Stryker Interim Combat Vehicle David Grummitt, 2021-01-13 This illustrated modeling guide reviews the full range of kits and accessories available to model the Stryker and LAV III in all the major scales. The Stryker interim combat vehicle was a stop-gap measure, designed to help the United States project its military force in hotspots around the world. First deployed in Iraq in 2003, it has since proved itself an integral part of the US's warfighting capability. Today the Stryker has been adapted to face the new threat of a resurgent Russia. This volume in the LandCraft series of modeling guides examines the Stryker and LAV III in US, Canadian and New Zealand service. In addition to describing the design, development, and operational history of the Stryker and LAV III, David Grummitt gives a full account of available modeling kits and accessories. Six builds

are featured, covering the most important variants. Detailed color profiles provide both reference and inspiration for modelers and military enthusiasts alike.

Exultant Stephen Baxter,2004-10-26 “Baxter has an uncanny gift for mixing a punchy, cyberpunk cynicism with his resolutely hard SF story base. . . . [Exultant] rivals Asimov in its boundless vision for the future evolution of humanity.”—Kirkus Reviews (starred review) For more than twenty thousand years, humans have been at war with the alien race of Xeelee. Faced with certain death, a young pilot, Pirius, disobeys orders and travels into the future. Upon his return, Pirius is court-martialed and sentenced to penal servitude. But it is not only Pirius who pays the price. In flying into the future and back again, Pirius returned to a time before he’d left, a time inhabited by his younger self, who also receives punishment. Commissary Nilis believes that the elder Pirius, whom he dubs Pirius Blue, may know how to defeat the Xeelee. But Nilis can do nothing for Pirius Blue. Instead, he takes the younger Pirius—Pirius Red—back to Earth. There Pirius Red will discover truths that shatter his preconceived notions of all that he is fighting for, while Pirius Blue will learn even harsher truths. But the most shocking revelation of all is still to come. “Absurdly ambitious, technically brilliant, and downright exciting.”—SFX Magazine “Striking . . . chilling . . . [with] a triumphant conclusion.”—Starburst

Full Metal Panic Shouji Gatou,Tomohiro Nagai,2006-01-31 Relates the adventures of Sosuke, a trained operative from a secret organization and a high school student.

The LP Is Back! Audio Amateur Press,1999

With Our Backs to Berlin Tony Le Tissier,2005-03-24 Based upon interviews with a

wide-range of former German Army and SS soldiers, these unique personal episodes vividly depict the extraordinary circumstances of the Third Reich's final days as armies closed in from all sides. Le Tissier's interviews link the brutality of combat with the humanity of the desperate battles.

Armor and Blood: The Battle of Kursk Dennis E. Showalter, 2013-08-27 One of America's most distinguished military historians offers the definitive account of the greatest tank battle of World War II—an epic clash of machines and men that matched the indomitable will of the Soviet Red Army against the awesome might of the Nazi Wehrmacht. While the Battle of Kursk has long captivated World War II aficionados, it has been unjustly overlooked by historians. Drawing on the masses of new information made available by the opening of the Russian military archives, Dennis Showalter at last corrects that error. This battle was the critical turning point on World War II's Eastern Front. In the aftermath of the Red Army's brutal repulse of the Germans at Stalingrad, the stakes could not have been higher. More than three million men and eight thousand tanks met in the heart of the Soviet Union, some four hundred miles south of Moscow, in an encounter that both sides knew would reshape the war. The adversaries were at the peak of their respective powers. On both sides, the generals and the dictators they served were in agreement on where, why, and how to fight. The result was a furious death grapple between two of history's most formidable fighting forces—a battle that might possibly have been the greatest of all time. In *Armor and Blood*, Showalter re-creates every aspect of this dramatic struggle. He offers expert perspective on strategy and tactics at the highest levels, from the halls of power in Moscow and Berlin to the battlefield command

posts on both sides. But it is the author's exploration of the human dimension of armored combat that truly distinguishes this book. In the classic tradition of John Keegan's *The Face of Battle*, Showalter's narrative crackles with insight into the unique dynamics of tank warfare—its effect on men's minds as well as their bodies. Scrupulously researched, exhaustively documented, and vividly illustrated, this book is a chilling testament to man's ability to build and to destroy. When the dust settled, the field at Kursk was nothing more than a wasteland of steel carcasses, dead soldiers, and smoking debris. The Soviet victory ended German hopes of restoring their position on the Eastern Front, and put the Red Army on the road to Berlin. *Armor and Blood* presents readers with what will likely be the authoritative study of Kursk for decades to come. Advance praise for *Armor and Blood*

"The size and the brutality of the vast tank battle at Kursk appalls, this struggle that gives an especially dark meaning to that shopworn phrase 'last full measure.' Prepare yourself for a wild and feverish ride over the steppes of Russia. You can have no better guide than Dennis E. Showalter, who speaks with an authority equaled by few military historians."—Robert Cowley, founding editor of *MHQ: The Quarterly Journal of Military History*

"A fresh, skillful, and complete synthesis of recent revelations about this famous battle . . . As a myth buster, *Armor and Blood* is a must-read for those interested in general and military history."—David M. Glantz, editor of *The Journal of Slavic Military Studies*

"Refreshingly crisp, pointed prose . . . Throughout, [Showalter] demonstrates his adeptness at interweaving discussions of big-picture strategy with interesting revelations and anecdotes. . . . Showalter does his best work by keeping his sights set firmly on the battle at hand, while also parsing the conflict for developments that would have far-

reaching consequences for the war.”—Publishers Weekly

World War II Tactical Camouflage Techniques Gordon L. Rottman, 2013-02-20

This book explains and illustrates the actual materials and techniques adopted (both successfully and unsuccessfully) by tactical units - i.e. the concealment of personnel, weapons, equipment, field positions, and movement by infantry riflemen and weapons crews, artillerymen, and vehicle crews. It covers all areas and seasons in the European and Mediterranean theaters of operations, for the US, British, German, and Soviet armies. It includes camouflage of the person, personal equipment, and weapons; natural materials and “expedient” techniques; issued camouflage materials such as nets, ponchos, etc; the principles of camouflaging equipment and vehicles, of positioning and terrain integration, the effects of light and shadow, and the use of decoy and dummy positions. Featuring meticulous full-color artwork and specially selected period photographs, this absorbing study casts new light on the camouflaging techniques developed by the major armies of World War II on a host of European battlefields.

The American Industrial Complex William C. Foster, 1960

Amx-30 Family M. P. Robinson, 2015-02-19 The AMX-30 was used as the basis for a range of armored vehicles that have seen extensive service in the French army and elsewhere. In this Photosniper, which completes the study of the AMX-30 series by M.P. Robinson, the stories of France's specialized artillery and engineer variants are explained. The AMX-30D recovery vehicle, the GCT and Au-F1 series of self-propelled guns, the AMX-30R Roland and AMX-30SA Shahine anti-aircraft missile launchers, the AMX-30 Bitube DCA anti-aircraft tank, the AMX-30H Bridgelay and the EBG armored engineers

vehicle are all covered in text and photographs. France's comprehensive rebuilding programs that resulted in the development of the Au-F1TA, of the improved EBG versions and of sophisticated mine clearing versions of the AMX-30B2 in the decades since the end of the Cold War are also described. This work is an excellent reference for the modeler with over 180 photos; these include examples chosen from GIAT's archives, photos of vehicles in everyday service, vehicles seen on the parade ground and in the desert wastes of Iraq.
