The Beretta M9 Pistol Leroy Thompson,2011-09-20 In 1990 the Beretta M9 replaced the venerable Colt 1911 as the main pistol of choice for the US Army, and it has seen widespread use in Iraq and Afghanistan. Written by a leading pistol expert who currently trains US Special Forces in the use of this weapon, this book is an honest appraisal of the successes and failings of the 9mm Beretta. The volume traces the Beretta designs that preceded the M9, as well as its use on the battlefield, including the impact it has had on close combat training due its the larger magazine capacity. It also details the adoption of the Beretta by US law enforcement agencies and the impact this has had. This is a fascinating history of a classic pistol and an assessment of its future use.

*National Defense* U S Government Accountability Office (G,U. S. Government Accountability Office (,2013-07 GAO discussed the military's M9 9-millimeter (mm) handguns, focusing on: (1) M9 safety and quality problems; (2) allegations that the Army attempted to cover up the problems; (3) similarities and differences between M9 tested in 1984 and current M9; and (4) the status of recompetition for award of a follow-on procurement contract. GAO found that: (1) the Army contracted to buy 321,260 M9 valued at \$77.3 million; (2) as of August 17, 1988, the Army accepted delivery of 133,830 M9; and (3) M9 have experienced frame cracks, causing the Army to reject about 12,000 and the contractor to implement an engineering change proposal in April 1988 to correct the problem. GAO also found that: (1) M9 had 14 slide failures, causing injuries to four shooters; (2) the contractor believes that the failures resulted from firing incorrect ammunition, but the Army believes that metal fatigue is the primary cause of failure; (3) there was no evidence that the Army attempted to cover up the problem, as it issued a safety message to all M9 users shortly after the first slide failure; and (4) the Army plans to stop delivery of M9 until the contractor corrects the problem. GAO also found that a February 1988 Army report concluded that current M9 met the 1984 requirements and that contract changes have not materially altered their characteristics or configuration or degraded their performance. In addition, GAO found that the Army cancelled the on-going competition for follow-on procurement of 9-mm handguns, began a new competition in May 1988, and expected to award the contract in 1989.

Model Development and Optimization V.V. Ivanov,2013-11-09 At present, concerning intensive development of computer hardware and software, computer-based methods for modeling of difficult problems have become the main technique for theoretical and applied investigations. Many unsolved tasks for evolutionary

systems (ES) are an important class of such problems. ES relate to economic systems on the whole and separate branches and businesses, scientific and art centers, ecological systems, populations, separate species of animals and plants, human organisms, different subsystems of organisms, cells of animals and plants, and soon. Available methods for modeling of complex systems have received considerable attention and led to significant results. No large-scale programs are done without methods of modeling today. Power programs, health programs, cosmos investigations, economy designs, etc. are a few examples of such programs. Nevertheless, in connection with the permanent complication of contemporary problems, existing means are in need of subsequent renovation and perfection. In the monograph, along with analysis of contemporary means, new classes of mathematical models (MM) which can be used for modeling in the most difficult cases are proposed and justified. The main peculiarities of these MM offer possibilities for the description of ES; creation and restoration processes; dynamics of elimination or reservation of obsolete technology in ES; dynamics of resources distribution for fulfillment of internal and external functions of ES; and so on. The complexity of the problems allows us to refer to the theory and applications of these MM as the mathematical theory of development. For simplicity, the title Model Development and Optimization was adopted.
