M72 LAW and The RPG-7 Training and Doctrine Command, The M72 LAW and the RPG-7 are the iconic rocket-powered anti-tank weapons of the post-WW2 era; both are still in use to this day in conflicts around the world. This book examines each in detail using a variety of historical documents, both operator manuals and technical briefings developed originally by the US Training and Doctrine Command (TRADOC). Topics for the M72 covered are basic function and specifications, firing preparation, back blast awareness, firing positions and aiming/firing steps, plus failure to fire procedures. The RPG-7 information extensively covers component and function descriptions, weapon capabilities, optical sight details, Hit/kill probabilities, Soviet deployment doctrine, specific counter-measures and more. Well illustrated with over 70 images and diagrams. An in-depth review of each weapon system that will please any student of military studies.
