**M24 Chaffee Light Tank 1943–85** Steven J. Zaloga, 2022-02-17 The history of US light tanks during World War II is a chequered one. The Light Battalions of US Armored Divisions were initially filled with M3A1 and M5 Stuart tanks, however, on the battlefields of North Africa it was realised that these were disastrously under armoured and gunned, and a replacement, or the abandonment of light tank doctrine, was desperately needed. It wasn't until the last few months of WWII that the M24 Chaffee came into service and it was extensively used in combat from the Battle of the Bulge to the final campaigns in Germany. This book will trace the history of this design, its combat record in World War II, its many variants, and its extensive combat record post 1945.

M24 Chaffee Light Tank Technical Manual: TM 9-729 Department of the Army, 2013-08 The Light Tank M24 was an American tank used during the later part of World War II and in postwar conflicts including the Korean War and, with the French, in the War in Algeria and the First Indochina War. In British service it was given the service name Chaffee, after the United States Army General Adna R. Chaffee, Jr., who helped develop the use of tanks in the United States armed forces. In April 1943, the Ordnance Corps, together with Cadillac division of General Motors, started work on the new project, designated Light Tank T24. Every effort was made to keep the weight of the vehicle under twenty tons. The armor was kept light, with the glacis plate only twenty five mm thick (but sloped at sixty degrees from the vertical). A new lightweight 75 mm gun was developed, a derivative of the gun used in the B-25H Mitchell bomber. The gun had the same ballistics as the M3, but used a thinly walled barrel and different recoil mechanism. The design also featured wider (sixteen inch) tracks and torsion bar suspension. It had a relatively low silhouette and a three-man turret. On October 15, 1943 the first pilot vehicle was delivered and production began in 1944 under the designation Light Tank M24. By the time production was stopped in August 1945, 4,731 M24s had left the assembly lines. Created in 1951, this technical manual reveals a great deal about the Chaffee's design and capabilities. Intended as a manual for those charged with operation and maintenance, it details many aspects of its engine, cooling, power and other systems. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

**M24 Chaffee, Vol. 1** David Doyle, 2019-11-28 The M24 Chaffee was the finest light tank developed by the US during WWII. This tank was developed by Cadillac, which, along with farm equipment manufacturer Massey-Harris, produced the vehicles. These tanks were used by the US during WWII and Korea and, during the post-WWII era, were supplied to numerous allied nations. This book chronicles the development and use of the vehicle from concept to combat. Through dozens of archival photos, many never before published, as well as detailed photographs of some of the finest existent examples of these vehicles, this iconic tank hunter is explored and its history is explained.

M24 Chaffee, Vol. 2 David Doyle, 2020-06-28 The M24 Chaffee was the finest light tank developed by the US during WWII. Utilizing the M24 chassis--developed by Cadillac--the US Army procured a family of fighting vehicles, including the M19 Twin 40 mm Gun Motor Carriage, the M37 105 mm Howitzer Motor Carriage, and the M41 155 mm Howitzer Motor Carriage, all of which are covered in this second volume on the Chaffee. While all of these motor carriages were too late to see combat in WWII, all were widely used during the Korean War, with many at the front of the fighting. This book chronicles the development and use of these vehicles from concept to combat. Through dozens of archival photos, many never before published, as well as detailed photographs of some of the finest existent examples of these vehicles, this iconic tank hunter is explored and its history is explained.

T-34-85 vs M26 Pershing Steven J. Zaloga,2011-12-20 A hotly-debated topic amongst tank buffs is of the relative merits of the Soviet and American tanks of World War II. Using recently revealed documents, Steven Zaloga sheds light on the crucial tank battles of the Korean War as the rival superpowers' finest tanks battled for supremacy. The Soviet-equipped North Korean Peoples Army initially dominated the battlefield with the seemingly unstoppable T34-85. As US tank battalions hastily arrived throughout the late summer and early autumn of 1950, the M26 Pershing took the fight to North Korea with increasing success.

*The Burning Chaffees* Balram Singh Mehta,2021-12-27 In 1971, India waged a momentous war against Pakistan. But before all-out war, an even more significant tank battle was fought on 21 November 1971 by the C Squadron 45 Cavalry, which demolished the Pakistani General A.A.K. Niazi's plans of victory and set the stage for the utter routing of the Pakistani Army. Equipped with the amphibious PT-76 tanks, the Indian Army's C Squadron 45 Cavalry was unleashed to swim across the River Kabodak, near the Boyra salient (now in Bangladesh), to counter the threat from East Pakistan. On 21 November 1971, the two warring armies clashed in a tank versus tank battle at Garibpur. In one fell swoop, Pakistan's 3 (Independent) Armoured Squadron, consisting of fourteen American M-24 Chaffee tanks, was completely destroyed and two of its infantry battalions were badly mauled. This was followed by the shooting down of three Sabre F-86 jets for the loss of two PT-76 tanks on the Indian side. And thus, the biggest attack planned by General A.A.K. Niazi to teach the Indians and the Mukti Bahini a lesson had gone up in smoke. This battle was a victory and a decisive one at that. It was a trumpet call to the rest of the world of India's intent to stand up for human liberty and dignity in this war of liberation. On 3 December 1971, Pakistan declared war. The rest is history. *The Burning Chaffees* is a thrilling account of the pivotal battle of 21 November by Brigadier B.S. Mehta.

*Tm9-1729c Ordnance Maintenance Light Tank M24 Chaffee: And 155-MM Howitzer Motor Carriage M41 Technical Manual* War Department,2013-05-07 The Light Tank M24 was an American tank used during the later part of World War II and in postwar conflicts including the Korean War and, with the French, in the War in Algeria and the First Indochina War. The M41 155-mm Howitzer Motor Carriage was based on the M24 Chaffee Light Tank fitted with an M1 155-mm Howitzer. In addition to the Howitzer, the M41 carried twenty two rounds of 155-mm ammunition. Also known as the Gorilla, the M41 eventually saw action in Korea. Created in 1947, this technical manual reveals a great deal about both the Chaffee's and M41's design and capabilities. Intended

as a manual for those charged with maintenance, it details many aspects of the Chaffee's track and suspension, hull, turret and other systems. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.

**Designing the T-34** Peter Samsonov,2019-12-27 When the German army launched Operation Barbarossa ☐ the invasion of the Soviet Union ☐ on June 22, 1941, it was expecting to face and easily defeat outdated and obsolete tanks and for the most part it did, but it also received a nasty shock when it came up against the T-34. With its powerful gun and sloped armour, the T-34 was more than a match for the best German tanks at that time and the Germans regarded it with awe. German Field Marshal von Kleist, who commanded the latter stages of Barbarossa, called it ☐ the finest tank in the world☐ . Using original wartime documents author and historian Peter Samsonov, creator of the Tank Archives blog, explains how the Soviets came to develop what was arguably the war☐ s most revolutionary tank design.

**The Whirlwind War** Frank N. Schubert,1995 CMH Publication 70-30. Edited by Frank N. Schubert and TheresaL. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

**Tanks, 76-MM Gun M41 and M41a1 Walker Bulldog: FM 17-80** Department of the Army,2013-10 The M41 Walker Bulldog was a U.S. light tank developed to replace the M24 Chaffee. While the M24 Chaffee was a successful design, its main gun was not effective enough against well armored opposition. Although the primary mission of a light tank was scouting, the U.S. Army wanted one with more powerful armament. The development of the new tank, T37, began in 1947. The vehicle was designed to be air-transportable, and the desired anti-tank capabilities were provided by installing a long 76-mm gun with an advanced rangefinder. In 1949, with the adoption of a less ambitious rangefinder, the project's designation was changed to T41. Production started in 1951 at Cadillac's Cleveland Tank Plant, and by 1953 the tank replaced the M24 in the United States Army. Initially the M41 was nicknamed Little Bulldog, then renamed Walker Bulldog after General Walton Walker, who was killed in a jeep accident in Korea in 1950. The Walker Bulldog saw limited combat with the

U.S. Army during the Korean War, but for the most part, the conflict served as a testing ground to work out the tank's rangefinder. In 1954, the M41A1 variant was produced with a hydraulic turret traverse instead of an electrical one. The more compact system allowed for increased ammunition. Created in 1956, this field manual reveals a great deal about the M41 and M41A1's design and capabilities. Intended as a manual for those charged with operation and maintenance, it details the sighting equipment, crew formations, firing duties and more. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text.
