**This is your hour** John Carter Wood, 2019-05-02 In the 1930s and 1940s - amid the crises of totalitarianism, war and a perceived cultural collapse in the democratic West - a high-profile group of mostly Christian intellectuals met to map out 'middle ways' through the 'age of extremes'. Led by the missionary and ecumenist Joseph H. Oldham, the group included prominent writers, thinkers and activists such as T. S. Eliot, John Middleton Murry, Karl Mannheim, John Baillie, Alec Vidler, H. A. Hodges, Christopher Dawson, Kathleen Bliss and Michael Polanyi. The 'Oldham group' saw faith as a uniquely powerful resource for social and cultural renewal, and it represents a fascinating case study of efforts to renew freedom in a dramatic confrontation with totalitarianism. The group's story will appeal to those interested in the cultural history of the Second World War and the issue of applying faith to the 'modern' social order.

**The Beretta M9 Pistol** Leroy Thompson, 2011-09-20 In 1990 the Beretta M9 replaced the venerable Colt 1911 as the main pistol of choice for the US Army, and it has seen widespread use in Iraq and Afghanistan. Written by a leading pistol expert who currently trains US Special Forces in the use of this weapon, this book is an honest appraisal of the successes and failings of the 9mm Beretta. The volume traces the Beretta designs that preceded the M9, as well as its use on the battlefield, including the impact it has had on close combat training due to its larger magazine capacity. It also details the adoption of the Beretta by US law enforcement agencies and the impact this has had. This is a fascinating history of a classic pistol and an assessment of its future use.

**Stories Without End** Judith Binney, 2010 Judith Binney's work spans nearly forty years of historical endeavour that began with the award-winning biography of the missionary Thomas Kendall, *The Legacy of Guilt* (1968). Her magisterial publication of 2009, *Encircled Lands*, is the culmination of many years' work on the history of the Urewera - a great scholarly enterprise that began with a visit to Maungapohatu in the late 1970s. The questions that presented themselves, in that place about that history, led to what Judith Binney has called 'the unanticipated trilogy': *Mihaia* (the biography of Rua Kenana); *Nga Morehu* (oral histories of women connected to the Ringatu church); and prize-winning biography of Te Kooti, *Redemption Songs*. Around this central core of remarkable books stands a ring of essays, exploring sidepaths, offering other stories, presenting glimpses tangential to her historical narratives. The people of these 'stories without end' are those we meet in the books: Rua and Te Kooti, their wives and their descendants; the leaders of the Urewera; the schoolteachers from Maungapohatu; those early missionaries; the government men. Oral history brings its particular resonance to some essays; a discourse on symbols and maps lends insight to another; taking this very specific history, located in the Urewera, to readers outside New Zealand gives a new slant. The stories in this collection are just that: narratives that flow one into another, filling out histories, bringing people out of the shadows, bringing scholarship to life. They are 'stories without end', from a writer who is also one of New Zealand's greatest scholars.

**Dewey** J.E. Tiles,2002-09-11 First Published in 1990. The purpose of this series is to provide a contemporary assessment and history of the entire course of philosophical thought. Each book constitutes a detailed, critical introduction to the work of a philosopher of major influence and significance. Someone relatively new to philosophy might expect from the series title to have here a book about the disputes in which John Dewey engaged with other philosophers. 'Arguments' in the present context, however, refers to a general way of articulating thoughts, that is by offering some as reasons for holding others. The author states that Dewey offers a picture of what contemporary philosophy would be like if, transformed as it has been under the influence of modern science, it had at the same time carried with it more of the legacy of the post-Kantian (or 'Hegelian') philosophy of the nineteenth century. This book is an attempt to specify some of the most important features of that picture and how they bear on the way philosophy conducts argument.

**Asymptotics for Associated Random Variables** Paulo Eduardo Oliveira,2012-01-11 The book concerns the notion of association in probability and statistics. Association and some other positive dependence notions were introduced in 1966 and 1967 but received little attention from the probabilistic and statistics community. The interest in these dependence notions increased in the last 15 to 20 years, and many asymptotic results were proved and improved. Despite this increased interest, characterizations and results remained essentially scattered in the literature published in different journals. The goal of this book is to bring together the bulk of these results, presenting the theory in a unified way, explaining relations and implications of the results. It will present basic definitions and characterizations, followed by a collection of relevant inequalities. These are then applied to characterize almost sure and weak convergence of sequences of associated variables. It will also cover applications of positive dependence to the characterization of asymptotic results in nonparametric statistics. The book is directed towards researchers in probability and statistics, with particular emphasis on people interested in nonparametric methods. It will also be of interest to graduate students in those areas. The book could also be used as a reference on association in a course covering dependent variables and their asymptotics. As prerequisite, readers should have knowledge of basic probability on the reals and on metric spaces. Some acquaintance with the asymptotics of random functions, such as empirical processes and partial sums processes, is useful but not essential.
