World's Fastest Cars Sean McCollum,2016-09-08 Supercars, race cars, and sports cars all have blazing speed. How do they go so fast? Why do some cars have wings? Learn the answers for yourself and decide which of the fastest cars you'd like to drive.

**The World's Fastest Cars** Nick Cook,2001 Discusses the history and development of some of the world's fastest automobiles, describing the specific features and specifications of such cars as dragsters, Indianapolis 500 race cars, and the supersonic car.

**Great Plan, The #1** Chase Wheeler,2008-01-31 Speed Racer enters the high-octane Sword Mountain Race, but not everyone is in it to win. Some of the competitors are more interested in stealing the new plans for Speed's car, the Mach 5, than crossing the finish line. Can Speed save the top-secret plans and still win the race?

Ultimate Speed Samuel Hawley,Craig Breedlove,2018-10-02 An L.A. hot rodder with a high school education, a family to support and almost no money, Craig Breedlove set out in the late 1950s to do something big: harness the thrust of a jet in a car. With a growing obsession that would cost him his marriage, he started building in his dad's garage. The car's name: Spirit of America.

Through perseverance and endless hard work, Craig completed Spirit and broke the land speed record on the Bonneville Salt Flats, setting a new mark of 407 mph in 1963. In the early 1970s he turned to rockets and set an acceleration record at Bonneville that stands to this day. He built a jet car in the 1990s, Spirit of America–Sonic Arrow, to go head-to-head against Britain's ThrustSSC to be the first to Mach One. Craig's subsequent crash at 675 mph remains the fastest in history. Even today, at the age of 80, he is going strong with plans for yet another Spirit of America racer. The ultimate goal: 1,000 mph. Ultimate Speed is the authorized biography of Craig Breedlove, a candid revelation of one of motorsports' most interesting figures based primarily on countless hours of interviews with Craig and dozens of people connected to his life.

**The Physics of NASCAR** Diandra L. Leslie-Pelecky, 2008 Draws on the author's expertise in physics, as well as interviews with mechanics, pit crews, and other insiders, to trace the life cycle of a race car and offer insight into the scientific aspects of high-speed racing, in an account that also explains how drivers survive dangerous accidents. 35,000 first printing.

The World's Fastest Cars Sean McCollum, 2017 In a top-ten

format presents the worlds fastest cars--Provided by publisher.

**How Fast is It?** Ben Hillman,2008 In this third book by Ben Hillman, young readers will learn and see just how fast something is. By comparing objects such as the Thrust SSC (that's a Thrust-powered Super Sonic Car), an ostrich (don't underestimate the ostrich, my friend!), the human brain, and bamboo,wildly different objects are taken out of normal context and placed next to one another to allow for new and exciting perspectives. So just how fast is an ostrich? An ostrich would beat a top-notch professional cyclist in a ten-mile (sixteen km) race, hands down! While the best cyclists can race at blistering speeds of twenty-five miles per hour, the ostrich can run at forty-five miles per hour! Other books in the series that kids will enjoy: **How Big Is It?** and **How Strong Is It?**
