M35 A2c Ryszard T. Kominek,2009-12-15 * Includes free decals and masking foil * Packed with color photos The M35 family of trucks is a long-lived vehicle initially deployed by the United States Army, and subsequently utilized by many nations around the world. A truck in the 21-2 ton weight class, it was one of many vehicles in US military service to have been referred to as the deuce and a half. While the basic M35 cargo truck are rated to carry 5000 pounds across country or 10,000 pounds over roads, they have been known to haul twice as much as rated. Trucks in this weight class are considered medium duty by the military and Department of Transportation. The M35 series formed the basis for a wide range of specialized vehicles. Variants with a C suffix such as M35A2C featured a straight drop-side cargo bed. This album of detailed photographs is invaluable for the modeler or enthusiast alike. About the Series This is a classic series of highly illustrated books on the best machines of war, with several hundred photographs of each aircraft or vehicle. With close-up views of the key features of each machine, including its variations, markings and modifications, customizing and creating a model has never been easier. Includes extra features such as decals and masking foil.

In Hot Pursuit of Language in Prehistory John D. Bengtson,2008 Compiled in honor and celebration of veteran anthropologist Harold C. Fleming, this book contains 23 articles by anthropologists (in the general sense) from the four main disciplines of prehistory: archaeology, biogenetics, paleoanthropology, and genetic (historical) linguistics. Because of Professor Fleming's major focus on language he founded the Association for the Study of Language in Prehistory and the journal Mother Tongue the content of the book is heavily tilted toward the study of human language, its origins, historical development, and taxonomy. Because of Fleming's extensive field experience in Africa some of the articles deal with African topics. This volume is intended to exemplify the principle, in the words of Fleming himself, that each of the four disciplines is enriched when it combines with any one of the other four. The authors are representative of the cutting edge of their respective fields, and this book is unusual in including contributions from a wide range of anthropological fields rather than concentrating in any one of them.
