Lotus 98T Stephen Slater,2016-05-01 The Lotus 98T was the 1986-season, JPS-liveried F1 car driven by Ayrton Senna and team-mate Johnny Dumfries. Senna took eight podium positions, including two wins in the car, taking the fight to the superior McLarens and Williams. The 98T was one of the ultimate incarnations of an F1 car, powered by a Renault V6 turbo engine, which is conservatively estimated to have produced up to 1,300bhp at full boost. Senna was mighty to behold at the wheel of the 98T - he took pole position at eight of the season's 16 races, with victories in Spain and Detroit, famously crossing the line alongside Nigel Mansell in Spain, to win by 0.014s. This Manual, extensively illustrated with both period photographs and technical illustrations and photographs of a recently restored car, provides a fascinating insight into the design, evolution, operation, maintenance and restoration of the Lotus 98T.

Industrial Parsing of Software Manuals Sutcliffe,2023-11-27 The task of language engineering is to develop the technology for building computer systems which can perform useful linguistic tasks such as machine assisted translation, text retrieval, message classification and document summarisation. Such systems often require the use of a parser which can extract specific types of grammatical data from pre-defined classes of input text. There are many parsers already available for use in language engineering systems. However, many different linguistic formalisms and parsing algorithms are employed. Grammatical coverage varies, as does the nature of the syntactic information extracted. Direct comparison between systems is difficult because each is likely to have been evaluated using different test criteria. In this volume, eight different parsers are applied to the same task, that of analysing a set of sentences derived from software instruction manuals. Each parser is presented in a separate chapter. Evaluation of performance is carried out using a standard set of criteria with the results being presented in a set of tables which have the same format for each system. Three additional chapters provide further analysis of the results as well as discussing possible approaches to the standardisation of parse tree data. Five parse trees are provided for each system in an appendix, allowing further direct comparison between systems by the reader. The book will be of interest to students, researchers and practitioners in the areas of computational linguistics, computer science, information retrieval, language engineering, linguistics and machine assisted translation.

Integrated Assessment of Sustainable Energy Systems in China, The China Energy Technology Program Baldur Eliasson,Yam Yee Lee,2003 There is no progress without access to energy and no energy use without supporting technology. Only one sixth of the earth's population has an easy access to sufficient energy. The other five sixth will increase their demand for energy in the future. The global environmental problems we face will increasingly affect our daily life. Adjust and fair price for energy is necessary for comparing the pros and cons of energy technology application. The road to an objective analysis of an energy system is called Integrated Energy Analysis and covers a cradle-to-grave system approach. This book contains such an analysis of the electricity energy system in Shandong-Province, one of China's 32 Provinces. It also presents a decision support analysis tool. It should allow decision makers in China to choose the right system of electricity supply with minimum environmental impact and/or minimum true cost. The book contains a DVD, which contains a more extensive record of the research results obtained. It also contains all the tools, which have been developed. The methodology presented in this book and DVD is easily applicable to other Provinces in China and also other countries and regions. This research presents a pioneering effort in bringing together the three essential partners for any such research program, Industry, Academia and the Stakeholders, i.e. prospective users of the results. An important aspect of this international program with 75 participants was the leadership provided by a dedicated and professional Program Management Team from Industry. Developing a sustainable energy supply in China is an essential part of a global strategy to promote development while mitigating environmental pollution and the effect of greenhouse gas emissions.

Life As Carola Joan Grant,2016-10-27 HISTORICAL NOVEL? OR ONE OF THE MOST ASTOUNDING AUTOBIOGRAPHIES EVER WRITTEN? The memories of a wanderer in the stormy and licentious era of Renaissance Italy... Carola, the illegitimate child of an Italian nobleman, spent her childhood in a castle near Perugia until the day Fortune cast her into the hostile outer-world of 16th-century Italy. As a member of a group of strolling players, Carola was to gather both harsh experience and gentle wisdom from the strong man Bernard, from the harlot Lucia, from the hunchback-jester Petruchio, and from Sofia, who would be burned as a witch. Finally, when she finds her long-sought peace in love, the freedom she has won carries her triumphantly beyond the barrier of death and from her Life As Carola. “Here is an unusual book that shines with fire...that is packed with incident, that is vivid, dramatic and skillfully put together—and yet one that this reviewer finds harder to value correctly than any that has ever fallen into his hands.”—New York Times “During the last twenty years, seven books of mine have been published as historical novels which to me are biographies of previous lives I have known.”—Joan Grant, from her autobiography Far Memory
