Bison the White Buffalo Dr. Jamey M. Long,2023-11-10 The War Between the States has since ended but tension with the Native American tribes continued over the loss of their land. During the time of restoration, the United States had begun building a railroad to connect its eastern and western shores. In 1869, the east and west railroads were connected by a golden spike in Promontory Summit in the Utah Territory creating the Transcontinental Railroad. /span Train cars and locomotives began to bring travelers across the country. Many of these travelers were pioneers hoping to begin a peaceful life in the great wilderness, while others were hunters looking to become rich by hunting the noblest of all animals, the buffalo. Read along and see if Bison is able to help save his friends from the hunters and the settling of the American West in Bison the White Buffalo./span

European Bison Małgorzata Krasińska,Zbigniew Krasiński,2013-06-19 The mighty and majestic European bison is the relictual embodiment of the wildness of prehistoric Europe. Tragically, the millennia since that time have seen so many species driven to extinction by human impacts, and the European bison has only narrowly avoided the same fate. Today, the species represents the symbolic sentinel of successful conservation actions in a world in which such achievements remain few and far between. From an early stage in the restitution of the European bison, husband-and-wife team Małgorzata Krasińska and Zbigniew A. Krasiński have been participating in relevant management initiatives and researching all facets of the bison, from its morphology and diet, to its movements, social life and reproduction, and the conservation management actions that have been taken to save it. Now they have summarised this wealth of knowledge on the species, giving rise to a publication ideal for students, professional biologists and conservationists, but also for all nature enthusiasts. This new edition of the monograph offers extensively updated content taking into account research carried out on the European bison in the last few years. Also featured, a new chapter devoted to knowledge of the genetics of the species drawn up by Małgorzata Tokarska of the Białowieża-based Mammal Research Institute PAS.
