The Mad Scientist Hall of Fame: Daniel H. Wilson, Anna C. Long, Illustrated by Daniel Heard, 2012-03-01

Muwahahahaha! Dr. Frankenstein. Marie Curie. Dr. Moreau. Captain Nemo. They're the most fascinating minds of all time--and now a science guru has teamed up with an expert in human psychology to coax them out of their laboratories and onto the analyst's couch. Real and fictional, famous and infamous, crazy and just crazily driven, these brilliant men and women exhibit a list of neuroses almost as impressive as their extraordinary accomplishments. At last, you can explore their early fixations, their ambitions, their successes and failures, and the particular quirks that have granted each induction into the Mad Scientist Hall of Fame, including: • Dr. Evil: Megalomaniacal doctor with antisocial personality disorder (and pathological dislike of his own son, Scotty) • Nikola Tesla: Real-life mad scientist with obsessive compulsive disorder (and he talked to aliens) • Dr. Jekyll/Mr. Hyde: Brilliant doctor gone bad, suffering from multiple personality disorder (and a penchant for strong chemical cocktails) • Lex Luthor: Villain and supergenius with manic mood disorder (and premature baldness) Witty, illuminating, and thoroughly entertaining, this one-of-a-kind book offers irrefutable proof that success, super-intelligence, and a mantelpiece full of Nobel prizes is no guarantee of sanity. Praise for Daniel H. Wilson Daniel H. Wilson and Anna C. Long have made an exhaustive study of the evil mind. It is complete, pulls no punches, and reveals secrets that have hitherto remained hidden. It is for these reasons that I must liquidate them. Great book! --Mike Myers, aka Dr. Evil from Austin Powers Forget about John Connor--it's Daniel H. Wilson who is going to save us from the Terminators. --Forbes on How to Survive a Robot Uprising A tribute to the far-fetched ideas that often drive progress. --Erik Sofge, Popular Mechanics, for Where's My Jetpack?

The Dinosaur Disaster Matthew McElligott, 2015 Dr. Cosmic's class of clever monsters at the Mad Scientist Academy solve[s] the greatest challenges in science, [the first of which involves dinosaurs]--

The Mad Science Book Reto U. Schneider, 2008 You don't have to be an eccentric obsessive to be a scientist, but it helps... In *The Mad Science Book*, Reto Schneider tells the extraordinary tales of 100 of the more unusual experiments conducted across seven centuries of science. From the attempts of the 14th-century Dominican monk Theodoric von Freiberg to discover the cause of the rainbow, to the efforts of the 20th-century psychologist Harry Harlow to be the perfect mother to a family of reluctant rhesus monkeys, these are stories that are often bizarre, sometimes mind-boggling - occasionally stomach-churning - but always diverting, informative and enlightening. Among the myriad delights on display in this cabinet of scientific curiosities are the renowned doctor from Padua who sat in a pair of scales for 30 years, recording the minutest changes in his weight; the sheep, the duck and the rooster who became the world's first air passengers; the disgusting Dr Stubbins Ffirth, who swallowed other people's vomit in an attempt to prove that yellow fever cannot be transmitted from one person to another; the hapless soldier Alexis St Martin, left with a hole in his stomach after an accident with a musket; and the ever-optimistic Charles-Édouard Brown-Séquard, who injected himself with essence of guinea pigs' testicles as an anti-ageing remedy. There is trivia here in abundance, but also quirky, but genuinely influential, science, notably Merrill Flood's and Melvin Dresher's experiments with choices of outcomes, which have been widely influential as game theory. A fizzing cocktail of fascinating science and rich entertainment, *The Mad Science Book* tells the extraordinary stories of some truly, madly, geeky people. It should be top of every self-respecting science buff's Christmas 2008 wishlist.

The Mad Scientist's Guide to World Domination John Joseph Adams, 2013-02-19 From Victor Frankenstein to Lex Luthor, from Dr. Moreau to Dr. Doom, readers have long been fascinated by insane plans for world domination and the madmen who devise them. Typically, we see these villains through the eyes of good guys. This anthology, however, explores the world of mad scientists and evil geniuses—from their own wonderfully twisted point of view. An all-star roster of bestselling authors—including Diana Gabaldon, Daniel Wilson, Austin Grossman, Naomi Novik, and Seanan McGuire...twenty-two great storytellers all told—have produced a fabulous assortment of stories guaranteed to provide readers with hour after hour of high-octane entertainment born of the most megalomaniacal mayhem imaginable. Everybody loves villains. They're bad; they always stir the pot; they're much more fun than the good guys, even if we want to see the good guys win. Their fiendish schemes, maniacal laughter, and limitless ambition are legendary, but what lies behind those crazy eyes and wicked grins? How—and why—do they commit these nefarious deeds? And why are they so set on taking over the world? If you've ever asked yourself any of these questions, you're in luck: It's finally time for the madmen's side of the story. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

They Called Me Mad John Monahan, 2010-12-07 Discover the true genius behind history's greatest madmen. From Dr. Frankenstein to Dr. Jekyll, the image of the mad scientist surrounded by glass vials, copper coils, and electrical apparatus remains a popular fixture. In films and fiction, he's comically misguided, tragically misunderstood, or pathologically evil. But the origins of this stereotype can be found in the sometimes-eccentric real life men and women who challenged our view of the world and broke new scientific frontiers. They Called Me Mad recounts the amazing true stories of such historical luminaries as Archimedes, the calculator of pi and creator of the world's first death ray; Isaac Newton, the world's first great scientist and the last great alchemist; Nikola Tesla, who built the precursors of robots, fluorescent lighting, and particle beam weapons before the turn of the twentieth century-and more.

The Mad Scientist Next Door Clare De Marco, 2018-01-18 Read Along or Enhanced eBook: Ella's next door neighbor, Mr. Willis, is mean. She stays out of his way as much as possible. But when she accidentally sends her baby brother's favorite teddy bear into Mr. Willis' garden, Ella is forced to go over to his house. And Ella is in for a SHOCK!

Mad Scientist Academy: The Space Disaster Matthew McElligott, 2017-07-11 Fans of Ada Twist, Scientist, will want to join Dr. Cosmic's class of clever monsters as they tackle gravity, comets, and many moons in the third book of the Mad Scientist Academy series. When Dr. Cosmic's class meets Commander Nova, the school astronomer, they know their next lesson will be out of this world! With the help of Dr. Cosmic's latest invention—a planetarium—the class must complete four challenges. Each time the planetarium shifts and the atmosphere changes, the students find themselves floating from planet to planet. They put their new magnetic antigravity belts and trusted handbooks to the test to figure out where in the solar system Dr. Cosmic's invention has “sent” them—and how to land safely back on Earth. Don't Miss Mad Scientist Academy: The Ocean Disaster! Young readers can only hope for this much excitement on their real field trips. —Kirkus Reviews [A] space adventure that young readers will pore over, learn from, and enjoy. —School Library Journal

Slightly Mad Scientists J.F. Smith, 2010-04-22 A whimsical collection of popular science fiction subjects done with a few new twists. In Bad Behavior a citizen of a very strict society gets three years at a prison colony for a bad haircut. In Outlaw in Time a fast gun from the future goes back in time to see how he measures up against the real gunfighters of the Old West. In Colony Ship the fate of Earth's last remaining survivors falls into the hands of a group of hippie scientists from the past. Other stories are driven by time traveling con artists, portals into alternate dimensions and some good old fashioned space opera. The stories are short, to the point and fun to read. Fifty zonets for your approval.

Theo Gray's Mad Science Theodore W. Gray, 2013 The Skipper & Her Mate is a book about the people, boats and wildlife on the Irish waterways. Told from the perspective of a woman with only a week's hire-boat experience learning to skipper a vintage timber cruiser, it is a journey through rivers and canals, and an apprenticeship in the ways of boating among a vibrant community of new and diverse people. When Nicki Griffin started boating in 2000, the inland waterways were occupied by older family boats. In the years to follow, however, she would witness these being replaced by larger cruisers and gin palaces, changing the character of Irish waterways, and threatening what was, for many, a unique and special way of life. Following in the wake of such works as Theo Dorgan's Sailing for Home and Time on the Ocean, and Dick Warner's television shows, The Skipper & Her Mate will appeal to the novice, the river rat and the non-boater alike.

Frantastic Voyage Jim Benton, 2006 Franny's faithful lab assistant, Igor, has swallowed a doomsday device that is ready to go off at any moment! For any regular scientist, there is only one way to get the device out -- um...make that two ways. But Franny K. Stein is no ordinary scientist, so she concocts her own way to get the device back and save her friend. With her miniaturization machine, Franny shrinks herself to the size of a pin and goes on a field trip like no other...through the body of a ticking time-dog! Fasten your seatbelts, it's going to be a bumpy ride!
