**The End of Online Shopping** Jongen Wijnand, 1999-01-05 Retail is going through difficult times and is suffering the consequences of both the economic crisis and the digitization of society. Fundamentally, there is a bigger problem: stores cannot keep up with the changing behavior of customers who are connected 24/7, customers for whom there is no distinction between online and offline. *The End of Online Shopping: The Future of New Retail in an Always Connected World* describes how the smart, the sharing, the circular, and the platform economy are shaping a new era of always connected retail. Retailers urgently need to innovate if they want to stay relevant in a world dominated by marketplaces and sharing platforms. The book contains inspiring examples from different industries -- which include the usual suspects such as Amazon, Alibaba, and Google, but also local startups -- and covers all aspects of the customer journey, from orientation and selection to delivery. *The End of Online Shopping* provides an excellent overview of shopping trends and developments worldwide, and offers readers indispensable insights into the future of retail.

**Recording, Modeling and Visualization of Cultural Heritage** Manos Baltsavias, Armin Gruen, Luc van Gool, Maria Pateraki, 2005-11-17 This book deals with the recording, modelling and visualization of cultural heritage (anthropogenic objects and natural scenes) and related processes. The areas discussed include data acquisition, using a variety of sensors (mainly optical sensors and laser scanners); platforms and mobile systems; data management and Spatial Information Systems; 3D modeling; and reconstruction, visualization and animation; Virtual and Augmented Reality, including innovative software and hardware systems; applications and interdisciplinary projects. A central focus is the development of methods for automated data processing. The aim of the workshop was to survey recent developments, trends, and new approaches and to bring together the various heterogeneous groups active in cultural heritage (sponsors, archaeologists and architects, scientists in remote sensing, photogrammetry, computer vision and computer graphics etc.). The involvement of these groups, representing both producers and users of information, allowed a cross-fertilisation and a multidisciplinary treatment of the workshop topics. This book offers a comprehensive selection of high-quality contributions from leading international research institutions and other organisations active in cultural heritage, treating theoretical issues as well as projects and applications and representing the cutting edge of this key subject as presented at the workshop organised by the Swiss Federal Institute of Technology (ETH) Zurich at Monte Verità, Ascona, Switzerland on 22-27 May 2005.

The Incomplete Currency Marcello Minenna, Giovanna Maria Boi, Paolo Verzella, 2016-06-27 A

fact-based treatise on the Eurozone crisis, with analysis of possible solutions The Incomplete Currency is the only technical — yet accessible — analysis of the current Eurozone crisis from a global perspective. The discussion begins by explaining how the Euro's architecture, the relationship between finance and the real economy, and the functioning of the Eurosystem in general are all at the root of the current crisis, and then explores possible solutions rooted in fact, not theory. All topics are analysed and illustrated, making extensive use of examples, tables, and graphics, and the ideas presented are supported by data sets and their statistical elaborations throughout the book. An extensive digital component includes numerical simulations of public debt dynamics for different Eurozone countries, evaluations of the sustainability of programmes like the Fiscal Compact, and stress tests on the ability of institutions like the ESM to cope with major liquidity crises, and the spreadsheets used to calculate data in the book is provided for readers to access for themselves. The survival of the European monetary union has been questioned due to the accumulation of structural imbalances and the negative effects of the global financial crisis. This book lays out the full extent of the problem, explains what caused it, and provides possible solutions backed by extensive data. Dig down to the root of the Eurozone crisis Learn why austerity doesn't fix anything Understand how the Euro has changed economies Consider possible strategies for recovery In a macroeconomic context where the monetary policy is the prerogative of the European Central Bank and fiscal policy, hopeless austerity works against the economic recovery of the Eurozone countries. A positive

attitude is difficult, but necessary. The Incomplete Currency is an insightful, important resource that guides readers toward real solutions.

*EU Citizens' Economic Rights in Action* Sybe de Vries, Elena Ioriatti, Paolo Guarda, Elisabetta Pulice, 2018-10-26 Ever since its inception, one of the essential tasks of the EU has been to establish the internal market. Despite the impressive body of case law and legislation regarding the internal market, legal and factual barriers still exist for citizens seeking to exercise their full rights under EU law. This book analyses these barriers, and proposes ways in which they may be overcome. Next to analysing the key barriers to exercising economic rights more generally, this book focuses on three areas which represent the applications of the four basic freedoms: consumer rights, the rights of professionals in gaining access to the market, and intellectual property rights in the Digital Single Market. With chapters from leading researchers, the main pathways towards the reduction and removal of these barriers are considered. Taking into account important factors such as the global financial crisis, as well as practical barriers, such as multilingualism, the solutions provided in this book provide a pathway to enhance cross border realisation of European citizens' access to the realisation of their economic rights, as well as increase in the cultural richness of the EU. *EU Citizens' Economic Rights In Action* is an important book, which will be an essential resource for students of EU citizenship, and economics, as well as for EU policymakers and practitioners interested in the field.

*Environment, Development, Agriculture* Bernhard Glaeser, 2016-09-16 Summarising the democratic experience in modern Western civilisation, this text defines the term and looks at its changing meanings over the past two centuries or so. It records criticisms, and is especially concerned with the conditions that are necessary for democracy to exist.

**Syriza Wave** Helena Sheehan, 2017-01-23 Utterly corrupt corporate and government elites bankrupted Greece twice over. First, by profligate deficit spending benefitting only themselves; second, by agreeing to an IMF "bailout" of the Greek economy, devastating ordinary Greek citizens who were already enduring government-induced poverty, unemployment, and hunger. Finally, in response to dire "austerity" measures, the people of Greece stood up, forming, from their own historic roots of resistance, Syriza—the Coalition of the Radical Left. For those who caught the Syriza wave, there was, writes Helena Sheehan, a minute of "precarious hope." A seasoned activist and participant-observer, Helena Sheehan adroitly places us at the center of the whirlwind beginnings of Syriza, its jubilant victory at the polls, and finally at Syriza's surrender to the very austerity measures it once vowed to annihilate. Along the way, she takes time to meet many Greeks in tavernas, on the street, and in government offices, engage in debates, and compare Greece to her own economically blighted country, Ireland. Beginning as a strong Syriza supporter, Sheehan sees Syriza transformed from a horizon of hope to a vortex of despair. But out of the dust of defeat, she draws questions radiating hope. Just how did what was possibly the most intelligent, effective instrument of the Greek left self-destruct? And what are the consequences for the Greek people, for the international left, for all of us driven to work for a better world? The *Syriza Wave* is a page-turning blend of political reportage, personal reflection, and astute analysis.

*Public Pension Reforms in China* Xinxin Ma, 2023-03-30 This book focuses on the public pension reform in China from both institutional and empirical studies perspectives. It introduces the process of the public pension reform in China and investigates its effects on households and firms' behaviors and individuals' well-being. It provides the reader with rich academic evidence for understanding the transformation of public pension and its effect on the household consumption, participating in risky financial market, and firms' decision making on wage and employment, as well as individuals' well-being. The main content of this book comprises three parts: (i) institutional transitions and issues on public pensions in China; (ii) the impact of public pensions on households or firms' behaviors in China; and (iii) the impact of public pensions on well-being in China. This book provides rich academic evidence about these issues based on economic theories and econometric methods using many kinds of Chinese nationwide representative survey data. This book is highly recommended to readers who are interested in up-to-date and in-depth empirical studies on the

issues of public pension reform, and its impact on individuals, households, and firms' behaviors as well as well-being in China. This book is of interest to those who are interested in the Chinese economy, social security policymakers, and scholars with an econometric analysis background.

*Fighting for Water* Andreas Bieler, 2021-05-20 In the wake of the global financial crisis, water services have come under renewed neoliberal assault across Europe. At the same time, the struggle against water privatization has continued to pick up pace; from the re-municipalization of water in Grenoble in 2000, to the United Nations declaration of water as a human right in 2010. In *Fighting for Water*, Andreas Bieler draws on years of extensive fieldwork to dissect the underlying dynamics of the struggle for public water in Europe. By analysing the successful referendum against water privatization in Italy, the European Citizens' Initiative on 'Water and Sanitation are a Human Right', the struggles against water privatization in Greece and water charges in Ireland, Bieler shows why water has been a fruitful arena for resistance against neoliberal restructuring.
