Chinese Strategy and Military Modernization in 2015 Anthony H.

Cordesman,Steven Colley,2016-01-12 China's emergence as a global economic superpower, and as a major regional military power in Asia and the Pacific, has had a major impact on its relations with the United States and its neighbors. China was the driving factor in the new strategy the United States announced in 2012 that called for a "rebalance" of U.S. forces to the Asia-Pacific region. At the same time, China's actions on its borders, in the East China Sea, and in the South China Sea have shown that it is steadily expanding its geopolitical role in the Pacific and having a steadily increasing impact on the strategy and military developments in other Asian powers.

Experimental Animation Miriam Harris,Lilly Husbands,Paul

Taberham,2019-02-14 *Experimental Animation: From Analogue to Digital*, focuses on both experimental animation's deep roots in the twentieth century, and its current position in the twenty-first century media landscape. Each chapter incorporates a variety of theoretical lenses, including historical, materialist, phenomenological and scientific perspectives. Acknowledging that process is a fundamental operation underlining experimental practice, the book includes not only chapters by international academics, but also interviews with well-known experimental animation practitioners such as William Kentridge, Jodie Mack, Larry Cuba, Martha Colburn and Max Hattler. These interviews document both their creative process and thoughts about experimental animation's ontology to give readers insight into contemporary practice. Global in its scope, the book features and discusses lesser known practitioners and unique case studies, offering both undergraduate and graduate students a collection of valuable contributions to film and animation studies.

New Connectivities in China Pui-lam Law,2012-03-30 The fast diffusion of information and communication technologies (ICTs) in China has brought forth new forms of connection among the Chinese and has changed their social lives. Virtual networks have been developed and in turn have led to the formation of networks in the actual world. This collection explores the resultant complications in the relationship between virtual, actual, and local interactions. It discusses various aspects of the implications of the new connectivities on these three types of interactions in China. The topics examined include: the possibility of the development of civil society in China, the implications for the migrant workers in the south, the challenge posed to the traditional social order, and the relationship between the new connectivities and the Chinese social context.

China's Naval Power Yves-Heng Lim,2016-05-23 The rapid modernization of the Chinese Navy is a well-documented reality of the post-Cold War world. In two

decades, the People's Liberation Army Navy has evolved from a backward force composed of obsolete platforms into a reasonably modern fleet whose growth is significantly shaking the naval balance in East Asia. The rationale behind China's contemporary rise at sea remains, however, difficult to grasp and few people have tried to see how the current structure of the international system has shaped Chinese choices. This book makes sense of Chinese priorities in its naval modernization in a 'robust' offensive realist framework. Drawing on Barry Posen's works on sources of military doctrine, it argues that the orientation of Beijing's choices concerning its naval forces can essentially be explained by China's position as a potential regional hegemon. Yves-Heng Lim highlights how a rising state develops naval power to fulfil its security objectives, a theoretical perspective that goes farther than the sole Chinese case.

China's Evolving Surface Fleet Peter Dutton, Ryan D. Martinson, 2017 Over the past fifteen years, the People's Liberation Army Navy's (PLAN's) missile fast-attack craft and amphibious fleets have been significantly modernized. While these two types of vessels have not increased in numbers, their capabilities have increased exponentially. This publication examines the People's Liberation Army's (PLA's) doctrine and training strategy in order to analyze present and predict future missions by these military vessels. China's deterrence posture is improved greatly by these ships and boats, which aid coastal water defense, and threaten Taiwanese attempts to gain independence. In addition, these two fleets improve China's long-range sealift capabilities, and help with the PLA's traditional, and new, nontraditional security practices. These fleets allow the PLAN to continue offshore operations, and begin blue-water, or far-seas operations, helping the United States to predict the future nature of Chinese maritime missions. The Impact of Chinese Naval Modernization on the Future of the United States Navy Ronald O'Rourke, 2006 China's rapidly developing military capabilities have forced US policy makers to reconsider their own military infrastructure. The primary concern of this book is to examine how China's military modernisation will be factored into decisions about US Navy programs. Several elements of China's military modernisation have potential implications for future required US Navy capabilities. These include theatre-range ballistic missiles (TBMs), land-attack cruise missiles (LACMs), anti-ship cruise missiles (ASCMs), surface-to-air missiles (SAMS), land-based aircraft, submarines, surface combatants, amphibious ships, naval mines, nuclear weapons, and possibly high-power microwave (HPM) devices. This book will examine how these elements and others will influence the future of the United States Navy.

The Rise of China Douglas C. Lovelace, Jr., 2015-11-05 Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 139, The Rise of China, examines the strategic implications of China's increasing economic and military power for the international community. Regional and global reactions to the growth of Chinese economic investment and property acquisitions are considered, along with responses to border disputes and other contentious regional issues. The documents in this volume include several reports and studies prepared by the U.S.-China Economic and Security Commission, examining such topics as: the evolving state of the overall military relationship between the U.S. and China; the development of China's Navy; China's establishment of an Air Defense Identification Zone (ADIZ); Chinese legal views on cyberspace and cybersecurity; general trends in U.S.-Chinese science and technology cooperation; and the impact of Chinese economic development on the United States.

China's Diplomacy in Eastern and Southern Africa Seifudein Adem, 2016-05-23

In contemporary discourse on China-Africa relations, there are, on the one hand, the Sino-pessimists who see China as a giant vacuum-cleaner, sucking up Africa's resources in order to fuel its own rapid industrialization, and destroying Africa's development potential in the process. On the other hand, the Sino-optimists see China as the ultimate savior of Africa, capable of or willing to 'develop' the continent. Between the two divergent schools of thought are those sitting on the fence for the time being, the Sino-pragmatists, who are less sanguine for sure about what Africa would gain from China-Africa relations, but are nevertheless willing to reserve judgment until the dust settles. This book is innovative in two ways: it introduces a regional approach to the study of China-Africa relations by focusing on Eastern and Southern Africa; and it puts forward a disciplinary framework-disciplinary in both senses of that term- for interrogating the burgeoning literature about China-Africa relations by conceptualizing the three schools of thought mentioned above.

The Sinitic Civilization Book II Hong Yuan, 2018-11-14 The Sinitic Civilization A Factual History through the Lens of Archaeology, Bronzeware, Astronomy, Divination, Calendar and the Annals The book covered the time span of history of the Sinitic civilization from antiquity, to the 3rd millennium B.C. to A.D. 85. A comprehensive review of history related to the Sinitic

cosmological, astronomical, astrological, historical, divinatory, and geographical developments was given. All ancient Chinese calendars had been examined, with the ancient thearchs' dates examined from the perspective how they were forged or made up. The book provides the indisputable evidence regarding the fingerprint of the forger for the 3rd century A.D. book Shang-shu (remotely ancient history), and close to 50 fingerprints of the forger of the contemporary version of The Bamboo Annals. Using the watershed line of Qin Emperor Shihuangdi's book burning of 213 B.C., the book rectified what was the original history before the book burning, filtered out what was forged after the book burning, sorted out the sophistry and fables that were rampant just prior to the book burning, and validated the history against the records in the oracle bones, bronzeware, and bamboo slips. The book covers 95-98% and more of the contents in the two ancient history annals of The Spring Autumn Annals and The Bamboo Annals. There are dedicated chapters devoted to interpreting Qu Yuan's poem Asking Heaven (Tian Wen), the mythical book The Legends of Mountains & Seas (Shan Hai Jing), geography book Lord Yu's Tributes (Yu Gong), and Zhou King Muwang's Travelogue (Mu-tian-zi Zhuan). The book has appendices of two calendars: the first anterior quarter remainder calendar (247 B.C.-104 B.C./247 B.C.-85 A.D.) of the Qin Empire, as well as a conversion table of the sexagenary years of the virtual Yin-li (Shang dynasty) quarter remainder calendar versus the Gregorian calendar, that covers the years 2698 B.C. to 2018 A.D. Book I stops about the midpoint of the 242 years covered in Confucius' abridged book The Spring & Autumn Annals (722-481 B.C.). Book II stops at Han Emperor Zhangdi (Liu Da, reign A.D. 76-88; actual reign Aug of A.D. 75-Feb of A.D. 88), with the A.D. 85 adoption of the Sifen-li posterior quarter remainder calendar premised on reverting to the sexagenary years of the virtual Yin-li (Shang dynasty) quarter remainder calendar, a calendar disconnected from the Jupiter's chronogram, that was purportedly invented by the Confucians on basis of Confucius' identifying the 'qi-lin' divine giraffe animal and wrapping up the masterpiece The Spring & Autumn Annals two years prior to death.

The Evolution of Military Power in the West and Asia Pauline Eadie, Wyn Rees, 2015-09-16 This book investigates how states in both the West and Asia have responded to multi-dimensional security challenges since the end of the Cold War, focusing on military transformation. Looking at a cross-section of different countries, this volume assesses how their armed forces have responded to a changing international security context. The book investigates two main themes. First, how the process of military 'transformation'- in terms of technological advances and new ways of conducting warfare - has impacted on the militaries of various countries. These technologies are hugely expensive and the extent to which different states can afford them, and the ability of these states to utilise these technologies, differs greatly. Second, the volume investigates the social dimensions of military transformation. It reveals the expanding breadth of tasks that contemporary armed forces have been required to address. This includes the need for military forces to work with other actors, such as non-governmental agencies and humanitarian organisations, and the ability of armed forces to fight asymmetric opponents and conduct post-conflict reconstruction tasks. The conflicts in Iraq and Afghanistan exemplified how important the relationship

between technological and social transformation has become. This book will be of much interest to students of strategic studies, military innovation, Asian politics, security studies and International Relations.
