many years prior, behind what they envisioned for the story, how Black Lotus would fit in the wider Blade Runner narrative, and who they wanted the protagonist to be. The writers explain how they conceptualised the characters and the voice actors share their personal journeys and light-hearted anecdotes on how they brought those characters to life. The lighting and animation team also share how they captured Blade Runner's cyberpunk visual and auditory palette in a new medium for the franchise: anime. Written by Japanamerica author Roland Kelts, this book is illustrated to the brim with concept art that is beautifully vivid and presented in a gallery format throughout the book; organised chronologically by character, location, and event as they are introduced in the show. Readers will be able to breeze through this companion guide as they watch the show for a deeper, richer, and more personal viewing experience. At the back of the book, you'll find never-before-seen sketches of the Black Out short films that accompanied Blade Runner 2049.

Exploring Site-specific Art Judith Rugg, 2010-02-28 Over recent years, a greater diversity of spaces has opened up worldwide for the making and display of art beyond the gallery. A new 'space consciousness' has developed, with an emphasis on the significance of the spatial. Judith Rugg takes up a range of site-specific artworks internationally located in countries ranging from China to France, Italy and the UK, Argentina and Canada to Australia, Poland and the Netherlands to explore the relationships between site-specific art and space set within its globalising contexts. Through close inspection of works such artists as Doris Salcedo, Langlands and Bell, Phyllida Barlow and Vong Phaophanit, Rugg considers how an interdisciplinary spatial theory can inform many elements of contemporary art. In clear, illustrated chapters, she engages with very contemporary spatial issues, including those of the environment, cultural identity and belonging, as well as experiences of displacement, migration and marginalisation and the effects of urbanization and tourism. For students and practitioners of fine arts, art theory and history, as well as those who are fascinated by site-specific art, this is an original and challenging exploration.

*Collection of Ancient Chinese Cultural Relics, Volume 6*, 2020-02-03 This book, a collection of ancient Chinese cultural relics from the Northern and Southern Dynasties from 960 to 1279. It covers jade and bronze ware, gold and silver ware and porcelain ware, pottery, porcelain, painting, calligraphy, and handicrafts. There are 363 relics in the book. In 960, Zhao Kuangtin, commander of the imperial guard troops of the later Zhou Dynasty staged a mutiny at Chenqiao and proclaimed himself emperor. He named his new dynasty the Song Dynasty and chose Dongling Kaifeng for the capital. This dynasty now called the Northern Song in history, gradually eliminated rival regimes and ended the separation of the Five Dynasties and Ten Kingdoms, co-existing with the Liao Regime established by the Qidan ethnic group and Western Xia Regime established by the Dangxian ethnic group. In 1127 Emperors Huizong and Quinzong were taken captive by the Jin Dynasty established by the Jurchen people, thus ending the Northern Song Dynasty. In the same year, Zhao Gou, then King of Song, established the imperial court of Song and moved the capital to Linhan (present day Hangzhou City in Zhejiang). This is what history calls the Southern Song Dynasty, and formed a glance at the Jin and Western Xia. In this period, thanks to easy politics and a relatively emancipated ideology, great achievements were obtained in various scientific technologies, theoretical trends, academic schools, religious thought and literary creation and the arts also showed an unprecedented prosperous science. Jade ware penetrated various aspects of social life, and he shapes, decorations and patterns all showed a distinctive secularisation. The invasion of northern nomads introduced a new cultural atmosphere to the Central Plains. The porcelain kilns could be found everywhere and finally developed into eight major systems: Ding, Yaozhou, Cizhou, Jun, Yuezhou, Longquan, Jingdezhen blueish white porcelain and Jian kilns. As well, there were four major royal kilns: Ru Kiln and Jun Kiln of the Northern Song Dynasty and Xiunesisi Kiln and Jiaotianxia Kiln of the Southern Dynasty. The arts of calligraphy and painting were typical representatives of the flourishing culture in the Song Dynasty. During this period an imperial art academy was founded, enlisting folk artists and a large number of professional painters were trained. Calligraphers of the Northern and Southern Song Dynasties inherited previous styles but also emphasised the representation of the individual subjective will. Other handicrafts developed: gold and silver ware tended to be light, handy and graceful. In the Song Dynasty, people

has less costly funerals so less jade has been unearthed. Those that have are in: Sichuan, Zhejiang and Jiangxis. The emphasis is on practical utensils, drinking vessels, dress adornments and accessories. At the same time, there was progress in the technologies of jade carving: layered piercing and large-scale jade ware. This book, the sixth in a ten-volume collection, brings to the English-speaking world a series of books from China which has been compiled by an Expert Committee of the Chinese Society of Cultural Relics. There are 363 descriptions.

Centrifugal fields are used to hold the liquid stationary phase while pushing the liquid mobile phase through it. This comprehensive reference covers recent advancements in the two types of CCC machines: the high speed CCCs without rotary seals and with coiled spools and centrifugal partition chromatographs (CPC) with rotary seals and interconnected channels. Written by leading international experts in the CCC field, the book focuses on the liquid nature of the stationary phase: giving newcomers the basis to do CCC efficiently and rapidly; explaining the art of obtaining a biphasic liquid system; describing the flow patterns in both CPC and high speed CCC machines; showing possible other uses of a liquid stationary phase; presenting a wealth of applications in the separation of organic, pharmaceutical and inorganic mixtures; and demonstrating that even supercritical fluids can be used in CCC.
