2017 Annual Competitiveness Analysis And Impact Of
Exchange Rates On Foreign Direct Investment Inflows To
Asean Economies Khee Giap Tan,Trieu Duong Luu Nguyen,Hui

Yin Chuah, Duy Nguyen, 2018-11-27 This book titled 2017 Annual Competitiveness Analysis and Impact of Exchange Rates on Foreign Direct Investment Inflows to ASEAN Economies recount the development experience of ASEAN over the past 50 years, describe the long-term mega-trends which will shape ASEAN's development trajectory, and propose a development vision with actionable policy recommendations for ASEAN to become the fourth-largest economy in the world by 2030. Into its fifth edition, the book updates the annual economic competitive analysis for ASEAN-10 conducted by the Asia Competitiveness Institute (ACI). It also introduces an innovation to the institute's methodological framework which is the use of Shapley values to come up with objective weights for indicators, sub-environments and environments in the competitiveness index. This methodological innovation not only adds an element of objectivity in terms of the assignment of weights, but also validates the robustness of results obtained from the competitiveness studies over the past years. Recognising the importance of foreign direct investment (FDI) to growth and development in the region, the book also presents an empirical investigation of the drivers of FDI inflows, with specific focus on the effects of exchange rate and its volatility. For a group of economies looking to leverage on FDI and trade to transform themselves into the fourth-largest economy in the world, it is important for ASEAN to achieve high external competitiveness, especially in terms of the member states' real effective exchange rates (REER). These research findings make important academic and policy contributions by teasing out the relationship between REER levels, volatility and FDI in the ASEAN context. Finally, the book collates speeches by academics and policy-makers on issues of key interests to the future development of ASEAN. It contains the reflection on the ASEAN Charter by Professor Tommy Koh, Ambassador-at-Large at the Ministry of Foreign Affairs of Singapore. Moreover, the discussions on the One Belt One Road initiative and its

implication for the region by Mr K Shanmugam, Minister for Home Affairs and Minister for Law of Singapore; and Professor Liew Mun Leong, Chairman of Surbana Jurong and Changi Airport Group as well as Provost Chair and Professor of NUS make this book a valuable compendium for policy-makers, thinkers, and anyone who has an interest in Southeast Asia and the Asia-Pacific.

The theme of the 2012 conference is 'Quality of Life through Quality of Information'. As always, the conference provides a unique platform for the exchange of ideas and experiences among the actors and stakeholders of ICT supported healthcare. The book incorporates contributions related to the latest achievements in biomedical and health informatics in terms of major challenges such as interoperability, collaboration, coordination and patient-oriented healthcare at the most appropriate level of care. It also offers new perspectives for the future of biomedical and health Informatics, critical appraisal of strategies for user involvement, insights for design, deployment and the sustainable use of electronic health records, standards, social software, citizen centred e-health, and new challenges in rehabilitation and social care informatics. The topics presented are interdisciplinary in nature and will be of interest to a variety of professionals; physicians, nurses and other allied health providers, health informaticians, engineers, academics and representatives from industry and consultancy in the various fields.

Nonlinear Optics George I. Stegeman, Robert A. Stegeman, 2012-06-29 Clear, integrated coverage of all aspects of nonlinear optics—phenomena, materials, and devices Coauthored by George Stegeman, one of the most highly respected pioneers of nonlinear optics—with contributions on applications from Robert Stegeman—this book covers nonlinear optics from a combined physics, optics, materials science, and devices perspective. It offers a thoroughly balanced treatment of concepts, nonlinear materials, practical aspects of nonlinear devices, and current application areas. Beginning with the presentation of a simple electron on a spring model—to help readers make the leap from concepts to applications—Nonlinear Optics gives comprehensive explanations of second-order phenomena, derivation of nonlinear susceptibilities, third-order nonlinear effects, multi-wave mixing, scattering, and more. Coverage includes: Nonlinear response of materials at the molecular level Second-order nonlinear devices, their optimization and limitations The physical origins of second- and third-order nonlinearities Typical frequency dispersion of nonlinearities, explained in terms of simple two- and three-level models Ultrafast and ultrahigh intensity processes Practice problems demonstrating the design

of such nonlinear devices as frequency doublers and optical oscillators. Based on more than twenty years of lectures at the College of Optics and Photonics (CREOL) at the University of Central Florida, *Nonlinear Optics* introduces all topics from the ground up, making the material easily accessible not only for physicists, but also for chemists and materials scientists, as well as professionals in diverse areas of optics, from laser physics to electrical engineering.

50 Years of Central Banking in Kenya Patrick

Njoroge, Victor Murinde, 2021. This book documents important milestones in the epic journey traversed by the Central Bank of Kenya over the last 50 years, putting into perspective the evolution of central banking globally and within the East African region, and contemplating future prospects and challenges. The book is timely, mainly because the global financial landscape has shifted. Central bankers have expanded their mandates, beyond the singular focus on inflation and consider economic growth as their other important objective. Financial crises have continued to disrupt the functioning of financial institutions and markets, the most devastating episodes being the global financial crisis, which broke out in 2008 and from which the global financial system has not fully recovered, and the unprecedented challenges posed by the global coronavirus pandemic. Bank regulation has moved from Basel I, to Basel II, and somehow migrated to Basel III, although some countries are still at the cross-roads. The book originated from the wide ranging discussions on central banking, from a symposium to celebrate the 50 year anniversary on 13 September 2016 in Nairobi. The participants at the symposium included current and former central bank governors from Kenya and the Eastern Africa region, high level officials from multilateral financial institutions, policy makers, bank executives, civil society actors, researchers and students. The book is an

invaluable resource for policy makers, practitioners and researchers, on how monetary policy and financial practices in vogue today in Kenya have evolved through time and worked very well, but also about some pitfalls--
