Camp Colt to Desert Storm George F. Hofmann, Donn A. Starry, 2014-04-23 The tank revolutionized the battlefield in World War II. In the years since, additional technological developments—including nuclear weapons, ballistic missiles, computer assisted firing, and satellite navigation—have continued to transform the face of combat. The only complete history of U.S. armed forces from the advent of the tank in battle during World War I to the campaign to drive Iraq out of Kuwait in 1991, *Camp Colt to Desert Storm* traces the development of doctrine for operations at the tactical and operational levels of war and translates this fighting doctrine into the development of equipment.

A G.I. in The Ardennes Denis Hambucken, 2020-02-28 A G.I. in the Ardennes focuses on the human experience during wartime. What was life like for a regular American soldier who gave his life to combat fascism? By immersing himself in historical documents, hundreds of letters and several interviews from that period of time, Denis Hambucken managed to accurately reconstruct the daily life of an American soldier in impressive detail. The author takes a closer look at the weapons, equipment and personal belongings of the soldiers who fought at the Western front, while sharing numerous personal anecdotes and moving stories.

Small Arms Up Close Martin J. Dougherty, 2015-12-15 Small weapons that can be fired by one person have been in use for centuries and remain an integral part of modern warfare. This resource showcases handguns, rifles, and more through 3D digital modeling that allows readers to see each weapon from every angle. Each weapon's features and safety measures are fully explained, and accompanying text provides the history of its use, complete with fascinating war stories.

Through Mobility We Conquer George F. Hofmann, 2006-07-03 The U.S. Cavalry, which began in the nineteenth century as little more than a mounted reconnaissance and harrying force, underwent intense growing pains with the rapid technological developments of the twentieth century. From its tentative beginnings during World War I, the eventual conversion of the traditional horse cavalry to a mechanized branch is arguably one of the greatest military transformations in history. *Through Mobility We Conquer* recounts the evolution and development of the U.S. Army's modern mechanized cavalry and the doctrine necessary to use it effectively. The book also explores the debates over how best to use cavalry and how these discussions evolved during the first half of the century. During World War I, the first cavalry theorist proposed combining arms coordination with a mechanized force as an answer to the stalemate on the Western Front. Hofmann brings the story through the next fifty years, when a new breed of cavalrymen became cold war warriors as the U.S. Constabulary was established as an occupation security-police force. Having reviewed thousands of official records and manuals, military journals, personal papers, memoirs, and oral histories -- many of which were only recently declassified -- George F. Hofmann now presents a detailed study of the doctrine, equipment, structure, organization, tactics, and strategy of U.S. mechanized cavalry during the changing international dynamics of the first half of the twentieth century. Illustrated with dozens of photographs, maps, and charts, *Through Mobility We Conquer* examines how technology revolutionized U.S. forces in the twentieth century and demonstrates how perhaps no other branch of the military underwent greater changes during this time than the cavalry.

Weapons and Warfare [2 volumes] Spencer C. Tucker, 2020-03-26 This work covers major weapons throughout human history, beginning with clubs and maces; through crossbows, swords, and gunpowder; up to the hypersonic railgun, lasers, and robotic weapons under development today. Weapons and Warfare is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history. In addition to providing basic factual information, this encyclopedia will delve into the greater historical context and significance of each weapon. The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history. The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons. It then offers entries on more than 650 individual weapons systems. Each entry has sources for further reading. The weapons are presented alphabetically within six time periods, ranging from the prehistoric and ancient periods to the contemporary period. Each period has its own introduction that treats the major trends occurring in that era. In addition, 50 sidebars offer fascinating facts on various weapons. Numerous illustrations throughout the text are also included.

Early US Armor Steven J. Zaloga, 2017-04-07 Between the two World Wars, the US contributed significantly to the development of the tank, a weapon invented by the British and the French seeking a way to break through the lines of German trenches. From the employment of the French Renault FT and British Mark V during their involvement in World War I, the US branched out with their own indigenous designs including the M1 Cavalry Car and the M2 Light and Medium tanks, the precursors to the Stuart and Grant tanks of World War II. Tank designers in this period faced unique challenges and so the story of early American armour is littered with failures amongst the successes. Featuring previously unpublished photos and fully illustrated throughout, Early American Armor (1): Tanks 1916-40 is essential reading for anyone interested in American armour, or in the development of tank design.

World War II US Army Combat Equipments Gordon L. Rottman, 2016-02-25 A soldier's "web gear" is as important to his ability to live and fight on the battlefield as are his clothing and weapons. In World War II the US Army issued equipment items that had originated in 1910, though modified and augmented in the 1920s and 1930s, and again during the war itself as a result of combat experience. This book describes and illustrates the great majority of the personal equipment provided for infantry riflemen, GIs armed with other weapons and their ammunition-bearers, officers, and medics. In addition to the web gear itself it covers canteens, mess kit, and first aid items; weapons-related and other specialist items; the long struggle to produce a practical backpack; bivouac and shelter gear, and the most commonly carried tools. The text also explains the basics of materials, colors, markings, nomenclature, and weights for the guidance of collectors. It is illustrated with wartime photos and color close-ups, and the wide-ranging color plates specially prepared for this book offer more than 130 images.

Tanks Spencer C. Tucker, 2004-10-25 This expert study discusses the development and evolution of the tank and the tactics behind its employment, covering both its capabilities as a weapons system and its strategic use on the battlefield. Tanks: An Illustrated History of the Their Impact follows the development of tracked-and-armored fighting vehicles across the 20th century, from the world wars to the Cold War battlefields of Korea and Vietnam; and from Arab-Israeli conflicts to the Persian Gulf. The book describes the distinctive characteristics and capabilities of each new generation of tank, as well as the formulation of armored doctrines and deployment strategies in France, Britain, Germany, the Soviet Union, the United States, Japan, Israel, and the Arab nations.

It is an expert introduction to how the role of the tank has changed over time, a story of technological innovation, strategic daring, desperate battles (Stalingrad, Kursk), and charismatic commanders like Erwin Rommel and George S. Patton (who defeated Rommel's division by following a plan from the Desert Fox's own book).

The Encyclopedia of Weapons of World War II Chris Bishop, 2002 The encyclopedia of weapons of world war II is the most detailed and authoritative compendium of the weapons of mankind's greatest conflict ever published. It is a must for the military, enthusiast, and all those interested in World War II.

Repeating and Multi-Fire Weapons Gerald Prenderghast, 2018-04-04 From the very earliest days of organized warfare, combatants have wanted to develop weapons with more firepower. This has inevitably led to a wide variety of repeating weapons, capable of a degree of sustained fire without reloading. Based largely upon new research, this book explores the history of repeating and multi-fire weapons, beginning with the Chinese repeating crossbow in the 4th century BCE, and ending with the world's most common firearm, the Kalashnikov AK-47. The author describes the potency of the machine gun in World War I, the development of the semiautomatic pistol and the role of the submachine gun in improving the effectiveness of the infantryman.

Desert Armour Robert Forczyk, 2023-02-16 Robert Forczyk covers the development of armoured warfare in North Africa from the earliest Anglo-Italian engagements in 1940 to the British victory over the German Afrikakorps in Operation Crusader in 1941. The war in the North African desert was pure mechanized warfare, and in many respects the most technologically advanced theatre of World War II. It was also the only theatre where for three years British and Commonwealth, and later US, troops were in constant contact with Axis forces. World War II best-selling author Robert Forczyk explores the first half of the history of the campaign, from the initial Italian offensive and the arrival of Rommel's Panzergruppe Afrika to the British Operation Crusader offensive that led to the relief of Tobruk. He examines the armoured forces, equipment, doctrine, training, logistics and operations employed by both Allied and Axis forces throughout the period, focusing especially on the brigade and regimental level of operations. Fully illustrated throughout with photographs, profile artwork and maps, and featuring tactical-level vignettes and appendices analysing tank data, tank deliveries in-theatre and orders of battle, this book goes back to the sources to provide a new study of armoured warfare in the desert.

EM33 American Web Equipment 1910-1967 Martin J Brayley, 2006-05-22 In this book, a follow-up to the same author's well-received study of British web equipment, Martin Brayley gives a detailed illustrated overview of the webbing straps, holsters, carriers and haversacks used by American combat troops from before World War One to the Vietnam War. Hundreds of different items are photographed, and the often small differences between suppliers and periods are pointed in the learned and informative text. This book offers collectors and students of militaria a detailed and authoritative review of the development of the US Army's web equipment. It tells the story from the first M1910 set taken to France by the 'Doughboys' of World War One to the M1956 and its M1967 replacement worn by the 'grunts' in Vietnam. Superbly illustrated with more than 100 full-colour photographs. Martin Brayley is a prolific collector of military equipment and is a photographer by profession.

Normandiefont Vince Milano, Bruce Conner, 2011-10-21 In the cold morning of June 6, 1944, thousands of German soldiers are in position from Port en Bessin eastwards past Colleville on the Normandy coast, aware that a massive invasion force is heading straight for them. According to Allied Intelligence, they shouldn't be there. 352

infantry division would ensure the invaders would pay a massive price to take OMAHA beach. There were veterans from the Russian front amongst them and they were well trained and equipped. The presence of 352 Division meant that the number of defenders was literally double the number expected – and on the best fortified of all the invasion beaches. What makes this account of the bloody struggle unique is that it is told from the German standpoint, using firsthand testimony of German combatants. There are not many of them left and these accounts have been painstakingly collected by the authors over many years.

The Liberation of the Philippines Jon Diamond, 2021-08-04 General Douglas A MacArthur, Commander of the Southwest Pacific Area, saw the liberation of the Philippines Archipelago as the launching board for the invasion of the Japanese Home Islands. By late 1944, with the capture of New Guinea and surrounding islands, the US Sixth and Eighth Armies were poised for the challenge. American forces landed on Leyte on 20 October 1944 with the Leyte Gulf naval battle quickly following. By 25 December the island was cleared opening the way for Lieutenant General Walter Krueger's Sixth Army to invade Luzon on 9 January 1945. Bitter Japanese resistance required Eichelberger's Eighth Army as reinforcements. Manila finally fell on 4 March. In the meantime Bataan was captured on 16 February and Corregidor on 2 March after a US airborne assault. Fighting continued and MacArthur finally declared the liberation of the Archipelago on 5 July, just a month before the Atom bombs fell on Hiroshima and Nagasaki. This superbly illustrated work in the Pacific War Images of War series leaves the reader in no doubt as to the intensity of the land, sea and air operations required by the Allies to defeat the Japanese.
