US World War II Amphibious Tactics Gordon L. Rottman,2012-09-20 The US armed forces were responsible for many tactical innovations during the years 1941-45, but in no field was US mastery more complete than amphibious warfare. In the vast, almost empty battlefield of the Pacific the US Navy and Marine Corps were obliged to develop every aspect of the amphibious assault landing in painstaking detail, from the design of many new types of vessel, down to the tactics of the rifle platoon hitting the beach, and the logistic system without which they could not have fought their way inland. This fascinating study offers a clear, succinct explanation of every phase of these operations as they evolved during the war years, illustrated with detailed color plates and photographs.

**Annual Review of Scalable Computing** Yuen Chung Kwong,2000-09-29 This book provides a forum for researchers in scalable computing to publish extended-

length articles on significant new developments. An article may present comprehensive results from a major project, review recent work in a sub-domain, or expound new ideas in a detailed, tutorial fashion, at a length which most journals and conference proceedings cannot accommodate. The five articles in this book give an excellent illustration of the different types of material requiring such extensive treatment, and should serve well to encourage future authors with similar ideas to consider publishing in the Series on Scalable Computing. Contents: Active Objects: A Software Structure for Cluster-Based Systems (C K Yuen) Scalable Optimistic Parallel Simulation (Y M Teo & S C Tay) High Performance Fortran for Advanced Applications (S Benkner) Inter Process Communication Optimization in a Scalable Computing Cluster (O La'adan & A Barak) Designing Superservers with Clusters and Commodity Components (Z Xu & K Hwang) Readership: Researchers in computer science. Keywords: Active Objects; BaLinda; Clusters; High Performance; Fortran; IPC; Parallel Programming; Simulation; Superservers

**Armor**, 1993 The magazine of mobile warfare.

**American Tanks & AFVs of World War II** Michael Green, 2014-07-20 The entry of the US into World War II provided the Allies with the industrial might to finally take the war to German and Japanese forces across the world. Central to this was the focus of the American military industrial complex on the manufacture of tanks and armoured fighting vehicles. Between 1939 and 1945, 88,140 tanks and 18,620 other armored vehicles were built – almost twice the

number that Germany and Great Britain combined were able to supply. In this lavishly illustrated volume, armour expert Michael Green examines the dizzying array of machinery fielded by the US Army, from the famed M4 Sherman, M3 Stuart and M3 Lee through to the half-tracks, armored cars, self-propelled artillery, tank destroyers, armored recovery vehicles and tracked landing vehicles that provided the armoured fist that the Allies needed to break Axis resistance in Europe and the Pacific. Publishing in paperback for the first time and packed with historical and contemporary colour photography, this encyclopedic new study details the design, development, and construction of these vehicles, their deployment in battle and the impact that they had on the outcome of the war.

US Marine Corps in the Second World War Michael Green, 2018-06-30 The United States Marine Corps played a leading role in the war against Japan from Pearl Harbor in December 1941 until VJ Day on September 2, 1945. Living up to its motto the First to Fight, the 1st Marine Division landed on the Japanese-occupied island of Guadalcanal in the south Pacific on August 7, 1942 and fought its way up the central Solomon Island to Cape Gloucester in the territory of New Guinea. In October 1942, the Marine Corps captured Tarawa Atoll and so began their advance across the central Pacific, fighting many famous and bloody battles such as Saipan, Tinian, Guam, Iwo Jima, and finally the 82-day epic struggle for Okinawa. These victories came at high cost, with 19,737 Marine killed and 67,207 wounded. This classic Images of War title

presents a graphic overview of the Corps' legendary campaign in text and contemporary images. The author expertly describes the full range of Marine Corps weaponry and explains their organization, tactics, and fighting doctrine.
