WIG Craft and Ekranoplan Liang Yun, Alan Bliault, Johnny Doo, 2009-12-03 In the last half-century, high-speed water transportation has developed rapidly. Novel high-performance marine vehicles, such as the air cushion vehicle (ACV), surface effect ship (SES), high-speed monohull craft (MHC), catamaran (CAT), hydrofoil craft (HYC), wave-piercing craft (WPC) and small water area twin hull craft (SWATH) have all developed as concepts, achieving varying degrees of commercial and military success. Prototype ACV and SES have achieved speeds of 100 knots in at calm con- tions; however, the normal cruising speed for commercial operations has remained around 35-50 knots. This is partly due to increased drag in an average coastal s- way where such craft operate services and partly due to limitations of the propulsion systems for such craft. Water jets and water propellers face limitations due to c- itation at high speed, for example. SWATH are designed for reduced motions in a seaway, but the hull form is not a low drag form suitable for high-speed operation. So that seems to lead to a problem - maintain water contact and either water propulsion systems run out of power or craft motions and speed loss are a problem in higher seastates. The only way to higher speed would appear to be to disconnect completely from the water surface. You, the reader, might respond with a question about racing hydroplanes, which manage speeds of above 200 kph. Yes, true, but the power-to-weight ratio is extremely high on such racing machines and not economic if translated into a useful commercial vessel.

*The Hovercraft* Ashley Hollebone,2012-08-01 The hovercraft was first created in 1959, when Sir Christopher Cockerell came up with a prototype that crossed the English Channel. The SRN1, the first ever hovercraft, is now proudly housed by the Science Museum and this very British invention enjoys an active role in many arenas, from travel, leisure cruising and racing to lifesaving and transporting goods. This detailed book delves into the history of the hovercraft, from the early days of its development through to the commercial and military applications of the craft. It looks into the exciting world of hovercraft leisure, cruising and racing from amateur to Formula 1, and also explores the important role the hovercraft plays in rescues whether on water or delivering aid around the world in places that helicopters can't reach. Finally, it details the types of hovercraft in use today, and what the future holds. The hovercraft is more than a product of 1960s Britain: it is one that has pushed the boundaries of transport as we look into the future and we have the back-shed culture of Britain to thank for its invention.

**The Caspian Sea Chessboard** Carlo Frappi,Azad Garibov,2014-10-02T00:00:00+02:00 Stuck in the middle of different as well as relevant regional complexes, the Caspian Sea basin represents a critical geopolitical hub in the heart of Eurasia landmass. Political, economic as well as strategic considerations contribute to determine the systemic relevance of the Caspian Sea, whose reputation in the West is mainly linked to the vast availability of largely untapped oil and gas resources. However, behind the fierce competition aimed at the exploitation and transportation of the basin’s hydrocarbons lies a much more complex picture, consisting of interlinked legal, military and soft power issues and threats. Aim of the volume – result of a joint research project conducted by the Center for Strategic Studies under the President of the Republic of Azerbaijan (SAM, Baku) and the Institute for International Political Studies (ISPI, Milan) – is to address the relevance of the Caspian Sea in the post-bipolar international system,

analyzing both soft and hard security threats emerging from the basin, as well as the policies of littoral and extra-regional actors.

**Sacrifices of Mo's Supporters** Wen Li, 2020-04-01 At the end of the Warring States Period, the Qin Kingdom began to become more and more powerful after the Shang Martingale Change Method was adopted. After the internal strife of Lao Ai and Lu Buwei, the First Emperor, Ying Zheng, appointed Li Si as the prime minister, and Wang Jian and Huan Gonggong as the grand generals. This action infuriated all the people in the world. Some of them raised their hands to fight back, and the most powerful force was the Mo family. Since the Mo family had always followed the strategy of loving each other but attacking each other, the world's righteous scholars all responded, and those who responded threw life and death away, and the people of the martial world all revered them as ink people. Faced with the pressure of the Blizzard Qin, could the Mo family turn the tide? This was how a life-and-death duel would begin? [Previous Chapter] [Table of Contents] [Next Chapter]
