**Luger** John Walter, 2018-02-13 The distinctive look of the Luger and its role in German military history make it the world's most famous handgun. In *Luger*, renowned gun expert John Walter traces the history of this semiautomatic pistol from an early design by Hugo Borchardt in the 1890s through its use in the trenches of the First World War to the final days of the Third Reich in WWII. Other books on the Parabellum-Pistole, as the Luger was also known, focus strictly on narrow subjects like manufacturing details or accessories. While still offering the technical details to satisfy the collector, Walter provides a comprehensive narrative history. Readers will learn of the initial collaboration between Borchardt and Georg J. Luger, who patented the design in 1898. Following initial adoption by the Swiss Army, design refinements convinced the Imperial German Navy to order the sidearm, while the US Army passed on it following field trials in favor of the Colt. Production ramped up for World War I and the gun became a prized trophy for Allied soldiers in both that conflict and World War II. (German soldiers, aware of their desirability, even used them as bait for booby traps.) Today, it is still desired by collectors both for its unique design and for its connection to the history of Nazi Germany, and *Luger: The Story of the World's Most Famous Handgun* tells how it came to be.

**The P08 Luger Pistol** Guus De Vries, Bas J. Martens, 2001-07-19 The third volume of the Propaganda Photo Series, a unique series of books

on World War II small arms. Each volume covers all essential information on history & development, ammunition & accessories, codes & markings and contains photos of nearly every model and accessory. The most important quality of the Propaganda Photo Series however, is a unique selection of original German World War II propaganda photos, most never published before. The combination of solid information and original photos makes the Propaganda Photo Series the most extensive and reliable source of German small arms in-use, depicting the weapons and equipment as they were actually used. The P08 Luger pistol is probably the most famous pistol ever and has been the subject of a long list of publications. This book gives a concise history of the pistol (including production, codes and markings), its variants and accessories, but also offers new information on stocks, magazines and intended successors. Many new and special pictures. AUTHOR Guus de Vries is a historian, specialising in the field of firearms. Thus far, he has written fifteen books on firearms history, mostly together with Bas Martens, and numerous articles for magazines in Belgium, Germany, Finland, the Netherlands, Russia, the United Kingdom and the U.S.A. ILLUSTRATIONS 220 photographs

The Luger Neil Grant, 2018-09-20 Patented in 1898 and produced from 1900, Georg Luger's iconic semi-automatic pistol became synonymous with Germany's armed forces throughout both world wars. Initially chambered for the 7.65×21mm round, from 1902 the Luger was designed for DWM's 9×19mm round, which even today remains the most popular military handgun cartridge. It was adopted by the Imperial German Navy in 1904, followed by the German Army in 1908, receiving the name Pistole 08. Despite being supplanted by the Walther P38, the Luger remained in widespread service with all arms of Nazi Germany's armed forces throughout World War II, and even equipped East Germany's Volkspolizei in the years after 1945. Featuring full-colour artwork, expert analysis and archive and present-day photographs, this engaging study tells the story of the Luger, the distinctive and deadly semi-automatic pistol that has come to symbolize Germany's armed forces in the 20th century.

 the only hint  
 i can think of  
 without a  
 wiring diagram  
 handy is that  
 the power  
 ground to the  
 motor reverses  
 for up down if  
 it clicked at  
 the motor is  
 there any  
 chance of  
 wiring reversed  
 so it s trying  
 to go the other  
 way
