Cars of the Soviet Union Andy Thompson,2008 The story of the Soviet Union's cars has to be seen in the context of a planned society in which everything was planned well in advance, and consumer items were not a priority until well after the Second World War. This extraordinarily detailed study charts the history of Soviet cars from the birth of the Soviet Union in 1917 until its demise in 1990, with a conclusion about the post-Soviet era. It is the story of an insular, state-run car industry in which the carefully thought-out ideas of ministerial planners, rather than fickle customers in a free market, determined what cars were made in a country where the open road was often a 300-mile track across a windswept steppe.

Auta východního bloku Tušek Jan,2009-04-30 Bezkonkurenční ojedinelá publikace o automobilech značek Škoda, Tatra, Trabant, Wartburg, Polski Fiat, Dacia, Olcit, Moskvě, Lada, Volga, které neodmyslitelně patřily ke koloritu předlistopadové éry. Někdy jsme nad nimi ohrnovali nos a toužili po něčem lepším, většina z nás však stejně neměla na vybranou. Dnes se nad tím můžeme pousmát, zapomenout bychom však neměli. Nejen na dobu, ale ani na automobily, v nichž jsme tehdy jezdili. Najdete zde množství dosud nikde nepublikovaných údajů.

Improvised Employment of S-5 Air-To-Surface Rockets in Land Warfare N.R. Jenzen-Jones,Yuri Lyamin,2014-03-06 Air-to-surface rockets have fulfilled an important, improvised surface-to-surface role in numerous regional conflicts over the past thirty years. Makeshift rocket launchers have featured in conflicts in Afghanistan, Iran and Iraq, the former Yugoslavia, Georgia, Libya and, most recently, the ongoing conflict in Syria. Most prominent amongst the rockets used in this manner are those of the Soviet/Russian S-5 series.This report examines the history of the use of S-5 rockets in land warfare, and the technical and tactical merits of such systems.

Spring Shoots: Young Belarusian Poets in the Early Twenty-First Century Arnold McMillin, 2015-10-08 *Spring Shoots* introduces individually the early work of two score young Belarusian poets, all of whom began writing after the start of the present regime. This is the first such survey in any language, including Belarusian. All poetic illustrations are cited in the original and accompanied by English prose translations. The poets' work is presented in eight loosely thematic groups: the historical heritage, religion, protest at alienation and repression, use and defence of the language, the lyrical impulse, humour, performance poetry and the theme of writing itself and poetic inspiration. Also very important in these poems are the joys and tribulations of love. By using the Belarusian language, the poets are helping to save it from decades of erosion and official devaluation, so that their discussion of it is often poignant, particularly as language is a central part of the also suppressed historical heritage. Other types of verse such as

humorous, lyrical or that for performance, are less central to the Belarusian situation, but the angry and bitter protest poems serve as perhaps a release valve, as small editions of poems are far less conspicuous than the expression of such feelings on the street, which always meets bitter reprisals.

Growth And Inflation In The Soviet Economy Fyodor I Kushnirsky, 2019-09-10 While growth figures are high for Soviet industry in general, they are especially impressive for the MBMW sector which has far outperformed other sectors of the economy. The question widely debated in the U.S.S.R. now is whether these impressive figures actually reflect the growth of physical output. To put it differently, did the Soviet economy receive more machines and equipment as a result of this growth, and, if so, was the rate of real growth the same as the growth in value terms? But why would one raise such a question in the first place? To answer this and similar questions, the procedures of Soviet measurement of output, productivity, costs and prices have been analyzed in this study. Special attention is given to the processes of planning quality improvements and pricing new technological items. An analysis of procedures and methodological instructions used in planning and pricing MBMW products may be helpful in revealing possible discrepancies between prices of new goods and their quality characteristics.
