Divided in five sections, the book covers the qualitative and quantitative properties of nanoencapsulated food ingredients by different characterization techniques, besides correlating nanocarrier behavior to their physicochemical and functional properties. Authored by a team of global experts in the fields of nano- and microencapsulation of food, nutraceutical, and pharmaceutical ingredients, this title is of great value to those engaged in the various fields of nanoencapsulation and nanodelivery systems. Shows how different properties of nanoencapsulated food ingredients can be analyzed Presents the mechanism of each characterization technique Investigates how

the analytical results can be understood with nanoencapsulated ingredients

The book is divided into two parts, the first of which presents an overview of interdisciplinarity in value-added networks and freight traffic. This includes an introduction to the topic and a description of an integrated framework of production, logistics, and traffic. Furthermore, it describes the barriers and challenges of interdisciplinary decision-making and project management. In turn, the second part presents domain-specific perspectives on interdisciplinary decision support, exploring domain-specific challenges of interdisciplinary interfaces and requirements for management methods and instruments from the standpoint of production management, logistics management, traffic management, and information technologies.

The Art of Living John Sellars,2018-01-18 This title was first published in 2003. Presenting philosophy as an art concerned with one's way of life, Sellars draws on Socratic and Stoic philosophical resources and argues for the ancient claim that philosophy is primarily expressed in one's behaviour. The book considers the relationship between philosophy and biography, and the bearing that this relationship has on debates concerning the nature and function of philosophy. Questioning the premise that philosophy can only be conceived as a rational discourse, Sellars presents it instead as an art (techne) that combines both 'logos' (rational discourse) and 'askesis' (training), and suggests that this will make it possible to understand better the relationship between philosophy and biography. The first part of this book outlines the Socratic conception of philosophy as an art and the Stoic development of this idea into an art of living, as well as considering some of the ancient objections to the Stoic conception. Part Two goes on to examine the relationship between philosophical discourse and exercises in Stoic

philosophy. Taking the literary form of such exercises as central, the author analyses two texts devoted to philosophical exercises by Epictetus and Marcus Aurelius.
