Metallurgical Coatings and Thin Films 1992 G.E.

McGuire, S. Hofmann, B.D. Sartwell, 2012-12-02 One of the increasingly important requirements for high technology materials is that they possess near-surface properties different to their bulk properties. Specific surface properties are generally achieved through the use of these films or coatings or by modifying the structure or composition of the near surface. This two-volume work contains 157 papers covering a wide range of topics involving films, coatings, and modified surfaces. All aspects of the development of deposition technologies are addressed including basic research, applied research, applications development and full scale industrial production. The work will be of interest to materials scientists, physicists, electronic, chemical and mechanical engineers, and chemists.

Classifying the Absolute Toral Rank Two Case

Helmut Strade, 2009-09-04 The problem of classifying the finite-dimensional simple Lie algebras over fields of characteristic $p > 0$ is a long-standing one. Work on this question during the last 45 years has been directed by the Kostrikin-Shafarevich Conjecture of 1966, which states that over an algebraically closed field of characteristic $p > 5$ a finite-dimensional restricted simple Lie algebra is classical or of Cartan type. This conjecture was proved for $p > 7$ by Block and Wilson in 1988. The generalization of the Kostrikin-Shafarevich Conjecture for the general case of not necessarily restricted Lie algebras and $p > 7$ was announced in 1991 by Strade and Wilson and eventually proved by Strade in 1998. The final Block-Wilson-Strade-Premet

Classification Theorem is a landmark result of modern mathematics and can be formulated as follows: Every finite-dimensional simple Lie algebra over an algebraically closed field of characteristic $p > 3$ is of classical, Cartan, or Melikian type. In the three-volume book, the author is assembling the proof of the Classification Theorem with explanations and references. The goal is a state-of-the-art account on the structure and classification theory of Lie algebras over fields of positive characteristic leading to the forefront of current research in this field. This is the second part of the three-volume book about the classification of the simple Lie algebras over algebraically closed fields of characteristics > 3 . The first volume contains the methods, examples, and a first classification result. This second volume presents insight in the structure of tori of Hamiltonian and Melikian algebras. Based on sandwich element methods due to Aleksei. I. Kostrikin and Alexander A. Premet and the investigation of absolute toral rank 2 simple Lie algebras over algebraically closed fields of characteristics > 3 is given.

The Defeat of the Zeppelins Mick

Powis,2017-10-30 Mick Powis describes the novel threat posed to the British war effort by the raids of German airships, or Zeppelins, and the struggle to develop effective defenses against them. Despite their size and relatively slow speed, the Zeppelins were hard to locate and destroy at first. They could fly higher than existing fighters and the early raids benefited from a lack of coordination between British services. The development of radio, better

aircraft, incendiary ammunition, and, above all, a more coordinated defensive policy, gradually allowed the British to inflict heavy losses on the Zeppelins. The innovative use of seaplanes and planes launched from aircraft carriers allowed the Zeppelins to be intercepted before they reached Britain and to strike back with raids on the Zeppelin sheds. July 1918 saw the RAF and Royal Navy cooperate to destroy two Zeppelins in their base at Tondern (the first attack by aircraft launched from a carrier deck). The last Zeppelin raid on England came in August 1918 and resulted in the destruction of Zeppelin L70 and the death of Peter Strasser, Commander of the Imperial German Navy's Zeppelin force.

Zeppelins Charles Stephenson, 2012-03-20 On 2

July 1900 the people of Friedrichshafen, Germany, witnessed a momentous occasion the first flight of LZ 1, Count Ferdinand von Zeppelin's first airship. Although deemed a failure, a succession of better craft (LZ2 to 10) enabled the Zeppelin to expand into the consumer market of airship travel, whilst also providing military craft for the German Army and Navy. The years of the Great War saw the Zeppelins undertake strategic bombing missions against Great Britain. This title covers the post-war fate of the Zeppelins, including the crash of the Hindenburg, and their use by the Luftwaffe at the beginning of World War II.
