The Encyclopedia of the Vietnam War [4 volumes] Bloomsbury Publishing, 2011-05-20 Now in its second edition, this comprehensive study of the Vietnam War sheds more light on the longest and one of the most controversial conflicts in U.S. history. The Vietnam War lasted more than a decade, was the longest war in U.S. history, and cost the lives of nearly 60,000 American soldiers, as well as millions of Vietnamese—many of whom were uninvolved civilians. The lessons learned from this tragic conflict continue to have great relevance in today's world. Now in its second edition, *The Encyclopedia of the Vietnam War: A Political, Social, and Military History* adds an entire additional volume of entries to the already exhaustive first edition, making it the most comprehensive reference available about one of the most controversial events in U.S. history. Written to provide multidimensional perspectives into the conflict, it covers not only the American experience in Vietnam, but also the entire scope of Vietnamese history, including the French experience and the Indochina War, as well as the origins of the conflict, how the United States became involved, and the extensive aftermath of this prolonged war. It also provides the most complete and accurate order of battle ever published, based upon data compiled from Vietnamese sources. This latest release delivers even more of what readers have come to expect from the editorship of Spencer C. Tucker and the military history experts at ABC-CLIO.

US Army AH-1 Cobra Units in Vietnam Jonathan Bernstein, 2012-11-20 Bell's AH-1 Cobra was the first dedicated helicopter gunship to reach frontline service anywhere in the world. Developed as a private venture by the manufacturer, and based on the mechanics of the ubiquitous UH-1 Huey, the Cobra proved a huge success once

introduced into combat with the US Army in 1966. Built as a key weapon in the Advanced Aerial Fire Support System concept of 1965, the AH-1 was one of the few aircraft to reach the combat zone after actual combat experience went into its design. The AH-1 helped reduce the losses being suffered by vulnerable troop transport helicopters by providing effective fire suppression during airmobile operations. This book explores its history, technology and crew.

Boots on the Ground Dick Camp, 2012 Immediately following 9/11, the United States needed to strike back . . . but against whom? In the eyes of the intelligence community, the aerial attack on the World Trade Center and Washington, D.C., bore all the signs of an al-Qaeda operation. This was soon verified by al-Qaeda itself, as Osama bin Laden claimed credit. America quickly targeted al-Qaeda and the Taliban regime in Afghanistan that was

providing them sanctuary. Central Command, responsible for the Middle East, including Afghanistan, outlined three options: strike back with cruise missiles, strike back with cruise missiles and manned bombers, or complement aerial attacks with American ground forces: "boots on the ground." President George W. Bush wanted direct action, so American ground forces, supported by American airpower and cruise missiles, became the order of the day. Initially, the boots were worn by CIA covert operatives and U.S. Army Special Forces teams, the famed Green Berets. Bush authorized the CIA an additional \$1 billion to drive al-Qaeda and the Taliban from power. On 17 September 2001, Bush authorized the CIA to engage al-Qaeda and other terrorist organizations anywhere in the world and assassinate individuals designated as terrorists. It was the broadest and most lethal authority in the agency's history. The CIA deployed teams across Afghanistan to work with the Northern Alliance and U.S. Army Special Forces. The results were immediate and positive. The Northern Alliance had the Taliban and al-Qaeda on the run with a remarkable combination of "horse soldiers" and high-tech U.S. airpower called in by American special operations forces. Late in November, U.S. Marine Corps Task Force 58 seized an airstrip southwest of the Taliban stronghold of Kandahar in the longest amphibious raid in history, 450 miles from the sea. In early December, Kandahar fell to forces loyal to Hamid Karzai, who would later become president of Afghanistan. It was the last remaining Taliban stronghold in the country. Al-Qaeda and Taliban leadership fled. Acclaimed military historian Dick Camp details this remarkable campaign for Afghanistan. He also provides a comprehensive history of the Soviet invasion of Afghanistan and the Red Army's unsuccessful occupation of the country, which led to the rise of the Afghani

mujahideen and anti-Soviet foreign fighters under al-Qaeda, as well as the subsequent rise of the Taliban.

Alabama Warbird Survivors 2003 Harold A. Skaarup, 2002-10 Some of the finest military warbirds in American aviation history are still flying in the Southern State of Alabama. Many of them are on display in a number of excellent air museums, or they have been mounted on pylons to stand as memorials to the many military aviators who called Alabama home. This handbook is designed to provide aviation enthusiasts with a simple locating guide on where to find Alabamays retired warbirds within the state. Many of the aircraft can be found in the Southern Museum of Flight, Birmingham; the United States Army Aviation Museum; the US Space and Rocket Center at Huntsville; Battleship Memorial Park at Mobile;

Maxwell AFB Park at Montgomery; or in the hands of private owners and collectors. The handbook provides photographs of many of the aircraft preserved in Alabama, along with a brief description and history of its service within the US armed forces. The aircraft are listed alphabetically by manufacturer, number and aircraft type. Famous aircraft found on display in Alabama include the Lockheed A-12 Blackbird, and a number of very rare flying machines such as the gigantic one of a kind Boeing Vertol XCH-62 Heavy Lift Helicopter not found in other aviation museums.

The Proton Launcher Christian Lardier, Stefan Barensky, 2018-02-14 The Soviet / Russian space program was in the hands of three industrial empires: those of Serguei Korolev, the Soviet von Braun who launched Sputnik-1 and Yuri Gagarin, Vladimir Tchelomei, his main competitor, and Mikhail Yangel, Many launchers and satellites in Ukraine. In 2011, we published a first book on the history of the Soyuz launcher that was developed by Korolev and launched more than 1,800 copies. This time, we tell the story of the Proton, the main competitor of the European launcher Ariane, which was developed by Chelomei and launched more than 400 copies. Finally, the last book of the trilogy will deal with the many developments of Yangel. In the three books, the first part deals with the history of rockets in the USSR / Russia (East) and the second part on the history of their commercialization in the West.

The Flight Clair F. Runyan, 1991

California Warbird Survivors 2002 Harold A. Skaarup, 2002-07-18 During the twentieth century, civil and military aviation has played a prominent role in the history and development of California. Commercial operators have exploited the advantages offered by aircraft to overcome its unique

challenges of geography and climate. By virtue of California's comparative size and strategic importance on the West Coast of the continental USA, a wide variety of military aircraft have been based there through the years. The list of military aircraft types that made up the tapestry of California aviation is as extensive as the list of legendary figures who have contributed to its amazing history. While most of the military aircraft types no longer grace the airspace over California, many can be viewed in their former splendor as they stand as gate guards or museum exhibits. This booklet provides a comprehensive guide to where these restored aircraft can be found. Complementing the details concerning aircraft specifications and roles, the author has included many facts. Finally, the descriptions of the recovery, restoration and preservation efforts stand as a tribute to the many volunteers who have devoted time, energy and financial support to ensure this rich heritage is preserved.
